## TRANSIT COOPERATIVE RESEARCH PROGRAM

Sponsored by the Federal Transit Administration

Subject Area: VI Public Transit

Responsible Senior Program Officer: Christopher W. Jenks

# Research Results Digest 73

## SYNTHESIS OF INFORMATION RELATED TO TRANSIT PROBLEMS

This is a staff digest of the progress and status of TCRP Project J-7, "Synthesis of Information Related to Transit Problems," for which the Transportation Research Board is the agency conducting the research. Individual studies for the project are managed by Donna L. Vlasak, Senior Program Officer, with assistance from Jon Williams, Manager, Synthesis Studies, serving under the Studies and Information Services Division of the Transportation Research Board, Stephen R. Godwin, Director.

## BACKGROUND

The Transit Cooperative Research Program (TCRP) was established in 1992. The U.S. Department of Transportation proposed the TCRP, and it was authorized in the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991. The program was reauthorized in the Transportation Equity Act for the 21st Century (TEA-21) and the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). On May 13, 1992, a memorandum agreement outlining operating procedures was executed by three cooperating organizations: the Federal Transit Administration (FTA); the National Academies, acting through the Transportation Research Board (TRB); and the Transit Development Corporation, Inc. (TDC), a non-profit educational and research organization established by the American Public Transportation Association (APTA). The memorandum agreement was updated on January 12, 1999.

## INTRODUCTION

Transit administrators, engineers, and researchers often face problems for which

Suggestions for synthesis topics may be sent to the TCRP Manager or Synthesis Staff at any time (see address on back). You can submit your suggestions at <http://www4.trb.org/trb/synthrep.nsf>, under **Suggest a TCRP synthesis topic**. Topics suggested must be accompanied by a brief scope statement, including a discussion of the problem (a paragraph or two). A title (preferably 10 words or less) and the name and affiliation of the submitter are also necessary. Identification of information sources is appreciated. Suggestions for updates of published syntheses would also be appreciated. If a topic is not selected, the problem statement must be resubmitted the following year to be considered. Annually, synthesis topics are typically due by the end of March. The TCRP Oversight Panel for the project meets in May/June to select new topics based on funding available.

Interested in writing a synthesis? For details contact Donna L. Vlasak by e-mail at [dvlasak@nas.edu](mailto:dvlasak@nas.edu) or by phone at 202/334-2974 or Jon Williams at [jwilliams@nas.edu](mailto:jwilliams@nas.edu) or by phone at 202/334-3245.

information already exists, either in documented form or as undocumented experience and practice. This information may be fragmented, scattered, and unevaluated. As a consequence, full knowledge of what has been learned about a problem may not be brought to bear on its solution. Costly research findings may go unused, valuable experience may be overlooked, and due consideration may not be given to recommended practices for solving or alleviating the problem.

There is information on nearly every subject of concern to the transit industry. Much of it derives from research or from the work of practitioners faced with problems in their day-to-day work. To provide a systematic means for assembling and evaluating such useful information and to make it available to the entire transit community, the Transit Cooperative Research Program Oversight and Project Selection (TOPS) Committee authorized the Transportation Research Board to undertake a continuing study. This study, TCRP Project J-7, “Synthesis of Information Related to Transit Problems,” searches out and synthesizes useful knowledge from all available sources and prepares concise, documented reports on specific topics. Reports from this endeavor constitute a TCRP report series, *Synthesis of Transit Practice*.

## THE SYNTHESIS PROGRAM

This synthesis series reports on current knowledge and practice, in a compact format, without the detailed directions usually found in handbooks or design manuals. Each report in the series provides a

compendium of the best knowledge available on those measures found to be the most successful in resolving specific problems. To develop these syntheses in a comprehensive manner and to ensure inclusion of significant knowledge, TRB employs a consultant to gather and analyze available information from numerous sources, including a large number of transit agencies. A panel of experts in the subject area is established to guide the consultants in organizing and evaluating data collected on each topic and to review the synthesis report.

For each topic, the project objectives are (1) to locate and assemble documented information; (2) to learn what practice has been used for solving or alleviating problems; (3) to identify all ongoing research; (4) to learn what problems remain largely unsolved; and (5) to organize, evaluate, and document the useful information that is acquired.

Each synthesis is an immediately useful document that records practices that were acceptable within the limitations of the knowledge available at the time of its preparation. As the processes of advancement continue, new knowledge can be expected to be added to that which is now on hand; eventually the synthesis may need to be updated or redone. If you believe that a synthesis should be updated, it would be appreciated if you would contact TRB and let us know.

## Selection of Topics

TCRP Project Panel J-7 meets each year (typically in May) to select topics for study using funds from the upcoming fiscal year. The membership of

**Table 1** TCRP PROJECT PANEL J-7

	Name	Affiliation
Chair	Frank T. Martin	PBS&J, Tallahassee, FL
Member	Debra W. Alexander	Capital Area Transportation Authority, Lansing, MI
Member	Dwight Ferrell	Capital Metropolitan Transportation Authority, Austin, TX
Member	Mark W. Fuhrmann	Metro Transit, Minneapolis, MN
Member	Robert H. Irwin	Consultant, Victoria, BC, Canada
Member	Paul J. Larrousse	National Transit Institute, New Brunswick, NJ
Member	Wade Lawson	South Jersey Transportation Authority, Atlantic City, NJ
Member	David A. Lee	Connecticut Transit, Hartford, CT
Member	David Phelps	Consultant, Moneta, VA
Member	Hayward M. Seymore, III	Laidlaw Transit Services, Inc., University Place, WA
Member	Pam Ward	Ottumwa Transit Authority, Ottumwa, IA
Member	Joel R. Washington	Washington Metropolitan Area Transit Authority, Washington, D.C.
Liaison	Peter L. Shaw	Transportation Research Board, Washington, D.C.
Liaison	Karen Facen	Federal Transit Administration, Washington, D.C.

this committee is given in Table 1. Current funding allows for initiation of approximately six syntheses per year.

The following factors are considered in the selection process for synthesis topics:

- The problem should be widespread enough to generate broad interest in the synthesis.
- The topic should be timely and critical with respect to economic impact, safety, or social impact.
- The topic is appropriate if current practice is nonuniform or inconsistent from agency to agency, or if the validity of some practices appears to be questionable.
- The quality and quantity of useful available information should indicate a need to organize and compress that which has already been learned and written on the topic.
- The topic should not be one where ongoing research or other activities in progress might be expected to render the synthesis obsolete shortly after completion.

The continued success of this project depends on a constant supply of worthy synthesis topics solicited annually from a variety of sources, including transit officials, equipment and service suppliers, research organizations, FTA, APTA, and TRB committees. The interest of those who have recommended topics is sincerely appreciated, and they are urged to continue.

### Conduct of the Studies

Throughout the year, following the J-7 project panel’s selection of topics, studies are initiated in the order of priority assigned by the committee. A panel consisting of practitioners and researchers is formed for each topic. At its first meeting, this topic panel thoroughly discusses the topic, refines the tentative scope, suggests sources of information, and selects the consultant based on expression of interest received in response to an industry-wide solicitation.

Following this meeting, an agreement is negotiated with the consultant to gather information on the topic, synthesize it, and draft a report. Typically, the agreement covers a period of 6 months. Information gathering and preparation of the first draft of the synthesis report usually takes 4 months. This draft is then reviewed by the topic panel with the consultant, often at a second panel meeting. Subsequent drafts and a meeting are scheduled if needed, although this rarely occurs.

After the staff is substantially satisfied with the report, a final draft is sent to the members of the TCRP Project Panel J-7 for their approval. At the same time, members from the topic panel have their last chance to review the report. Comments from these reviews are incorporated into the final report, which is usually published as a TCRP Synthesis of Transit Practice.

### Studies in Progress as of January 2006

Work is currently under way on the topics listed in Table 2. Questions on these topics should be addressed to the Project Study Manager, Donna L. Vlasak (e-mail: [dvlasak@nas.edu](mailto:dvlasak@nas.edu) and 202/334-2974) or the Synthesis Studies Manager, Jon Williams (e-mail: [jwilliams@nas.edu](mailto:jwilliams@nas.edu) and 202/334-3245).

### Available Publications

The Syntheses of Transit Practice that have been completed under this project are listed in Table 3. Copies of these syntheses can be obtained from the Publications Office, Transportation Research Board, 500 Fifth Street, N.W., Washington, D.C., 20001; by calling 202/334-3213; and through the Internet at: <http://www.trb.org/trb/bookstore>. Please send check orders to: TRB, Lockbox 289, Washington, D.C., 20055 or fax to: 202/334-2519.

### Index of Topic Studies

Table 4 is a key word index of published syntheses and studies currently in progress.
