## National Academies Press

The National Academies Press was established in the early 1980s as the official publisher of the National Academy of Sciences, the National Academy of Engineering, the Institute of Medicine, and the National Research Council. NAP employs approximately 75 people and has 10 departments: Administration, Composition and Graphics, Design, Editorial, Digital Strategies, Fulfillment and Warehouse, Marketing, Printing, Production, and Reprographics.

The project that is the subject of this report was approved by the Governing Board of the National Research Council, whose members are drawn from the councils of the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. The members of the committee responsible for the report were chosen for their special competences and with regard for appropriate balance.

This study was supported by Contract No. DE-AT01-06NA26358, TO #16 between the National Academy of Sciences and the U.S. Department of Energy. Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the organizations or agencies that provided support for the project.

## COMMITTEE ON THE U.S. - CHINESE GLOSSARY OF NUCLEAR SECURITY TERMS

### CISAC GLOSSARY TEAM

#### *Chair*

**Ming-Shih Lu** Ph.D., Brookhaven National Laboratory (retired)

#### *Members*

**Richard L. Garwin** Ph.D., Thomas J. Watson Research  
Center, IBM Corporation (emeritus)

**Raymond Jeanloz** Ph.D., University of California, Berkeley

**Alastair Iain Johnston** Ph.D., Harvard University

**Alvin W. Trivelpiece** Ph.D., Oak Ridge National Laboratory (retired)

#### *Staff*

**Benjamin J. Rusek** Senior Program Associate, Committee on International  
Security and Arms Control

**Anne Harrington** Director, Committee on International Security and Arms  
Control

### CSGAC GLOSSARY TEAM

#### *Chair*

**Tian Dongfeng** Ph.D., China Academy of Engineering Physics

#### *Members*

**Hu Side** Member of the Chinese Academy of Engineering,  
China Academy of Engineering Physics

**Zhu Jiaheng** Beijing Institute of Applied Physics and Computational  
Mathematics

**Shi Jianbin** Beijing Institute of Applied Physics and Computational  
Mathematics

**Wu Jun** Ph.D., Beijing Institute of Applied Physics and  
Computational Mathematics

**Yu Xiaoling** Chinese Scientists Group on Arms Control

**He Yidan** Chinese Scientists Group on Arms Control

**Kang Chunmei** China Academy of Engineering Physics

**Sun Xiangli** Ph.D., Beijing Institute of Applied Physics and  
Computational Mathematics

**Tian Jingmei** Ph.D., Beijing Institute of Applied Physics and  
Computational Mathematics

# THE NATIONAL ACADEMIES

*Advisers to the Nation on Science, Engineering, and Medicine*

**The National Academy of Sciences** is a private, nonprofit, self-perpetuating society of distinguished scholars engaged in scientific and engineering research, dedicated to the furtherance of science and technology and to their use for the general welfare. Upon the authority of the charter granted to it by the Congress in 1863, the Academy has a mandate that requires it to advise the federal government on scientific and technical matters. Dr. Ralph J. Cicerone is president of the National Academy of Sciences.

**The National Academy of Engineering** was established in 1964, under the charter of the National Academy of Sciences, as a parallel organization of outstanding engineers. It is autonomous in its administration and in the selection of its members, sharing with the National Academy of Sciences the responsibility for advising the federal government. The National Academy of Engineering also sponsors engineering programs aimed at meeting national needs, encourages education and research, and recognizes the superior achievements of engineers. Dr. Charles M. Vest is president of the National Academy of Engineering.

**The Institute of Medicine** was established in 1970 by the National Academy of Sciences to secure the services of eminent members of appropriate professions in the examination of policy matters pertaining to the health of the public. The Institute acts under the responsibility given to the National Academy of Sciences by its congressional charter to be an adviser to the federal government and, upon its own initiative, to identify issues of medical care, research, and education. Dr. Harvey V. Fineberg is president of the Institute of Medicine.

**The National Research Council** was organized by the National Academy of Sciences in 1916 to associate the broad community of science and technology with the Academy's purposes of furthering knowledge and advising the federal government. Functioning in accordance with general policies determined by the Academy, the Council has become the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in providing services to the government, the public, and the scientific and engineering communities. The Council is administered jointly by both Academies and the Institute of Medicine. Dr. Ralph J. Cicerone and Dr. Charles M. Vest are chair and vice chair, respectively, of the National Research Council.

# THE CHINESE PEOPLE'S ASSOCIATION FOR PEACE AND DISARMAMENT

Founded in June 1985 by various concerned non-official organizations and prominent personages from all walks of life in China, the Chinese People's Association for Peace and Disarmament (CPAPD) is the largest nationwide non-governmental peace association with a total of 24 important member organizations.

The objectives of the CPAPD are to promote mutual understanding, friendship and cooperation between the peoples of China and the rest of the world in joint efforts to maintain world peace, oppose arms races and war, achieve arms control and disarmament, strive for the complete prohibition and thorough destruction of nuclear weapons and other weapons of mass destruction, protect ecological environment and promote economic development and social progress.

Having established a wide range of friendly contacts and ties abroad, the CPAPD undertakes cooperation and exchanges in various forms with more than 300 NGOs and research institutions in about 90 countries, which work for peace and conduct research in the fields of arms control, disarmament, global or regional security.

While actively engaged in research on such issues as arms control, disarmament, peace and security, the CPAPD sponsors or co-sponsors various academic seminars annually, sends scholars and experts to attend international conferences or seminars, and hosts visiting delegations from abroad.

The CPAPD has Consultative Status with the Economic and Social Council (ECOSOC) of the United Nations and is a member of the Conference of NGOs (CONGO) in Consultative Relationship with the United Nations.

## ACKNOWLEDGMENTS

The glossary committee members and staff have benefited greatly from the insights and observations of well-informed officials and scientific colleagues in the United States and China. The views that were obtained during these discussions were essential in providing a basis for the glossary. The committee expresses its gratitude for the time that these colleagues devoted to helping ensure that this glossary is as complete and accurate as possible.

The glossary has also benefited from previous work by a number of organizations, both U.S. and Chinese. In particular, we would like to acknowledge the Nuclear Threat Initiative and the Monterey Institute on International Studies for allowing us to access work they did in 2002 on a nuclear terms dictionary. We also would like to acknowledge the Editing Committee of the *National Defense Science and Technology Dictionary-Nuclear Energy Column*, the Editing Committee of the *Arms Control and Disarmament Handbook*, and the Editing Committee of the *Chinese Military Encyclopedia*. Many terms and definitions in the glossary are quoted from their achievements.

This glossary has been reviewed in draft form by individuals chosen for their diverse perspectives and technical expertise in accordance with procedures approved by the National Research Council's Report Review Committee and by the joint Review Committee organized by the Atomic Energy Press and the Chinese People's Association for Peace and Disarmament. The purpose of these independent reviews is to provide candid and critical comments that assist the institutions in making this published glossary as sound as possible and ensure that the glossary meets institutional standards for objectivity and accuracy. During the review, comments and the draft manuscript remained confidential to protect the integrity of the process. We wish to thank the following individuals for their review of this report:

### U.S. Reviewers

<b>Ping Lee</b>	National Security Technologies, LLC, Division Leader
<b>Stephanie Lieggi</b>	Monterey Institute of International Studies, Research Associate
<b>James Mulvenon</b>	Center for Intelligence Research and Analysis, Director, Defense Group Inc.
<b>Brad Roberts</b>	Institute for Defense Analysis, Research Staff
<b>Christopher Twomey</b>	Naval Postgraduate School, Assistant Professor and Associate Chair for Research
<b>Jing-dong Yuan</b>	Monterey Institute of International Studies, Director, East Asia Nonproliferation Program

## Chinese Reviewers

<b>Qian Shaojun</b>	Member of the Chinese Academy of Engineering, PLA General Armament Department, Senior Researcher
<b>Lü Min</b>	Member of the Chinese Academy of Sciences, Beijing Institute of System Engineering, Senior Researcher
<b>Song Jiashu</b>	Member of the Chinese Academy of Sciences, China Academy of Engineering Physics, Senior Researcher
<b>Zhu Xuhui</b>	China National Nuclear Industry Corporation, Senior Researcher
<b>Yan Shuheng</b>	China National Nuclear Industry Corporation, Senior Researcher
<b>Liu Gongliang</b>	Beijing Institute of Applied Physics and Computational Mathematics, Senior Researcher
<b>Niu Qiang</b>	Chinese People's Association for Peace and Disarmament, Secretary-general
<b>Duan Zhanyuan</b>	The Department of Defense, Senior Researcher
<b>Ouyang Liping</b>	China Institute of Contemporary International Relations, Senior Researcher
<b>Wei Guanggang</b>	Atomic Energy Press, Editor

Although the reviewers listed above have provided many constructive comments and suggestions, they were not asked to endorse the publication, nor did they see the final draft of the glossary before its release. The review of this report was overseen by R. Stephen Berry, the University of Chicago. Appointed by the National Academies, he was responsible for making certain that an independent examination of this publication was carried out in accordance with institutional procedures and that all review comments were carefully considered. Correspondingly, in China the review was finally supervised by Qian Shaojun, Member of the Chinese Academy of Engineering. He was elected by the review committee members and led the committee to examine and verify the terms thoroughly, especially the terms with definition. Responsibility for the final content of this report, including its objectivity and accuracy, rests entirely with the authoring committees and institutions.

## PREFACE

The Chinese Scientists Group on Arms Control (CSGAC) of the Chinese People's Association for Peace and Disarmament, and the Committee on International Security and Arms Control (CISAC) of the U.S. National Academy of Sciences have been meeting for almost 20 years to discuss nuclear arms control, nuclear nonproliferation, nuclear energy, and regional security issues, with the goal of reducing the possibility of nuclear weapons use and reducing nuclear proliferation in the world at large.

Throughout these rich exchanges, our discussions have benefited from the contribution of bilingual participants and the services of interpreters. Despite long-standing personal relationships and strongly shared interests between CSGAC and CISAC, it was often evident that beyond the never-simple translation of one language into the other, there was also the difficulty of differing interpretations of terms.

With substantial and growing international efforts in nonproliferation of nuclear weapons, counter-proliferation and the prevention of nuclear terrorism, and with the expansion of the use of nuclear power and the role of international inspections, it is important that participants whose respective native languages are Chinese and English agree on the meanings given to relevant terms in the two languages. In cases where they cannot agree, then it is important that they understand the usage in the other language, and be aware that a simple statement of the term may have alternative or ambiguous meanings.

In April 2006, CISAC and CSGAC considered a joint project to produce an unclassified glossary of nuclear security terms, and concluded that this was feasible and would be valuable. Accordingly, participants on the two sides formed working groups and developed a framework for the glossary, and CSGAC prepared an initial set of terms. The working group members used e-mail intensively during this development phase, and also held joint meetings in Beijing in September 2006 and again in March 2007. Following several more rounds of e-mail consultations, the text was reviewed in China and the United States by experts from both countries whose comments and clarifications are reflected in the final manuscript. CISAC and CSGAC finalized the list of terms, definitions, and references at a November 2007 joint working group meeting. We believe that the product of this project, a joint CISAC and CSGAC glossary,

will be a valuable resource to the government, academic, and security community.

This glossary of approximately 1000 terms is intended to reduce the likelihood of misunderstanding, and to remove barriers to progress in exchanges and diplomatic, cooperative, or other activities where unambiguous understanding is essential. For many of the terms, this is just a matter of translation because, in our review, we could readily agree on an appropriate translation of the term volunteered by one side or the other. Consequently, there was little likelihood of misunderstanding, and so the majority of the terms in this glossary are simply paired with the corresponding term in the other language.

Another category of terms required definition. It was clear that although there might be a single meaning in one language, there were several possible options that dealt with matters that were quite distinct in the other. For these terms, we have arrived at what we believe to be a common definition, which, in turn, we present in both languages.

A third category of terms is one in which there are different meanings even within a single language. That is, the same set of words is used in different contexts to describe different objects, actions or concepts. For these terms, although we have in many cases agreed on a single translation of the term, we felt it necessary to provide varying interpretations that might be encountered for example, in military or diplomatic circles.

Where possible, we have taken our definitions from reputable preexisting sources in authoritative texts or preexisting glossary compilations. We have given preference to international documents, then to official governmental documents, and then to organizations or references of some standing such as the National Academy of Sciences, the *Arms Control and Disarmament Handbook* (军备控制与裁军手册), the *National Defense Science and Technology Dictionary-Nuclear Energy* (国防科技名词大典——核能卷), and similar sources. We have published the work as a book in the conventional Chinese-English and English-Chinese format. In addition, we have published the same source material on the Internet in a more “user friendly” format at:

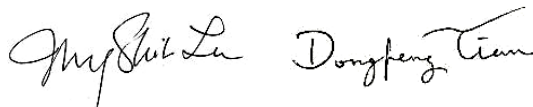

<http://www8.nationalacademies.org/webglossary> and at:

<http://www.cpapd.org.cn/webglossary>.

Because terminology continues to evolve, we expect that an expanded version of the physical book may be produced at some future point. It is our intent to update the on-line version routinely, as the scope of interaction increases and clarifications come to light. We have arranged to do this in a transparent fashion; on-line one can see the changes and updates as well as the original version.

The committees intend to formally review the list of terms approximately one year following publication and will make additions and corrections as needed at that time. The committees welcome comments on the glossary at: [cisac@nas.edu](mailto:cisac@nas.edu) and at: [css@iapcm.ac.cm](mailto:css@iapcm.ac.cm)

Finally, we would like to especially thank Dr. Richard Garwin of CISAC and Academician Hu Side of CSGAC for providing invaluable guidance during all phases of this project. We are very proud to have had their participation as the U.S. and Chinese committee leaders and technical guides for the preparation of this glossary.

# GLOSSARY ORGANIZATION AND CONTENT

## I Glossary Organization

This glossary is divided into English and Chinese sections. In the English section, terms are arranged in alphabetical order, while in the Chinese section, terms are arranged in the order of *Pinyin* (Chinese phonetic alphabet). Each page has two columns, one in English and one in Chinese. In the Chinese section of the glossary, the Chinese column is on the left, while the English column is on the right. In the English section, English is on the left and Chinese is on the right.

In the Chinese section, which is arranged in the order of *pinyin*, for those terms whose first characters' *pinyin* are the same, they will be arranged in the order of Chinese tones: high and level tone (the first tone, i.e. ā), rising tone (the second tone, i.e. á), falling-rising tone (the third tone, i.e. ǎ), and falling tone (the fourth tone, i.e. à). If the *pinyin* and the tones are all the same, terms will be arranged by the number and sequence of the strokes of the Chinese characters. If every aspect of the first character is the same, the rule applies to the consecutive characters of the term.

The English section is arranged in alphabetical order without regard to capitalization.

For convenience of reference, terms are also classified by category. There is a categorization index before the main glossary section. The first level indicates the broad category, the second level index indicates the subfield under the category, and the third level index indicates the specific term. In the Chinese section, the index is in Chinese, while in the English section, the index is in English. Numbers following the terms indicate the page location in the corresponding language section. For example:

### NUCLEAR ARMS

Nuclear Weapon

strategic nuclear weapon.....70

tactical nuclear weapon.....73

## II Glossary Content

The information provided in the glossary generally consists of the term in English, Chinese, and *pinyin* and for defined terms a definition, and/or source, note, or reference. The definitions for the selected terms are only given in English and Chinese, not *pinyin*. Other terms also include expanded information in both Chinese and English, depending on the need for clarification of use, sources, and other considerations.

### A Terms

Terms generally are words or phrases (with *pinyin* following the Chinese term). For example:

nuclear weapon                      核武器 【héwǔqì】

The use of parentheses - ( ) - in a term indicates that the words in parentheses can be used as 1. another way of expressing the term 2. notes related to the term or 3. an abbreviation. For example:

- 1 nuclear underground (or underwater) burst
- 2 DUPIC (Direct Use of Spent PWR fuel in CANDU reactors) process
- 3 command, control, communication and intelligence system (C3I)

A symbol like “/” in the term’s name means the word(s) before and after “/” have the same meaning. For example:

diversion strategy / diversion path

### B Pinyin

Every character in a term’s Chinese name is marked with its *pinyin* according to the standard Chinese pronunciation system. Chinese *pinyin* words are separated from each other by a blank space. For example:

战略核武器 【zhànlüè héwǔqì】

Characters in the neutral tone are only marked with their phonetic alphabets without tones. For example:

保障监督的质量保证 【bǎozhàng jiāndū de zhìliàng】

### 【bǎozhèng】

If a character in a term is not Chinese, it will be directly used in the term's *pinyin*. For example:

无源  $\gamma$  射线探测 【wúyuán  $\gamma$  shèxiàn tàncè】

Punctuation marks in terms' names are omitted in their *pinyin*.

For example:

发方/收方差额 【fāfāng shōufāng chā'é】

### **C Definitions and sources**

The name of the term is generally not repeated in its definition. The glossary provides at least one source for each defined term, but cites only the source passages containing the definition. If a term's definition is identical with that in the source, the definition will be noted as "From: "; if term's definition is modified using the source, it will be noted as "Modified from: ". If a term has two or more definitions, the glossary lists those definitions and sources separately.

The terms' definitions include a sequence number for the sources and the source page numbers where appropriate. With the sequence number, detailed information on the source can be found in the "References" section of the glossary.

### **D Notes**

If a term's content needs an additional explanation, the glossary adds "note". For example:

tag

.....

Note: An active tag requires electrical power, while a passive tag works without a power supply.

### **E Cross-reference**

If one term's content relates to others, the glossary adds "Refer to". For example:

core of atomic bomb

Refer to "pit"

### III References

This section contains detailed information on the sources quoted in the glossary. The references are listed in Chinese and English, are formatted for ease of comprehension in both English and Chinese and include the maximum amount of information available to assist the reader locate the original source. In general the references are ordered by author(s), title, and if available publication location, publisher, publication date, date of last on-line access, and on-line address. Additional information such as the edition, volume, or document number is included for some references. Since several references are cited more than once, references page numbers are included with the definition in the body of the glossary text.

### IV Other Information

The “*General List of Simplified Chinese Characters*” as published by the National Language Working Committee, October, 1986 serves as the standard for all Chinese characters in this glossary. The “*National Standard of People’s Republic of China*” GB/T 15834—1995 serves as the standard for all Chinese punctuation marks in the glossary. The “*National Standard of People’s Republic of China*” GB/T 15835—1995 serves as the standard for all numbers in the glossary. But all numbers have not been separated by commas. The “*National Standard of People’s Republic of China*” GB 3100~3102—93 serves as the standard for all Chinese units of measurement or science and technology marks in the glossary. The Chinese text of the glossary generally uses Arabic numerals, except for those numbers which are commonly expressed in Chinese numerals in China.

<b>absorbed dose</b>	吸收剂量【xīshōu jìliàng】
<b>absorption</b>	吸收【xīshōu】
<b>Accelerated Strategic Computing Initiative (ASCI)</b> Note: The program has been changed to Advanced Simulation and Computing Program (ASC). (From: Reference [37])	加速战略计算倡议【jiāsù zhànlüè jìsuàn chàngyi】 注：现已改为“先进模拟与计算计划”。(源自：参考文献[37])
<b>account balance</b>	账面平衡【zhàngmiàn pínghéng】
<b>accounting records</b>	核算记录【héngsuàn jìlù】
<b>acquisition strategy/acquisition path</b> A (hypothetical) scheme which a State could consider to acquire nuclear material usable for manufacturing a nuclear explosive device. (From: Reference [4], 3.8)	采办策略/采办途径【cǎibàn cèlüè cǎibàn tújīng】 某国谋取用于制造核爆炸装置的核材料的一种(设想)策略。(源自：参考文献[4], 3.8)
<b>active defense</b> Note 1: A term used to describe China's military strategy. It includes the following main elements: firstly, taking a firm stand of self-defense and gaining mastery by striking only after the enemy has struck; secondly, using active military preparations and political struggle to prevent war; thirdly, should war break out, using active counter-attack and offensive operations to achieve strategic defensive objectives. (Modified from: Reference [31], p124-125) Note 2: In the U.S., "active defense" is the employment of limited offensive action and counterattacks to deny a contested area or position to the enemy. (From: Reference [9], p4) Note 3: In the context of missile defense, "active defense" means the	积极防御【jījí fángyù】 注 1：用以描述中国军事战略的术语。它主要包括以下三方面的内容：一是坚持自卫立场和实行后发制人；二是以积极主动的军事准备和政治斗争防止战争；三是一旦战争爆发，以积极的反击和进攻作战达成战略防御目的。(改自：参考文献[31], p124-125) 注 2：在美国，“积极防御”指采取有限的攻击及反击以防止敌方占领竞争中的区域或地点。(源自：参考文献[9], p4) 注 3：在导弹防御领域，“积极防御”指拦截并摧毁导弹或其弹头；

interception and destruction of missiles or their warheads; “passive defense” is protection against the effects of the warheads primarily by the use of blast shelters, stockpiling of food, etc. (Modified from: Reference [62])	“消极防御”指主要通过使用爆炸掩体和食物存储等来抵御弹头的效用。(改自：参考文献[62])
<b>active neutron detection</b> A method of determining the existence of fissionable material through detecting the neutrons emitted from the fission that is induced by an external source. (From: Reference [1], p495)	有源中子探测 【yǒuyuán zhōngzǐ tàncè】 利用外源诱发裂变材料裂变，通过探测裂变发出的中子而证实裂变材料存在的方法。(源自：参考文献[1], p495)
<b>active nuclear stockpile</b>	现役核武库【xiànyì héwǔkù】
<b>active seal</b> Refer to “seal”	有源封记【yǒuyuán fēngjì】 参见“封记”
<b>active tag</b> Refer to “tag”	有源标签【yǒuyuán biāoqiān】 参见“标签”
<b>active warhead</b>	现役弹头【xiànyì dànóu】
<b>Ad Hoc Committee of Conference on Disarmament</b>	裁军谈判会议特设委员会【cáijūn tánpàn huìyì tèshè wéiyuánhùi】
<b>ad hoc inspection</b>	特别视察【tèbié shìchá】
<b>Additional Protocol</b>	附加议定书【fùjiā yìdìngshū】
<b>aftershock detection</b>	余震监测【yúzhèn jiāncè】
<b>Agreed Framework Between the United States of American and the Democratic People’s Republic of Korea</b>	美朝框架协议 【měi cháo kuàngjià xiéyì】
<b>agreement</b>	协定/协议【xiédìng xiéyì】
<b>Agreement Between the United States of America and the Union of Soviet Socialist Republics on the Establishment of Nuclear Risk Reduction Centers</b>	美苏关于建立减少核危险中心的协定 【měi sū guānyú jiànli jiǎnshǎo héwēixiǎn zhōngxīn de xiédìng】

<b>Agreement Between the United States of America and the Union of Soviet Socialist Republics on the Prevention of Nuclear War</b>	美苏关于防止核战争协定 【měi sū guānyú fángzhǐ hézhànzhēng xiédìng】
<b>Agreement on Measures to Reduce the Risk of Outbreak of Nuclear War Between the United States of America and the Union of Soviet Socialist Republics</b>	美苏关于减少爆发核战争危险的措施的协定 【měi sū guānyú jiǎnshǎo bàofā hézhànzhēng wēixiǎn de cuòshī de xiédìng】
<b>Agreement on the Privileges and Immunities of the IAEA</b>	国际原子能机构特权和豁免协定 【guóji yuánzǐnéng jīgòu tèquán hé huòmiǎn xiédìng】
<b>alarm system for physical protection</b>	实体(实物)保护报警系统 【shítǐ shíwù bǎohù bàojǐng xìtǒng】
<b>alert rate of nuclear missiles</b> The percentage of those missiles that are on various stages of alert and can launch in stipulated preparatory times in relation to the entire arsenal of deployed missiles. (Modified from: Reference [2], p49)	核导弹的戒备率 【hédǎodàn de jièbèilǜ】 处于各种戒备状态并能在规定发射准备时间内实施作战发射的导弹数占部署导弹总数的百分比。(改自: 参考文献[2], p49)
<b>ammonium diuranate</b>	重铀酸铵【zhòngyóusuān'ān】
<b>announcement</b>	公告【gōnggào】
<b>annual dose</b>	年(辐照)剂量【nián fúzhào jìliàng】
<b>annual throughput</b>	年通过量【nián tōngguòliàng】
<b>anti-ballistic-missile missile</b>	反弹道导弹的导弹 【fǎndàodǎodǎodàn de dǎodàn】
<b>anti-coercion alarm</b> Also called anti-hijack alarm. The concealed warning device provided for guards on duty or on patrol. (Modified from: Reference [2], p91)	反胁迫报警【fǎnxiépò bàojǐng】 又称反劫持报警。给值班、巡逻人员配备的隐蔽报警装置。(改自: 参考文献[2], p91)
<b>aquafluor process</b>	水氟化流程【shuǐfúhuà liúchéng】

<b>aqueous reprocessing</b>	水法后处理【shuǐfǎ hòuchǔlǐ】
<b>area target</b>	面目标【miàn mùbiāo】
<b>arming nuclear weapon</b>	核武器解保【héwǔqì jiěbǎo】
<b>arms control</b>	军备控制【jūnbèi kòngzhì】
<b>arms race stability</b>	军备竞赛稳定性 【jūnbèi jìngsài wěndìngxìng】
<b>artificial radionuclide</b>	人工放射性核素 【réngōng fàngshèxìng hésù】
<b>ASEAN (Association of Southeast Asian Nations) Regional Forum</b>	东盟地区论坛 【dōngméng dìqū lùntán】
<b>assassin's mace</b> A type of metal weapon. Chinese classical novels describe the means of throwing the mace at the adversary unexpectedly in order to win during fighting. It is a metaphor for an adept ability or unique skill used at a critical moment. (Modified from: Reference [36])	杀手锏【shāshǒujiǎn】 锏是一种由金属制成的冷兵器。在中国古典小说中指与敌厮杀时出其不意地用锏投掷敌手、以求取胜的招数。喻指在关键时刻使出的最拿手的本领或称绝招。(改自：参考文献[36])
<b>asymmetric warfare</b> A war in which either side employs a different weapon, tactic or strategy. "All strategy works on asymmetries, so asymmetric warfare is representative of all rationally executed warfare." (From: Reference [55], p102-108)	非对称战争【fēiduìchèn zhànzhēng】 任何一方使用了不同的武器、战术或战略的战争。“所有战略都基于非对称性原则进行谋划和实施，因此理性运筹的战争都具有非对称性特征。”(源自：参考文献[55], p102-108)
<b>atmospheric nuclear test</b>	大气层核试验【dàqìcéng hékǐyàn】
<b>atmospheric-pressure fuze of nuclear weapon</b>	核武器气压引信【héwǔqì qìyā yǐnxìn】
<b>atomic bomb</b>	原子弹【yuánzǐdàn】
<b>Atomic Energy Commission</b>	原子能委员会 【yuánzǐnéng wěiyuánhùi】

<b>atomic mass</b>	原子量【yuánzǐliàng】
<b>atomic nucleus</b>	原子核【yuánzǐhé】
<b>atomic number</b>	原子序数【yuánzǐ xùshù】
<b>atomic-vapor laser isotope separation</b>	原子蒸气激光同位素分离法 【yuánzǐ zhēngqì jīguāng tóngwèisù fēnlífǎ】
<b>attribute approach</b> Identifies treaty-limited objects by measuring certain characteristics of an object that should be displayed by all items of a given general type. (Modified from: Reference [11], p104)	属性法【shǔxìngfǎ】 通过测量物项的某些特征来识别条约限定物项的方法。这些特征为某特定类型的所有物项所具备。(改自：参考文献[11]，p104)
<b>attributes test</b> A statistical test of a characteristic (or attribute) of an item to which the response is either “yes” or “no”. (From: Reference [4], 10.30)	属性检验【shǔxìng jiǎnyàn】 判断一个物项的某项特征(或属性)为“是”或“否”的统计试验。(源自：参考文献[4]，10.30)
<b>authentication</b>	真实性验证 【zhēnshíxìng yànzhèng】
<b>ballistic-missile early warning system</b>	弹道导弹预警系统 【dàndàodǎodàn yùjǐng xìtǒng】
<b>ballistic-missile submarine</b>	弹道导弹潜艇 【dàndàodǎodàn qián tíng】
<b>ban</b>	禁止【jìnzhǐ】
<b>baseline data inspection</b>	基准数据视察【jīzhǔn shùjù shìchá】
<b>baseline exhibition for non-nuclear heavy bombers</b>	非核重型轰炸机基线展示 【fēihé zhòngxíng hōngzhàjī jīxiàn zhǎnshì】
<b>batch data</b>	批数据【pīshùjù】
<b>beginning inventory of nuclear material</b> The amount of nuclear material at the beginning of a balancing period. It should be equal to the inventory at the	核材料初期存量 【hécáiliào chūqī cúnliàng】 某一衡算周期开始时所拥有的材料量。初始实物存量应等于前次材料衡算周期中核材料的末期存量。(源

end of the last material balancing period. (From: Reference [2], p186)	自: 参考文献[2], p186)
<b>bilateral cooperation agreement</b>	双边合作协定 【shuāngbiān hézuò xiédìng】
<b>binding energy</b>	结合能【jiéhé'néng】
<b>boiling water reactor (BWR)</b>	沸水堆【fèishuǐduī】
<b>book inventory of a material balance area</b>	材料平衡区的账面存量 【cáiliào pínghéngqū de zhàngmiàn cúnliàng】
<b>boosted atomic bomb</b>	助爆型原子弹 【zhùbàoxíng yuánzǐdàn】
<b>burnup</b>	燃耗【ránhào】
<b>calibration</b>	校准【jiàozhǔn】
<b>canned subassembly (CSA)</b> The secondary assembly in a nuclear weapon containing both fusion fuel and in most cases uranium (some or all of which may be HEU). (From: Reference [11], p90) Note: In America, the subassembly that is to be incorporated into the final weapon is called a “canned subassembly”	罐装组件【guànzhuāng zǔjiàn】 核武器的次级装置，其内包含聚变燃料和(大多数情况下)钍装料(可能部分或全部是高浓钍)。(源自: 参考文献[11], p90) 注: 在美国, 要装入最终武器的部件被称为“罐装组件”。
<b>capability of destroying hardened target</b>	毁伤硬目标能力 【huǐshāng yìngmùbiāo nénglì】
<b>capability of destroying soft target</b>	毁伤软目标能力 【huǐshāng ruǎnmùbiāo nénglì】
<b>cascade</b>	级联【jīlián】
<b>centrifuge damping device</b>	离心机阻尼装置 【líxīnjī zǎnī zhuāngzhì】
<b>centrifuge failure rate</b>	离心机失效率【líxīnjī shīxiàolǜ】
<b>centrifuge rotor dynamics</b>	离心机转子动力学 【líxīnjī zhuǎnzǐ dònglixué】

<b>centrifuge rotor material</b>	离心机转子材料 【lǐxīnjī zhuǎnzǐ cáiliào】
<b>centrifuge separation plant</b>	离心分离工厂【lǐxīn fēnlí gōngchǎng】
<b>chain reaction</b>	链式反应【liànshì fǎnyìng】
<b>charter</b>	宪章【xiànzhāng】
<b>China's nonproliferation export control system</b> China's comprehensive export control system regarding various nuclear, biological, chemical and missile-related sensitive items, technology and all military goods. (From: Reference [38])	中国防扩散出口管制体系 【zhōngguó fángkuòsàn chūkǒu guǎnzhì tǐxì】 中国关于核、生物、化学和导弹等各类敏感物项和技术及所有军品的全面的出口控制体制。(源自: 参考文献[38])
<b>circular error probable (CEP)</b> For repeated trials, the radius of a circle enclosing half of the impacts of a projectile, missile, or bomb. (Modified from: Reference [9])	圆概率偏差【yuán gàilǜ piānchā】 对于射弹、导弹或炸弹而言, 其圆概率偏差是指, 在反复试验中, 包含其半数弹着点的圆形区域的半径。(改自: 参考文献[9])
<b>classical super design</b>	经典超级模型 【jīngdiǎn chāojí móxíng】
<b>classification of reactor</b>	反应堆分类【fǎnyìngduī fēnlèi】
<b>clean hydrogen bomb</b>	干净氢弹【gānjìng qīngdàn】
<b>close-out inspection</b>	设施关闭视察 【shèshī guānbì shìchá】
<b>closed-down facility/closed-down location outside facilities</b>	已关闭设施/已关闭的设施外场所 【yǐguānbì shèshī yǐguānbì de shèshīwài chǎngsuǒ】
<b>closed nuclear fuel cycle</b> There are two common types of nuclear fuel cycle. One is the "open" fuel cycle, in which the spent fuel is not reprocessed but kept in storage pending eventual disposal as waste. The other is the "closed" fuel cycle, where the spent fuel is reprocessed and the uranium and plutonium separated from the fission	闭式核燃料循环 【bìshì héránliào xúnhuán】 核燃料循环通常有两种类型。一种是“开式”燃料循环, 即乏燃料不经过后处理, 在最终处置前以废料形式储存。另一种是“闭式”燃料循环, 即乏燃料经过后处理从裂变产物中分离出铀和钚。铀和钚都可

products. Both the uranium and the plutonium can be recycled into new fuel elements. (From: Reference [14], p1-2)	作为新的燃料元件循环使用。(源自: 参考文献[14], p1-2)
<b>cobalt bomb</b> Refer to “induced-radioactivity bomb”	钴弹【gǔdàn】 参见“感生放射性弹”
<b>cold war</b>	冷战【lěngzhàn】
<b>collective radiation dose</b>	集体辐照剂量【jítǐ fúzhào jiliàng】
<b>collective security</b> An approach to prevent and curb aggression and maintain security for countries through the organized collective action of multiple countries. (From: Reference [1], p23)	集体安全【jítǐ ānquán】 多国通过有组织的集体行动来预防和制止侵略, 保护各国安全的一种方式。(源自: 参考文献[1], p23)
<b>command, control, communication and intelligence system (C3I)</b>	指挥、控制、通信和情报系统(C3I 系统) 【zhǐhuī kòngzhì tōngxìn hé qíngbào xìtǒng C3I xìtǒng】
<b>command, control, communications, computing and intelligence (C4I)</b>	指挥、控制、通信、计算和情报系统(C4I 系统) 【zhǐhuī kòngzhì tōngxìn jìsuàn hé qíngbào xìtǒng C4I xìtǒng】
<b>Committee on Disarmament</b>	裁军谈判委员会 【cáijūn tánpàn wěiyuánhui】
<b>common security</b> A security concept that originated in Europe during the Cold War era. In 1982, the Independent Commission on Disarmament and Security Issues chaired by Swedish prime minister Olof Palme published a report entitled “Common Security: A Blueprint for Existence”, which for the first time put forward this concept. The report pointed out that common security is based on the following concept: the best guarantee for security is obtained through cooperation in improving	共同安全【gòngtóng ānquán】 冷战时期欧洲形成的一种安全概念。1982年, 瑞典首相帕尔梅主持的“裁军和安全问题独立委员会”的报告《共同安全: 生存蓝图》中首次提出。该报告认为, 共同安全是基于这样一种认识, 即安全的最佳保证是通过双边或多边的增强安全合作而非通过相互竞争的强权政治来获得。(源自: 参考文献[1], p23)

<p>security for both or all parties rather than through competitive power politics.(From: Reference [1], p23)</p>	
<p><b>communication system for physical protection</b></p>	<p>实体保护通信系统 【shí tǐ bǎo hù tōng xìn xì tǒng】</p>
<p><b>communicue</b></p>	<p>公报【gōng bào】</p>
<p><b>compellence</b>                  The use of the threat of force to compel a desired action by one's adversary.                  (From: Reference [23])                   Note: compellence refers to efforts to stop an action already underway whereas deterrence refers to efforts to prevent future action. (From: Reference [39])                   Derived from: "Compellence... usually involves initiating an action (or an irrevocable commitment to action) that can cease, or become harmless, only if the opponent responds." (From: Reference [23])</p>	<p>威逼【wēi bī】                  威胁使用武力以迫使敌手采取己方期望的行动。(源自：参考文献[23])                   注：威逼致力于终止已发生的行为而威慑致力于防止未发生的行动。                  (源自：参考文献[39])                   衍生：威逼，通常包括发起(威胁性)的行动(或诉诸行动的不可更改的决心)，只有在对手作出(妥协性的)反应后才能终止或变得无害。(源自：参考文献[23])</p>
<p><b>complex (diffusion) barrier</b>                  A kind of (isotope) separation barrier composed of multiple layers of compactly overlapped porous barriers with different structure. (From: Reference [2], p81)</p>	<p>多层分离膜/复合分离膜 【duō céng fēn lí mó fù hé fēn lí mó】                  由多层不同结构的多孔膜紧密叠合组成的分离膜。(源自：参考文献[2], p81)</p>
<p><b>composite sample</b></p>	<p>混合样品【hùn hé yàng pǐn】</p>
<p><b>comprehensive (full scope) safeguards agreement (CSA)</b></p>	<p>全面保障监督协定 【quán miàn bǎo zhàng jiān dū xié dìng】</p>
<p><b>comprehensive national power</b></p>	<p>综合国力【zōng hé guó lì】</p>
<p><b>Comprehensive Test Ban Treaty (CTBT)</b></p>	<p>全面禁止核试验条约 【quán miàn jìn zhǐ hé shì yàn tiáoyuē】</p>
<p><b>compressor for gaseous diffusion separation</b></p>	<p>气体扩散分离压缩机 【qì tǐ kuò sǎn fēn lí yā suō jī】</p>

<b>computer simulation of a nuclear explosion</b>	核爆炸的计算机模拟 【hébàozhà de jìsuànjī mómǐ】
<b>concert of powers</b>	大国协调【dàguó xiétiáo】
<b>Conference of the Committee on Disarmament (CCD)</b>	裁军委员会会议 【cáijūn wéiyuánhui huìyì】
<b>Conference on Disarmament (CD)</b>	裁军谈判会议 【cáijūn tánpàn huìyì】
<b>Confidence and Security Building Measures (CSBMs)</b>	建立信任与安全措施 【jiànlì xìnren yǔ ānquán cuòshī】
<b>configuration of hydrogen bomb</b>	氢弹构形【qīngdàn gòuxíng】
<b>contact fuze of nuclear weapon</b>	核武器触发引信 【héwǔqì chūfā yǐnxìn】
<b>containment of nuclear material</b>	核材料封隔【hécailiào fēnggé】
<b>containment strategy</b> Refers to the foreign policy strategy of the United States during the Cold War in which it attempted to stop the expansion of the Soviet Union and to prevent nations moving politically towards communism led by the Soviet Union. (Modified from: Reference [40])	遏制战略【èzhì zhànlüè】 美国在冷战初期试图阻止苏联的扩张和防止一些国家在政治上走向苏联领导的共产主义的外交政策战略。(改自: 参考文献[40])
<b>continental shelf</b>	大陆架【dàlùjià】
<b>continuous inspection</b> An inspection regime intended to maintain continuity of knowledge concerning inventory and flow of nuclear material by witnessing key operations, recording measurement and operating data, and verifying the information in order to meet the safeguards objectives. (From: Reference [4], 11.12)	连续视察【liánxù shìchá】 为达到保障监督目的, 通过察看关键操作、记录测量和运行的数据并核实这些信息, 借以持续地掌握材料的库存清单和流向情况的视察机制。(源自: 参考文献[4], 11.12)
<b>control center for physical protection</b>	实体保护控制中心 【shíthǐ bǎohù kòngzhì zhōngxīn】

<b>control sample</b>	对照样品【duìzhào yàngpǐn】
<b>convention</b>	公约【gōngyuē】
<b>Convention on Physical Protection for Nuclear Material</b> The convention signed to promote the peaceful purpose of developing and using nuclear energy among every Nuclear Nonproliferation Treaty State Party, to strengthen the protection of nuclear material usage, storage and transportation, and to prevent the possible dangers caused by illegally obtaining and using nuclear material. It was signed on 3 March, 1980. In July 2005, the amended version of the convention that aims to further strengthen the protection of nuclear material and facilities was adopted and the new convention was signed. The new convention accepted the amendment submitted by China which declared its support for the effort of the international community to strengthen the protection of nuclear facilities, and opposed any form of force or threat of force to any States' peaceful nuclear facility. It also prescribes for the first time that any State Party should further strengthen international cooperation on protecting the safety of nuclear material and preventing nuclear terrorism. (From: Reference[52])	核材料实体(物)保护公约【hécáiliào shíwù bǎohù gōngyuē】 该公约以促进《不扩散核武器条约》的各缔约国和平发展和利用核能为目的，并加强各国对核材料使用、储存和运输的保护，防止核材料的非法获取及使用而可能造成的危险。公约于1980年3月签署。2005年7月通过了旨在进一步加强核设施与核材料保护的公约修订案并签署了新公约。新公约采纳了中国提交的支持国际社会加强对核设施保护的、反对以任何形式对其他国家和平核设施动用武力或进行武力威胁的修订案。新公约还首次明确规定，缔约国要在保护核材料安全、防范核恐怖主义方面进一步加强国际合作。(源自：参考文献[52])
<b>conversion inspection</b>	转化视察【zhuǎnhuà shìchá】
<b>conversion of uranium hexafluoride</b>	六氟化铀转化【liùfúhuàyóu zhuǎnhuà】
<b>conversion of uranium product</b>	铀产品的转化【yóuchǎnpǐn de zhuǎnhuà】

<p><b>conversion plant</b></p>	<p>转化厂【zhuǎnhuàchǎng】</p>
<p><b>conversion time</b>                  The time required to convert different forms of nuclear material to the metallic components of a nuclear explosive device. (From: Reference [4], 3.13)</p>	<p>转化时间【zhuǎnhuà shíjiān】                  将不同形式的核材料转化成核爆炸装置金属部件所需要的时间。(源自:参考文献[4], 3.13)</p>
<p><b>conversion time of nuclear material</b></p>	<p>核材料转化时间【hécáiliào zhuǎnhuà shíjiān】</p>
<p><b>cooling of spent fuel</b></p>	<p>乏燃料的冷却【fá ránliào de lěngquè】</p>
<p><b>cooperation protocol</b></p>	<p>合作议定书【hézuò yìdìngshū】</p>
<p><b>cooperative security</b>                  A new security approach that evolved after the end of the Cold War, “which emphasizes reassurance rather than deterrence; it is inclusive rather than exclusive; favours multilateralism over unilateralism or bilateralism; does not rank military solutions over non-military ones; assumes that states are the principal actors in the security system but accepts that non-state actors have an important role to play; does not particularly emphasize the creation of formal security institutions, but does not reject them either; and which, above all, stresses the value of creating habits of dialogue.” (From: Reference [65])</p>	<p>合作安全【hézuò ānquán】                  冷战后形成的一种新的安全途径，“它强调安全保证，而不是威慑；它是包容性的，而不是排斥性的；它注重多边主义而不是单边或双边主义；它不认为军事手段高于非军事手段；它认为国家是安全体系里的主要行为体，但也接受非国家行为体能发挥重要作用；它不特别强调，但也不拒绝建立正式的安全机构；最重要的是，它强调建立对话习惯的重要性。”(源自:参考文献[65])</p>
<p><b>Cooperative Threat Reduction Program/Nunn-Lugar Program</b>                  The November 1991 legislation that provides the Department of Defense (DOD) with the authority to fund assistance to the eligible states of the former Soviet Union to dismantle and</p>	<p>合作减少威胁计划/纳恩-卢格计划【hézuò jiǎnshǎo wēixié jìhuà nà'ēn lúgé jìhuà】                  由美国国会于1991年11月通过。该立法授权国防部为符合条件的前苏联国家拆除和销毁大规模杀伤性</p>

<p>destroy weapons of mass destruction; to strengthen the security of nuclear weapons and fissile materials in connection with dismantlement; to prevent proliferation; and to help demilitarize the industrial and scientific infrastructure in the Newly Independent States (NIS) which has supported weapons of mass destruction. Since 1996, the Department of State and Department of Energy have assumed responsibility respectively for redirection of weapons expertise and export controls (State) and nuclear material control and accountability (DOE) program activities. (Modified from: Reference [50])</p>	<p>武器提供资金援助，加强拆卸过程中核武器和裂变材料的安全，防止扩散，帮助独联体国家(NIS)把大规模杀伤性武器的工业和科技基础设施转化为非军事目的。从 1996 年起，美国国务院负责武器专家的转行和出口控制，能源部负责核材料的控制和衡算。(改自：参考文献[50])</p>

<p><b>fission yield</b></p>	<p>裂变产额/裂变威力                  【lièbiàn chǎn'é lièbiàn wēilì】</p>
<p><b>fissionable material</b>                  In general, an isotope or a mixture of isotopes capable of nuclear fission. Some fissionable materials are capable of fission only by sufficiently fast neutrons (e.g. neutrons of a kinetic energy above 1 MeV). Isotopes that undergo fission by neutrons of all energies, including slow (thermal) neutrons, are usually referred to as fissile materials or fissile isotopes. For example, isotopes U-233, U-235, Pu-239 and Pu-241 are referred to as both fissionable and fissile, while U-236 and Pu-240 are fissionable but not fissile. (From: Reference[4], 4.6)</p>	<p>可裂变材料【kělièbiàn cáiliào】                  一般而言，指能产生核裂变的一种同位素或同位素混合物。有些可裂变材料只有在足够快的中子(如动能超过 1 MeV 的中子)作用下才能发生裂变。在所有能量的中子包括慢(热)中子作用下都可以发生裂变的同位素通常称之为易裂变材料或易裂变同位素。例如，同位素 铀-233，铀-235，钚-239，钚-241 既被称为可裂变材料又被称为易裂变材料，而铀-236 和钚-240 仅被称为可裂变材料而不是易裂变材料。(源自：参考文献[4]，4.6)</p>
<p><b>Five Principles of Peaceful Coexistence</b>                  The Five Principles are: mutual respect</p>	<p>和平共处五项原则                  【héping gòngchǔ wǔxiàng yuánzé】                  和平共处五项原则，即相互尊重主</p>

<p>for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit, and peaceful coexistence. In negotiation with an Indian delegation the Five Principles were set forth by Premier Zhou Enlai, and subsequently included in the joint communique issued by Premier Zhou Enlai and Prime Minister Jawaharlal Nehru, in June 1954. Since that time the principles have been adopted in many other international documents. (Modified from: Reference[53])</p>	<p>权和领土完整、互不侵犯、互不干涉内政、平等互利、和平共处。这五项原则由周恩来总理在与印度代表团谈判时提出，并于1954年6月首次被写入周恩来总理与贾瓦哈·尼赫鲁总理签署的联合公报中，此后被众多国际性文件所采用并成为公认的指导国际关系的准则。(源自：参考文献[53])</p>

<p><b>Guidelines for the Management of Plutonium</b></p> <p>The Guidelines adopted by nine states (the five nuclear weapon states and Germany, Japan, Belgium and Switzerland) in 1997, with a view to ensuring that holdings of plutonium are managed safely and effectively in accordance with international commitments, including their obligations under the NPT (and, for states that are members of the European Community, also under the Euratom Treaty), and with their safeguards agreements with the IAEA. The Guidelines describe, inter alia, the nuclear material accountancy system, physical protection measures and international transfer procedures applicable to the plutonium subject to the Guidelines. They further specify the information to be published by the participating States in respect of plutonium management, including annual statements of their holdings of civil unirradiated plutonium and of their estimates of plutonium contained in spent civil reactor fuel. (From: Reference [1], p409; [4], 1.30)</p>	<p><b>钚管理指导原则【bù guǎnlǐ zhǐdǎo yuánzé】</b></p> <p>该指导原则由五个核武器国家和德国、日本、比利时、瑞士等九国于1997年通过，它着眼于按照国际约定(包括它们在NPT下的义务，欧共体成员国还有欧洲原子能联营条约下的义务)和IAEA的保障监督协定确保对持有的钚进行安全有效的管理。该指导原则描述了在接受该指导原则下适用于钚的核材料衡算体制、实体保护措施和国际运输手续。它还进一步指定了参与国要发布的有关钚管理的信息，包括他们所持有的民用未辐照钚和民用反应堆乏燃料中含有的钚估量的年度申报。(源自：参考文献[1]，p409；[4]，1.30)</p>

<b>Missile Technology Control Regime (MTCR)</b> The MTCR was originally established in 1987 by western countries. It is a regime that aims to restrict the proliferation of systems (except manned air vehicles), equipments and technologies intended for the delivery of weapons of mass destruction (WMD). The MTCR includes the Guidelines and the Equipment and Technology Annex, and it divides controlled items (missiles along with their subsystems and components, production equipments and related technologies) into two	导弹技术控制制度 【dǎodàn jìshù kòngzhì zhìdù】 美国等西方国家 1987 年制定的, 旨在防止用于运载大规模杀伤性武器的投掷系统(有人驾驶飞机除外)及有关设备和技术扩散的控制制度。该制度由“准则”和“设备与技术附件”两个文件组成, 把限制项目(导弹、分系统、部件, 生产设施和有关技术)分成两大类。第一类项目为“最敏感项目”, 一般不得转让。第二类项目为军民两用项目, 出口

<p>category. Category I items are the most sensitive items, commonly the transfer of them will not be authorized. Category II items are dual-use items, which should be examined and approved case-by-case subject to export license, and be guaranteed not to be used in projects including Category I items. In 1993, member states modified the Guidelines. “Control the transfer of nuclear weapons delivery systems”, in the original version was modified to “control the transfer of weapons of mass destruction (nuclear, biological, chemical weapon) delivery systems”. Up to the end of 2007, the Regime has 34 member states. (Modified from: Reference [1], p410)</p>	<p>时要以许可证方式逐件审批，保证不用于包含第一类项目的系统。1993年成员国对“准则”进行了修改，把原版中控制“核武器运载系统”的转让改成控制“大规模杀伤性武器(即核、生、化武器)运载系统”的转让。截至2007年底，该制度有34个成员国。(改自：参考文献[1]，p410)</p>
<p><b>misuse</b></p>	<p>滥用【làngòng】</p>
<p><b>mixed oxide (MOX)</b></p>	<p>混合氧化物【hùnhé yǎnghuàwù】</p>
<p><b>mobile missile</b></p>	<p>机动导弹【jīdòng dǎodàn】</p>

<p><b>molten salt electrorefining process</b></p>	<p>熔盐电解精炼流程 【róngyán diànjiě jīngliàn liúchéng】</p>
<p><b>monitoring</b> The means by which information is obtained for verification purposes. (From: Reference [16])</p>	<p>监测【jiāncè】 为核查获取信息的途径。(源自：参考文献[16])</p>
<p><b>moratorium on nuclear testing</b></p>	<p>暂停核试验【zàntíng héshìyàn】</p>
<p><b>multi-fissile body subcritical safety experiment</b></p>	<p>多裂变体次临界安全实验 【duōlièbiàntǐ cìlínjiè ānquán shíyàn】</p>
<p><b>multiple independently targetable reentry vehicle (MIRV)</b></p>	<p>分导式多弹头【fēndǎoshì duōdàntóu】</p>

<b>multiplicity of technical protection system</b>	技术防护系统的多重性 【jìshù fánghù xìtǒng de duōchóngxìng】
<b>National Ignition Facility (NIF)</b>	国家点火装置 【guójiā diǎnhuǒ zhuāngzhì】
<b>national interest</b>	国家利益【guójiā lìyì】
<b>national military strategy</b> The deployment and application of military power to attain national security strategy and national defense strategy objectives. (Modified from: Reference [9], p365)	国家军事战略【guójiā jūnshì zhànlüè】 分配和运用军事力量以实现国家安全战略和国防战略目标。(改自: 参考文献[9], p365)
<b>national security strategy</b> Development, application, and coordination of the instruments of national power to achieve objectives that contribute to national security. In the U.S., it is a formal U.S. government document. (Modified from: Reference [9], p 367)	国家安全战略 【guójiā ānquán zhànlüè】 发展、运用和协调各种国家力量手段以实现有助于维护国家安全的目标。在美国, 这是一个正式的官方文件。(改自: 参考文献[9], p367)
<b>national strategy</b>	国家战略【guójiā zhànlüè】
<b>national technical means (NTMs)</b> 1 Verification and monitoring technologies or measures owned by a country alone, and information thus collected will be used by itself. NTM is usually used to obtain information or intelligence on relevant activities conducted by other countries. It may also be used for understanding and verifying compliance with treaties or agreements related to arms control by other treaty signatories. (Modified from: Reference [1], p472) 2 NTM refers to nationally owned instruments for surveying a party's compliance with agreement obligations, without intruding onto its territory,	国家技术手段 【guójiā jìshù shǒuduàn】 1 一个国家单方面拥有的核查和监测技术或措施, 所获信息独家享用, 常用于获取其他国家的相关活动的信息或情报。有时, 也可用于军备控制条约或协议, 以了解和核查其他参约方的履约情况。(改自: 参考文献[1], p472) 2 在未侵入协议方领土、领空、领海的前提下, 国家拥有的用于核查其他协议方是否履约的手段。来自

airspace or national waters. Information derived from NTM may be used in international verification regimes by a treaty party to question another party's compliance. (From: Reference [19], p198)	NTM 的信息可用于国际核查制度, 由条约缔约国向另一方质疑是否履约。(源自: 参考文献[19], p198)
<b>natural radionuclides</b>	天然放射性核素 【tiānrán fāngshèxìng hé sù】
<b>natural uranium</b>	天然铀【tiānrányóu】
<b>naval reactor</b>	海军用反应堆 【hǎijūnyòng fǎnyīngduī】
<b>near-field physical diagnostic</b> To judge nuclear weapons' performance parameters by directly measuring neutrons, $\gamma$ -rays, and X-rays released from the nuclear reactions. (Modified from: Reference [3], p391)	近区物理诊断【jìnqū wùlǐ zhěnduàn】 直接测量核爆炸过程中伴随着核反应放出的中子、 $\gamma$ 射线、X射线, 以判断核武器性能参数。(改自: 参考文献[3], p391)
<b>neutron bomb/enhanced radiation weapon</b> A low-yield hydrogen bomb with a special design utilizing high-energy neutrons as its main destructive element and relatively reducing its shock wave and thermal radiation effects. In a more accurate sense, it is called an "enhanced radiation weapon". (Modified from: Reference [1], p152)	中子弹/增强辐射武器 【zhōngzǐdàn zēngqiáng fúshèwǔqì】 以高能中子为主要毁伤因素, 相对减弱冲击波和光辐射效应的一种特殊设计的低威力氢弹。其较确切的名称是增强辐射武器。(改自: 参考文献[1], p152)
<b>neutron generator used in nuclear weapon</b>	核武器用中子发生器 【héwǔqiyòng zhōngzǐ fāshēngqì】
<b>neutrons</b>	中子【zhōngzǐ】
<b>new facility inspection</b>	新设施视察【xīn shèshī shìchá】
<b>new international economic order</b>	国际经济新秩序 【guójì jīngjì xīnzhìxù】
<b>new international political order</b>	国际政治新秩序 【guójì zhèngzhì xīnzhìxù】
<b>new strategic triad</b>	新战略三位一体 【xīn zhànlüè sānwèiyītǐ】

<p>A new U.S. military strategy revealed in the 2002 Nuclear Posture Review, consisting of nuclear and non-nuclear strike forces; passive and active defenses; and a revitalized defense infrastructure. (From: Reference [67])</p> <p>Refer to “old nuclear triad”.</p>	<p>美国2002年《核态势评估》报告中提出的一种新的军事战略，由三部分组成：核与非核打击力量；主动的和被动的防御；全新的防御基础设施。(源自：参考文献[67])</p> <p>参见“旧核三位一体”</p>
<p><b>new thinking</b></p> <p>1 The former Soviet Union President Mikhail Gorbachev’s enunciated opinion on the world situation and Soviet Union foreign policy in the 1980s. The main points are: (1) The world is a unity of diversity. (2) Respect the choices of style of life according to people in each country and of the ways of solving their own problems independently. (3) The interest of humanity has priority over that of a class. (4) Nuclear war is a threat to human life and development. And (5) The basis of human common security is respect for independence and sovereignty of other members of the world community. (Modified From: Reference [1], p34; [64])</p> <p>2 The term used to characterize distinctive elements in Soviet foreign policy thinking developed under the leadership of President Mikhail Gorbachev in the latter half of the 1980s. The main propositions in new thinking included: (1) the relationship between capitalist and socialist states was not zero-sum; (2) common human interests should take priority over class-based interests; (3) military parity with the U.S. was not necessary for Soviet security, and non-offensive</p>	<p><b>新思维【xīnsīwéi】</b></p> <p>1 20世纪80年代中期苏联领导人戈尔巴乔夫对当时世界的看法以及关于苏联外交政策的观点，主要内容为：(1)世界是一个多样性的统一体；(2)充分尊重各国人民按照自己的选择而生活并独立自主地解决自身的问题；(3)全人类的利益高于阶级利益；(4)战争威胁着人类的生存与发展；(5)全人类普遍安全的唯一原则基础是尊重主权。(改编自：参考文献[1], p34; [64])</p> <p>2 该术语用以描述20世纪80年代中后期在戈尔巴乔夫总统领导下而发展的苏联外交政策思维的特性。新思维的主要观点包括：(1)资本主义和社会主义之间不是“零和”关系；(2)共同的人类利益高于阶级利益；(3)与美国的军事均衡对苏联的安全不是必需的，非攻击性的防御战略应优于进攻战略；(4)军事力量主要用于防止冲突，而不是在战争</p>

defensive strategies were preferable to offensive strategies; (4) the main purpose of military power was to prevent conflict, rather than to defeat an adversary in a war. Some of the manifestations of new thinking included certain unilateral disarmament measures, reductions in the size of certain military forces, and a strong commitment to bilateral and multilateral confidence building and arms control measures. (From: Reference [57], p117-129; [58])	中打败对手。新思维的某些表现形式包括单边裁军措施、削减军事力量、承诺单边和多边的信任建立及裁军措施。(源自: 参考文献[57], p117-129; [58])
<b>new triad</b> Refer to “new strategic triad”.	新三位一体【xīn sānwèiyītǐ】 参见“新战略三位一体”
<b>no-first-use of nuclear weapons</b>	不首先使用核武器 【bù shǒuxiān shǐyòng héwǔqì】
<b>nonaligned movement</b>	不结盟运动【bùjiéméng yùndòng】
<b>non-application of IAEA safeguards</b>	不实施国际原子能机构的保障监督 【bùshíshī guójì yuánzínéng jīgòu de bǎozhàng jiāndū】
<b>non-compliance</b>	不履约【bùzūnyuē】
<b>non-nuclear weapon state (NNWS)</b>	无核武器国家【wú héwǔqì guójiā】
<b>non-proliferation</b>	不扩散【bùkuòsàn】

<p><b>nuclear explosion shock wave</b></p>	<p>核爆炸冲击波【hébào zhà chōng jī bō】</p>

<p><b>nuclear explosive device</b> A fission or thermonuclear device capable of producing a nuclear explosion. (Modified from: Reference [3], p379)</p>	<p><b>核爆炸装置【hébào zhà zhuāngzhì】</b> 具有核爆炸功能的裂变装置或热核装置。(改自: 参考文献[3], p379)</p>
<p><b>nuclear-explosive material (NEM)</b> Any mixture of nuclear-explosive and other nuclides that can be made to support a chain reaction when present in suitable quantity, purity, and geometry is called “nuclear-explosive material” (NEM). (From: Reference [11], p221)</p>	<p><b>核爆材料【hébào cáiliào】</b> 以适当的数量、纯度和构型存在时, 能用以支持链式反应的核炸药和其他核素的混合物。(源自: 参考文献[11], p221)</p>
<p><b>nuclear export control</b> Control of commercial export, gifts to and exhibitions in foreign countries or regions, as well as scientific and technological cooperation with and assistance to foreign countries or regions that involve nuclear materials, nuclear equipment, non-nuclear materials used for reactors and other items as well as their related technologies. (Modified from: Reference [25])</p>	<p><b>核出口控制【héchūkǒu kòngzhì】</b> 对核材料、核设备和反应堆用非核材料等物项及其相关技术的贸易性出口及对外赠送、展览、科技合作和援助进行控制。(改自: 参考文献[25])</p>
<p><b>nuclear first strike</b> 1 The launching of an initial nuclear attack before one’s opponent is able to use any strategic weapon. First strike is a nuclear attack carried out at such a devastatingly high level of destruction as to nullify an enemy’s capability to launch a major counterstrike. (From: Reference [6], p72) 2 An initial attack on an opponent’s strategic nuclear forces. Such an attack may be undertaken in an attempt to destroy an enemy’s retaliatory (second-strike) capability. (From: Reference [8])</p>	<p><b>第一次核打击【diyí cì hé dǎjī】</b> 1 在对手能够使用任何战略武器之前率先发动核攻击。首次打击是给对手造成极大的破坏致使其失去发起有效反击能力的核进攻。(源自: 参考文献[6], p72) 2 对敌方战略核力量的首次打击。这种打击可用于试图摧毁敌方的报复(第二次打击)能力。(源自: 参考文献[8])</p>

<b>nuclear fission</b>	<b>核裂变【hélièbiàn】</b>
<b>nuclear football</b> A popular name of a portable briefcase or package that contains instructions and codes for the president to authorize the use of strategic nuclear weapons. (Modified from: Reference[2], p203)	<b>核黑匣子【hé hēixiázi】</b> 装有总统用来授权使用战略核武器的指令和密码的便携手提箱或手提包的俗称。(改自: 参考文献[2], p203)
<b>nuclear forces</b>	<b>核武装力量【héwǔzhuāng lìliàng】</b>
<b>nuclear fuel</b>	<b>核燃料【héránliào】</b>
<b>nuclear fuel cycle</b> A system of nuclear installations and activities interconnected by streams of nuclear material. The characteristics of the fuel cycle may vary widely from State to State, from a single reactor supplied from abroad with fuel, to a fully developed system. (From: Reference [4], 4.30)	<b>核燃料循环【héránliào xúnhuán】</b> 由与核材料物流相关的核设施及核活动组成的系统。从由国外提供带燃料的单个反应堆, 到一整套完善系统, 不同国家之间燃料循环的特点可能存在很大差异。(源自: 参考文献[4], 4.30)
<b>nuclear fuel reprocessing</b>	<b>核燃料后处理【héránliào hòuchǔlǐ】</b>
<b>nuclear hardening</b>	<b>抗核加固【kànghé jiāgù】</b>
<b>nuclear heating reactor</b>	<b>供热反应堆【gōngrè fǎnyingduī】</b>
<b>nuclear high altitude burst</b>	<b>高空核爆炸【gāokōng hébào zhà】</b>
<b>nuclear land (water) surface burst</b>	<b>地(水)面核爆炸【dìshuǐmiàn hébào zhà】</b>
<b>nuclear loss</b> Loss of nuclear material due to its transformation into other element(s) or isotope(s) as a result of nuclear reactions. Nuclear loss also includes burn up of nuclear material in a reactor and decay (e.g. of Pu-241) during storage. (From: Reference [4], 6.22)	<b>核损耗【hésǔnhào】</b> 指由于核反应使核材料转变成其他元素或同位素而造成的核材料损耗。核损耗还包括核材料在反应堆中燃烧所造成的损耗以及存储期间衰变所造成的损耗(例如钚-241 的衰变)。(源自: 参考文献[4], 6.22)
<b>nuclear material</b>	<b>核材料【hé cáiliào】</b>

<p><b>nuclear material accountancy</b> The practice of nuclear material accounting as implemented by the facility operator and the State system of accounting for and control of nuclear material (SSAC), inter alia, to satisfy the requirements in the safeguards agreement between the IAEA and the State (or group of States); and as implemented by the IAEA, inter alia, to independently verify the correctness of the nuclear material accounting information in the facility records and the reports provided by the SSAC to the IAEA. (From: Reference [4], 6.2)</p>	<p><b>核材料衡算活动</b> 【hécáiliào héngsuàn huódòng】 设施运行者和国家核材料衡算和控制系统所采取的衡算核材料的行动，尤其是为满足 IAEA 和该国(或国家集团)之间的保障监督协议的要求，也包括 IAEA 所采取的行动，尤其是为独立核查国家核材料衡算和控制系统(SSAC)向 IAEA 所提供的设施纪录和报告中核材料衡算信息的正确性。(源自：参考文献 [4], 6.2)</p>
<p><b>nuclear material incident</b></p>	<p><b>核材料意外事件</b> 【hécáiliào yìwài shìjiàn】</p>
<p><b>nuclear matter</b></p>	<p><b>核物质</b>【hécáiwùzhì】</p>
<p><b>nuclear missile reentry vehicle</b> 1 A missile reentry vehicle equipped with a nuclear warhead. (From: Reference [3], p96) 2 reentry vehicle (RV) — The part of a space vehicle designed to re-enter the earth's atmosphere. (From: Reference [9], p456) 3 reentry vehicle (RV) — A nuclear warhead on a ballistic missile specially designed to reenter the earth's atmosphere in the terminal portion of the missile's trajectory. (From: Reference [8]) Note: The term “reentry body” is the less-common equivalent of “reentry vehicle”.</p>	<p><b>核导弹弹头</b>【hédǎodàn dāntóu】 1 装有核战斗部的导弹再入飞行器。 (源自：参考文献[3], p96) 2 再入飞行器——设计为再入地球大气层的空间飞行器部件。(源自：参考文献[9], p456) 3 再入飞行器(或(再入)弹头)——在导弹的弹道终端能再入地球大气层的弹道导弹上的核战斗部。(源自：参考文献[8]) 注：“再入飞行器”的一种非常用名称是“再入体”。</p>
<p><b>nuclear operation plan</b></p>	<p><b>核作战计划</b>【hézhuòzhàn jìhuà】</p>
<p><b>nuclear primacy</b> The condition whereby one state holds</p>	<p><b>核优势</b>【hécáiyōushì】 一个核国家的核武器拥有明显的质</p>

<p>a clear qualitative and quantitative ability to prevent or render ineffective a rival's retaliatory (second) strike capability. (Modified from: Reference [22])</p> <p>Note: In another view, "The ability to destroy all of an adversary's nuclear forces, eliminating the possibility of a retaliatory strike, is known as a first-strike capability, or nuclear primacy." (From: Reference [22])</p>	<p>量和数量上的优势足以阻止或摧毁对手的报复性(第二次)打击能力的状态。(改自: 参考文献[22])</p> <p>注: 另一种观点是, "摧毁对手所有核力量、消除报复性打击可能性的能力, 被认为是一种第一次打击能力或核优势"。(源自: 参考文献[22])</p>
<b>nuclear reaction</b>	<b>核反应【héfǎnyīng】</b>
<b>nuclear-related dual-use item</b> An item which has a technical use in both nuclear and non-nuclear applications, and may be subject to certain conditions of supply because such items could make a major contribution to a nuclear explosive activity. (Modified from: Reference [4], 5.34)	<b>核相关两用物项【hé xiāngguān liǎngyòng wùxiàng】</b> 指一种在核和非核领域都有技术用途的物项, 提供这种物项时要遵守一定条件, 因为这种物项可能为核爆炸活动提供很大的帮助。(改自: 参考文献[4], 5.34)
<b>Nuclear Safety Convention</b>	<b>核安全公约【hé'ānquán gōngyuē】</b>
<b>nuclear second strike</b> Retaliatory nuclear attack following an enemy's first nuclear attack. (Modified from: Reference [2], p62)	<b>第二次核打击【dì'èrcì hédǎjī】</b> 对敌方第一次核袭击的报复性核打击。(改自: 参考文献[2], p62)
<b>nuclear strategy</b> Strategy of planning and guiding the development and employment of nuclear force. (From: Reference [1], p112)	<b>核战略【hézhànlüè】</b> 筹划和指导核力量发展与运用的方略。(源自: 参考文献[1], p112)
<b>nuclear strike</b>	<b>核打击【hédǎjī】</b>
<b>Nuclear Suppliers Group (NSG)</b> A group of nuclear supplier countries which seeks to contribute to the non-proliferation of nuclear weapons through the implementation of Guide-	<b>核供应国集团【hégōngyīngguó jítuán】</b> 通过执行核(和涉及核)出口准则而防止核武器扩散的核供应国家。各参与国通过其国家法律和惯例来执

<p>lines for nuclear exports and nuclear related exports. The NSG Guidelines are implemented by each Participating Government in accordance with its national laws and practices. Decisions on export applications are taken at the national level in accordance with national export licensing requirements. (From: Reference [47])</p>	<p>行核供应国集团的准则。出口申请由国家层面决定，并符合国家出口许可规定。(源自：参考文献[47])</p>

<p><b>nuclear threat</b></p>	<p>核威胁【hégōngyìngguó jítuán zhǔnzé】</p>
<p><b>nuclear threshold state (NTS)</b></p>	<p>核门槛国家【héménkǎn guójiā】</p>
<p><b>nuclear underground (or underwater) burst</b></p>	<p>地(水)下核爆炸 【dìshuǐxià hébào zhà】</p>
<p><b>nuclear war</b></p>	<p>核战争【hégōngyìngguó jítuán zhǔnzé】</p>
<p><b>nuclear warfighting capability</b> In nuclear strategy, having the capability to use nuclear weapons to fight a war, and not just to deter the outbreak of nuclear war. (Modified from: Reference [48])</p>	<p>核战能力【hégōngyìngguó jítuán zhǔnzé】 在核战略中，具有使用核武器进行战争的能力，而不仅限于慑止核战争爆发的能力。(改自：参考文献[48])</p>
<p><b>nuclear warhead</b> The part of a nuclear weapon whose function is to destroy or damage targets. It mainly consists of a nuclear explosive device, arming, fuzing and firing system, and other functional parts or relevant structures. In Chinese writings in the arms control field, the nuclear warhead is often called 【hédàntóu】 (核弹头). (Modified from: Reference [3], p404) Note: The warhead is that part of a</p>	<p>核战斗部【hégōngyìngguó jítuán zhǔnzé】 核武器中用来毁伤目标的部分。主要由核爆炸装置、引爆控制系统、其他功能部件和相应的结构部件等组成。在中国军备控制领域常把核战斗部称为核弹头。(改自：参考文献[3], p404) 注：战斗部——导弹、炮弹、鱼雷、</p>

<p>missile, projectile, torpedo, rocket, or other munition which contains either the nuclear or thermonuclear system, high explosive system, chemical or biological agents or inert materials intended to inflict damage. (From: Reference [5], p15)</p>	<p>火箭或其他武器的毁伤目标的部分，它含有核或热核系统、高能炸药系统、生物或化学制剂、或惰性材料。(源自：参考文献[5]，p15)</p>
<p><b>nuclear weapon</b> 1 Weapon assembly that is capable of producing an explosion and massive injury and destruction by the sudden release of energy instantaneously released from self-sustaining nuclear fission and/or fusion. From the generalized point of view, it refers to a nuclear weapon system with a warfighting capability including the delivery or launch system. (Modified from: Reference [3], p394) 2 NATO definition —— A complete assembly (i.e. implosion type, gun type or thermonuclear type) in its intended ultimate configuration which, upon completion of the prescribed arming, fusing and firing sequence, is capable of producing the intended nuclear reaction and release of energy. Also called “atomic weapon”. (From: Reference [49], p11) 3 Russian definition —— Nuclear Weapons in the Armed Forces of the Russian Federation include an aggregate of armaments including nuclear charges, nuclear ammunition, means of their delivery to the target and control means. (From: Reference [29], p21) 4 A device that releases nuclear energy in an explosive manner as the result of nuclear chain reactions involving the</p>	<p><b>核武器【héwǔqì】</b> 1 利用能自持进行的原子核裂变和(或)聚变反应瞬时释放的巨大能量，产生爆炸作用，并具有大规模毁伤破坏效应的武器。从广义上说它是指包括投掷或发射系统在内的具有作战能力的核武器系统。(改自：参考文献[3]，p394) 2 北约定义——根据预期设计构造，在完成指定的引爆控制序列后，能够产生预期的核反应并释放出核能的完整装置(如内爆型、枪型或热核型)。也被称为“原子武器”。(源自：参考文献[49]，p11) 3 俄罗斯定义——俄罗斯联邦军队的核武器是指包括核装料、核战斗部、运载工具和控制系统在内的武器系统。(源自：参考文献[29]，p21) 4 使原子核产生裂变或聚变链式反应(或兼而有之)，以爆炸方式释放</p>

<b>nuclear weapon miniaturization</b>	<b>核武器小型化【héwǔqì xiǎoxínghuà】</b>
<b>nuclear weapon physics</b>	<b>核武器物理【héwǔqì wùlǐ】</b>
<b>nuclear weapon safety</b> In maintenance and use of nuclear weapons, the capability to avoid an accident involving personnel, facilities and installations due to misuse or from gradual deterioration or a sudden fault in equipment or weapons. (Modified from: Reference [2], p217)	<b>核武器安全性【héwǔqì ānquánxìng】</b> 在正常的维护或使用核武器中, 防止因设备或武器的误操作、逐步退化或意外故障等原因发生人员、设备和设施的事故的能力。(改自: 参考文献[2], p217)
<b>nuclear weapon security</b> The capability of a nuclear weapon and its surrounding equipment and personnel to prevent any unauthorized use. (Modified from: Reference [2], p217)	<b>核武器保安性【héwǔqì bǎo'ānxìng】</b> 核武器及其相关的设备和人员能抵制任何非授权的使用的能力。(改自: 参考文献[2], p217)
<b>nuclear weapon state (NWS)</b>	<b>核武器国家【héwǔqì guójiā】</b>
<b>nuclear weapons stockpile</b>	<b>核武器库存【héwǔqì kùcún】</b>
<b>nuclear weapons surety</b> The materiel, personnel, and procedures that contribute to the safety, security, reliability, and control of nuclear weapons, thus assuring no nuclear accidents, incidents, unauthorized use, or degradation in performance. (From: Reference [60])	<b>核武器确信心【héwǔqì quèxìnxìng】</b> 使用能提高核武器安全性、保安性、可靠性和可控性的材料、人员和程序, 以确保核武器在使用过程中不发生核事故、故障、非授权使用或功能退化。(源自: 参考文献[60])
<b>nuclear winter</b>	<b>核冬天【hédōngtiān】</b>
<b>nucleon</b>	<b>核子【hézi】</b>
<b>nuclide</b>	<b>核素【hésù】</b>
<b>ocean surveillance satellite</b>	<b>海洋监视卫星【hǎiyáng jiānshì wèixīng】</b>

<b>offensive strategy</b> A strategy that aims to carry military operations to the enemy by closing with and destroying enemy forces, seizing territory and vital resources. Its focus is on seizing, retaining, and exploiting the initiative. (From: Reference [61], p3-27)	<b>进攻性战略【jìngōngxìng zhànlüè】</b> 为接近并摧毁敌方军事力量以及夺取疆土和重要资源而对敌方采取的军事行动。它致力于抢占、保持和发挥主动权。(源自：参考文献[61], p3-27)
<b>off-load refuelled power reactor</b>	<b>停堆换料动力堆</b> 【tíngduī huànlào dònglìduī】
<b>old nuclear triad</b> The three legs of the U.S. strategic nuclear force: submarine-launched ballistic missiles (SLBMs), land based intercontinental ballistic missiles (ICBMs) and long-range bombers. (From: Reference [72]) Refer to “new strategic triad”	<b>旧核三位一体【jiù hé sānwèiyītǐ】</b> 美国战略核力量的三个支柱：潜射弹道导弹(SLBMs)；陆基洲际弹道导弹(ICBMs)；远程轰炸机。(源自：参考文献[72]) 参见“新战略三位一体”
<b>once-through nuclear fuel cycle</b>	<b>一次通过式核燃料循环</b> 【yīcì tōngguòshì héránliào xúnhuán】
<b>one-point safety of a nuclear weapon</b> Safety performance of a nuclear weapon when any one point of the high explosive is detonated in abnormal situations (by impact, projectile, etc). The U.S. military standard is that the probability of releasing more than 1.8 kg TNT equivalent fission energy when any point of the explosive is ignited is less than one per million in any accident. (Modified from: Reference [2], p223)	<b>核武器一点安全</b> 【héwǔqì yīdiǎn ānquán】 核武器在异常环境(撞击或枪击)下武器中炸药任何一点起爆时所具有的安全性能。美国军用标准为：在任何事故中，炸药任何一点起爆时所产生的裂变能在 1.8 千克梯恩梯当量以上的概率小于百万分之一。 (改自：参考文献[2], p223)
<b>on-load refuelled power reactor</b>	<b>不停堆换料动力堆</b> 【bùtíngduī huànlào dònglìduī】
<b>on-site inspection (OSI)</b> The verification method carried out by personnel or apparatus on the selected site. The 13 types of inspection are	<b>现场视察【xiànchǎng shìchá】</b> 在被探测现场利用人员或仪器收集信息的视察方式。《美苏关于削减

<p>defined in the START I treaty. Inspections are carried out by designated inspectors to verify that particular activities prohibited by an arms limitation agreement are not performed, to check that particular activities prescribed by an arms limitation agreement are implemented, or to examine the nature of a suspicious event. (Modified from:Reference [16], p231)</p>	<p>和限制进攻性战略武器条约》规定了13种现场视察方式。视察由指派的视察员执行，旨在核实没有进行军备限制协议所禁止的活动，确认执行了军备限制协议所规定的活动，或调查可疑事件的真相。(改自：参考文献[16]，p231)</p>

<b>peaceful nuclear explosions</b>	和平核爆炸【héping hébào zhà】
<b>peaceful use of nuclear explosion</b>	和平利用核爆炸 【héping liyòng hébào zhà】
<b>pellet</b>	芯块【xīnkuài】
<b>penetration ability of nuclear weapon</b>	核武器突防能力 【héwǔqì tūfáng nénglì】
<b>penetration aids of nuclear missiles</b>	核导弹的突防装置 【hédǎodàn de tūfáng zhuāngzhì】
<b>perimeter portal continuous monitoring</b>	设施周边与进出口连续监测 【shèshī zhōubiān yǔ jìnkǒu liánxù jiāncè】
<b>permanent radiation damage in electronics</b>	电子系统的永久性辐射损伤 【diànzǐ xìtǒng de yǒngjiǔxìng fúshè sūnshāng】
<b>permeability of barrier</b>	分离膜的渗透性 【fēnlímó de shèntòuxìng】
<b>permissive action link (PAL)</b> A device included in or attached to a nuclear weapon system to preclude arming and/or launching until the insertion of a prescribed discrete code. (From: Reference[9], p412) Refer to “safing device of nuclear weapon”	密码锁(亦称启动连接装置) 【mìmasuǒ yìchēng qǐdòng liánjiē zhuāngzhì】 一种安装或附加在核武器系统上的装置, 用于在输入预定的离散密码前, 防止解除保险和(或)发射。(源自: 参考文献[9], p412) 参见“核武器保险装置”

<b>physical barrier for protected sections</b>	保护区实体屏障 【bǎohùqū shí tǐ píngzhàng】
<b>physical diagnostic measurement in nuclear test</b>	核试验的物理诊断测量 【héchìyàn de wùlǐzhěnduàn cèliáng】
<b>physical inventory</b> The sum of all the measured or derived estimates of batch quantities of nuclear material on hand at a given time within a material balance area, obtained in accordance with specified procedures. (Modified from: Reference [15], para113; [4], 6.41)	实物存量【shíwù cúnlìang】 某一给定时刻，在特定核材料平衡区内，按照规定程序测量或估算所得到的所有批量的核材料总和。(改自：参考文献[15]，para113；[4]，6.41)
<b>physical inventory-taking of nuclear material</b> The activities carried out to determine physical inventory. (Modified from: Reference [15], para113; [4], 6.41)	核材料实物盘存 【hécáiliào shíwù páncún】 为确定核材料实物存量而采取的行动。(改自：参考文献[15]，para113；[4]，6.41)
<b>physical-protection authorization of nuclear material</b>	核材料实体保护授权 【hécáiliào shí tǐ bǎohù shòuquán】
<b>physical-protection design basis threats</b>	实体保护设计基准威胁 【shí tǐ bǎohù shèjì jīzhǔn wēixié】
<b>physical-protection emergency response</b>	实体保护应急响应 【shí tǐ bǎohù yīngjí xiǎngyīng】
<b>physical-protection for nuclear material</b> Establishing a security protection system for extant buildings and vehicles (relating to storage or transportation processes) with nuclear material, so as to safeguard nuclear material. (From: Reference [2], p186)	核材料实体保护 【hécáiliào shí tǐ bǎohù】 对存有核材料的建筑物和车辆(涉及储存和运输过程)等建立安全防范系统，以实施对核材料的保障监督。(源自：参考文献[2]，p186)
<b>physical-protection levels of nuclear material</b>	核材料实体保护等级 【hécáiliào shí tǐ bǎohù děngjí】
<b>physical-protection organization</b>	实体保护组织机构 【shí tǐ bǎohù zǔzhī jīgòu】
<b>physical-protection recommendations</b>	实体保护建议【shí tǐ bǎohù jiànyì】

<p><b>physical-protection system-failure criterion</b></p>	<p>实体保护系统失效判断准则 【shí tǐ bǎo hù xì tǒng shī xiǎo pàn duàn zhǔn zé】</p>
<p><b>physical-simulation of nuclear explosion</b></p>	<p>核爆炸物理模拟 【hé bào zhà wù lǐ mó nǐ】</p>
<p><b>physics package</b> The primary and secondary of a nuclear weapon are housed inside a radiation case; the completed assembly is called the “physics package.” (From: Reference [11], p91)</p>	<p>物理包【wù lǐ bāo】 核武器中封装在辐射壳内的初级和次级部件的完整的组装件。(源自：参考文献[11], p91)</p>
<p><b>pit</b> The sphere or shell of nuclear explosive material at the center of an implosion device, usually clad with beryllium or another metal. (Modified from: Reference [11], p90)</p>	<p>弹芯【dàn xīn】 安置在内爆装置中心、通常有铍或其他金属包层的核炸药材料球体或壳体。(改自：参考文献[11], p90)</p>
<p><b>plutonium</b></p>	<p>钚【bù】</p>
<p><b>plutonium alloy</b></p>	<p>钚合金【bù hé jīn】</p>
<p><b>plutonium decontamination cycle</b></p>	<p>钚净化循环【bù jìng huà xún huán】</p>
<p><b>plutonium dioxide</b></p>	<p>二氧化钚【èr yǎng huà bù】</p>
<p><b>plutonium recycling</b> A process of reusing in nuclear reactors the plutonium extracted from spent fuel. (From: Reference [2], p22)  Note: In the DUPIC process, spent LWR fuel rods are directly used as fuel for CANDU-type heavy-water power reactors, with only mechanical modifications and not chemical reprocessing. (From: Reference [32], p25-40)</p>	<p>钚再循环【bù zài xún huán】 将从乏燃料中回收得到的钚在反应堆内再使用的过程。(源自：参考文献[2], p22)  注：在 DUPIC 过程中，轻水堆的乏燃料棒只需机械处理而不需化学后处理即可直接作为 CANDU 型重水动力堆的燃料。(源自：参考文献[32], p25-40)</p>
<p><b>point sample</b> An environmental sample taken in one particular area to characterize one source of released material which can</p>	<p>点样品【diǎn yàng pǐn】 在一个特定地区环境为确定能够在接近泄漏点临近地区发现泄漏物质</p>

be found in a contiguous area adjacent to a release point. (From: Reference [4], 9.5)	的源的特征而采集的样品。(源自: 参考文献[4], 9.5)
<b>point target</b>	点目标【diǎn mùbiāo】
<b>post-exercise dispersal inspection</b>	演习后疏散视察 【yǎnxíhòu shūsàn shìchá】
<b>power reactor</b>	动力堆【dònglìduī】
<b>powered phase</b>	主动段【zhǔdòngduàn】
<b>predetonation in fission explosion</b>	裂变爆炸过早点火 【lièbiàn bàozhà guòzǎo diǎnhuǒ】
<b>preemptive strike</b>	先发制人打击【xiānfāzhìrén dǎjī】
<b>preset burst depth of nuclear weapon</b>	核武器装订爆深 【héwǔqì zhuāngdìng bàoshēn】
<b>preset burst height of nuclear weapon</b>	核武器装订爆高 【héwǔqì zhuāngdìng bàogāo】
<b>pressurized water reactor (PWR)</b>	压水堆【yāshuǐduī】
<b>principal nuclear facility</b>	重要核设施【zhòngyào héshèshī】
<b>Principled Declaration on Refraining from the Threat or Use of Force in Their International Relations</b>	关于国际关系中不得进行武力威胁或使用武力的原则宣言 【guānyú guójìguānxi zhōng bùdé jìnxíng wǔlì wēixié huò shíyòng wǔlì de yuánzé xuānyán】
<b>processing of radioactive liquid waste</b>	放射性废液处理 【fàngshèxìng fèiyè chǔlǐ】
<b>production of uranium hexafluoride by fluorination of uranium tetrafluoride</b>	四氟化铀氟化生产六氟化铀 【sìfúhuàyóu fúhuà shēngchǎn liùfúhuàyóu】
<b>production reactor</b>	生产堆【shēngchǎnduī】
<b>prohibition of the production of fissile material for nuclear weapon</b>	禁止为核武器生产易裂变材料 【jìnzhǐ wèi héwǔqì shēngchǎn yìlièbiàn cáiliào】
<b>project and supply agreement</b>	项目和供应协定 【xiàngmù hé gōngyìng xiédìng】

<b>projection of nuclear weapon</b>	核武器投射【héwǔqì tóushè】
<b>propagation of nuclear electromagnetic pulse</b>	核电磁脉冲的传播【hédiàncímàichōng de chuánbō】
<b>protection from nuclear electromagnetic pulse</b>	核电磁脉冲的防护【hédiàncí màichōng de fánghù】
<b>protection of nuclear weapon</b>	核武器的防护【héwǔqì de fánghù】
<b>protocol</b>	议定书【yìdìngshū】
<b>Protocol to the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Reduction and Limitation of Strategic Offensive Arms</b>	美苏关于削减和限制进攻性战略武器条约议定书【měi sū guānyú xuējiǎn hé xiànzhì jìngōngxìng zhànlüèwǔqì tiáoyuē yìdìngshū】

<b>Safeguards of International Atomic Energy Agency</b> IAEA safeguards are a set of activities by which the IAEA seeks to verify that a State is living up to its international undertakings not to use peaceful nuclear programs for nuclear weapons purposes. The safeguards system is based on assessment of the correctness and completeness of the	国际原子能机构保障监督制度 【guójì yuánzǐnéng jīgòu bǎozhàng jiāndū zhìdù】 IAEA 的保障监督制度是 IAEA 为核实某国家履行未将民用核计划转用于核武器目的的国际承诺的一整套行动。保障监督体系是基于某国就其核材料和相关核活动向 IAEA

<p>State's declarations to the IAEA concerning nuclear material and nuclear-related activities. To date, 145 States have entered into such agreements with the IAEA, submitting nuclear materials, facilities and activities to the scrutiny of IAEA's safeguards inspectors. IAEA verification helps to provide assurance that such items are not diverted or misused in order to assemble nuclear weapons and that no items required to be declared under safeguards are undeclared. (From: Reference[51])</p>	<p>申报的准确性和完整性的评估。迄今为止,已有 145 个国家加入 IAEA 的保障监督协议,将核材料、核设施和核活动呈交 IAEA 保障监督视察员进行详细审查。IAEA 的核查有助于确认上述项目未转用或滥用于制造核武器,以及保障监督所要求申报的项目已全部申报。(源自:参考文献[51])</p>
<p><b>safeguards quality assurance</b>                  In the context of IAEA safeguards, a management tool for ensuring a systematic approach to all of the activities affecting the quality of the safeguards implementation. <p><b>self-defensive nuclear strategy</b></p> <p>Term used officially by China to</p>	<p>自卫防御核战略 【zìwèi fángyù hézhànlüè】</p>

<p>describe its nuclear strategy. The strategy takes as its fundamental goal deterring other countries from using or threatening to use nuclear weapons against China. It includes an official commitment to a policy of no first use of nuclear weapons at any time and under any circumstances. It unconditionally undertakes not to use or threaten to use nuclear weapons against non-nuclear-weapon states or nuclear-weapon-free zones, and stands for the comprehensive prohibition and complete elimination of nuclear weapons. The strategy upholds the principles of counterattack in self-defense and limited development of nuclear weapons, and aims at building a lean and effective nuclear force capable of meeting national security needs. It endeavors to ensure the security and reliability of its nuclear weapons and maintains a credible nuclear deterrent force. (Modified from: Reference [34])</p>	<p>中国官方描述其核战略所用的术语。该战略的根本目标是遏制他国对中国使用或威胁使用核武器。该战略正式承诺在任何时候、任何情况下都不首先使用核武器的政策，无条件地承诺不对无核国家和无核地区使用或威胁使用核武器，主张全面禁止和彻底销毁核武器。该战略坚持自卫反击和有限发展的原则，着眼于建设一支满足国家安全需要的精干有效的核力量，确保核武器的安全性、可靠性，保持核力量的战略威慑作用。(改自：参考文献[34])</p>

<p><b>yellow cake</b> A concentrate produced during the uranium milling process that contains about 80% U<sub>3</sub>O<sub>8</sub> with small amounts of uranyl salts. In preparation for uranium enrichment, the yellowcake is converted to uranium hexafluoride gas (UF<sub>6</sub>). In the preparation of natural uranium reactor fuel, yellowcake is processed into purified uranium dioxide. (From: Reference [12])</p>	<p><b>黄饼【huángbǐng】</b> 铀水冶过程中的中间产物，含有大约 80% 带着少量铀酰盐的八氧化三铀(U<sub>3</sub>O<sub>8</sub>)。用于铀浓缩的黄饼被转化成六氟化铀气体(UF<sub>6</sub>)，用于天然铀反应堆燃料的黄饼被加工成纯净的二氧化铀。(源自：参考文献[12])</p>

<b>yield</b>	<b>威力【wēilì】</b>
<b>yield-to-weight ratio</b>	<b>比威力【bǐwēilì】</b>
<b>Zangger Committee</b> The Zangger Committee, also known as the Nuclear Non-proliferation Treaty Exporters Committee, is a nuclear export group, which consists of parties of the Nuclear Non-proliferation Treaty (NPT) who have the capability of nuclear export. The committee was formed in 1971. It aims to prevent the prohibition of nuclear weapons by controlling the export of nuclear materials and equipment from parties of the NPT to non-nuclear-weapon states. The main export control mechanism of the committee is the “Trigger List”. Items on this List exported to non-nuclear- weapon states must be subject to IAEA safeguards. The committee now has 36 member states. (Modified from: Reference [1], p374)	<b>桑戈委员会【sānggē wēiyuánhùi】</b> 一些有核出口能力的《不扩散核武器条约》(NPT)缔约国组成的核出口控制集团，又称 NPT 出口国委员会。该委员会于 1971 年成立，宗旨是控制《不扩散核武器条约》成员国对没有核武器的非条约成员国的核材料和核设备的出口，以防止核武器扩散。委员会的主要出口控制机制是“触发清单”，即向无核武器国家出口触发清单上的项目，接收国必须接受“国际原子能机构”的保障监督。目前该委员会有 36 个成员国。(改自：参考文献[1]，p374)

## 中国人民争取和平与裁军协会

中国人民争取和平与裁军协会（以下简称“和裁会”）是中国最大的民间和平组织，1985年6月由国内有关人民团体和各界知名人士发起成立，目前共有24个重要的会员组织。

和裁会的宗旨是增进中国人民同世界各国人民的相互了解、友谊与合作，共同维护世界和平，反对军备竞赛和战争，要求实现军备控制和裁军，争取全面禁止和彻底销毁核武器及其他大规模杀伤性武器，保护生态环境，促进经济发展，推动社会进步。

和裁会已与全世界近90个国家约300个从事军控与裁军、全球和地区安全问题研究的民间和平组织和学术机构建立了不同形式的友好关系，开展各种交流与合作。

和裁会积极从事有关军控、裁军、和平与安全等问题的研究，每年都主办或合办国际学术研讨会，派专家学者出席各种国际会议和学术研讨会，接待外国代表团。

和裁会享有联合国经社理事会咨商地位，是联合国非政府组织大会的正式成员。

---

## 美国国家科学院——为国家提供科学、工程和医学咨询的机构

美国科学院是一个非盈利性民间机构，具有悠久的历史，拥有众多从事科学和工程研究的著名学者，致力于推进科技发展及运用科技为人类谋福利。根据国会 1863 年通过的宪章，授权科学院为联邦政府提供科学技术方面的咨询意见。拉尔夫·塞西隆博士是美国科学院院长。

美国工程院在美国科学院的授权下于 1964 年成立，是一个拥有大批杰出工程师的机构。它与美国科学院并列，拥有独立的行政权和人事权，与美国科学院一起担负为联邦政府提供咨询的责任。美国工程院倡导旨在满足国家需要的工程计划，鼓励教育和研究，表彰具有突出业绩的工程师。查尔斯·韦斯特博士是美国工程院院长。

医学院由美国科学院在 1970 年建立，旨在保证相关行业杰出专业人士对有关公共健康的政策事务的审查。根据国会宪章对美国科学院的授权，医学院为联邦政府提供咨询，同时自主地确定医疗、研究和教育方面的议题。哈维·芬伯格博士是医学院院长。

国家研究委员会由美国科学院在 1916 年组建，它负责科学院与科技界的联系，为科学院进一步获得知识及为联邦政府提供咨询的目标服务。委员会的职责依据科学院的总体政策来确定，已成为美国科学院和美国工程院的主要运行机构，为政府、公众、科学和工程界提供服务。委员会由科学院、工程院和医学院共同管理。拉尔夫·塞西隆博士和查尔斯·韦斯特博士分别是国家研究委员会的主席和副主席。

## 致 谢

中美两国的官员和学术界的同行们为术语汇编编委会提供了很多想法和意见，他们经过讨论所形成的观点成为本术语汇编的重要基础。编委会在此对那些为术语汇编的全面性和准确性提供帮助的人士表示衷心的感谢。

本术语汇编还吸取了中美两国很多机构的现有成果。我们特别感谢核威胁倡议基金会(NTI)和蒙特雷国际研究所，让我们参考他们在 2002 年编写的核术语词典。我们还要感谢《国防名词大典——核能卷》编委会、《军备控制与裁军手册》编委会和《中国军事大百科》编委会，本术语汇编中许多术语和定义引自这些文献。

依照美国国家研究委员会的报告评审委员会以及中国原子能出版社和中国人民争取和平与裁军协会共同组成的联合评审委员会所授权的程序，来自不同领域的、持有不同观点的技术专家对术语汇编初稿进行了审查。独立评审的目的在于提出坦诚的批评性意见，使所出版的术语汇编能尽可能地完善，并达到客观、准确的标准。在评审期间，所提的意见和初稿都是保密的，以确保程序的独立和完整。我们在此感谢以下评审委员：

### 中方评审委员

**钱绍钧** 院士，中国人民解放军总装备部，研究员

**吕 敏** 院士，北京系统工程研究所，研究员

**宋家树** 院士，中国工程物理研究院，研究员

**诸旭辉** 中国核工业集团公司，研究员

**严叔衡** 中国核工业集团公司，研究员

---

**刘恭梁** 北京应用物理与计算数学研究所，研究员  
**牛 强** 中国人民争取和平与裁军协会，秘书长  
**段占元** 中国国防部，研究员  
**欧阳立平** 中国现代国际关系研究院，研究员  
**卫广刚** 原子能出版社，编辑

### 美方评审委员

**Ping Lee** 国家安全技术有限责任公司，部门负责人  
**Stephanie Lieggi** 蒙特雷国际研究所，研究员  
**James Mulvenon** 情报研究与分析中心，军工集团公司主任  
**Brad Roberts** 国防分析研究所，研究员  
**Christopher Twomey** 海军研究生院，助理教授，研究副主管  
**Jing-dong Yuan** 蒙特雷国际研究所，东亚防扩散项目主任

尽管上述评审委员提供了很多有建设性的意见和建议，但是他们与术语汇编出版无关，也不会出版前看到最终版本。在美国，术语汇编的评审工作受来自芝加哥大学的 R. Stephen Berry 的监督，他受国家科学院委托，负责确保依据既定程序对术语汇编进行独立审查，同时确保所有评审意见能够得到认真的考虑。相应地，在中国，评审工作受到钱绍钧院士的领导，他负责领导委员会对术语进行全面的检查和审核，特别是那些带定义的术语。编委会对术语汇编的最终内容，包括其客观性和准确性，全权负责。

## 前言

中国人民争取和平与裁军协会的中国科学家军备控制小组(CSGAC)和美国科学院国际安全和军备控制委员会(CISAC)已经交往了近二十年,双方共同讨论核军备控制、核不扩散、核能和地区安全等问题,目标是在全球范围内尽量降低核武器使用的可能性和核扩散。

在丰富的交流活动中,在精通英汉双语的与会人员和翻译的帮助下,双方的讨论得以顺利进行。尽管CSGAC和CISAC长期以来相互了解,并且有许多共同的关切,但是将一种语言翻译成另一种语言绝非易事,常常会出现双方对某一术语产生不同解释的困境。

随着国际社会在不扩散核武器、反扩散和防止核恐怖主义方面的不断努力,同时随着核能应用和国际核查功能的日益扩展,母语分别是英文和中文的与会者就相关术语在两种语言中的定义取得共识是非常重要的。有的尽管不能达成共识,但重要的是要理解相关术语在对方语言中的用法,并且应意识到这些术语可能在对方语言中有着不同的甚至含糊不清的含义。

2006年4月,CSGAC和CISAC考虑共同编写一本非保密的核安全术语汇编,并且认为这一想法很有价值且切实可行。因此,双方组成了工作小组,共同拟定了术语汇编的框架结构,并由CSGAC提出了最初的版本。双方经过电子邮件频繁地交换意见,并于2006年9月和2007年3月在北京召开工作会,对术语汇编的框架和入选的条目进行细致深入的讨论。在此基础上,又通过电子邮件多次交换意见后,双方各自在本国组织权威专家小组对文本进行了审阅和评议,并把这些意见汇总在文本中,在2007年11月的双方工作会议上,CSGAC和CISAC对术语的条目、定义和参考文献等最终定稿。我们相信,这本由CSGAC和CISAC共同编写的术语汇编将成为政府部门、学术界和安全领域有价值的参考资料。

本汇编包含了大约1000个术语,它旨在减少双方产生误解的可能性,消除在外交、合作、交流或其他活动进展过程中的障碍,因为其间准确无误的相互了解至关重要。这些术语分为三类。第一类只需要给出英汉对应的名词,而不需要定义。因为在我们讨论过程中,由一方对这些术语做出的定义很容易被另一方接受,不太可能引起误解。所以本汇编中大部分术

语只有相互对应的中英文名称。

第二类是需要定义的术语，这些术语在一种语言中只有单一的定义，但在另一种语言中可能有几个定义，分别对应截然不同的几种情况。对于这些术语，我们会选用经讨论后确定的定义，并依次用两种语言呈现出来。

第三类是即使在同一种语言中也会有几种不同定义的术语，这些术语在不同的上下文中表示不同的对象、行动或概念。对于这类术语，虽然在很多情况下我们都同意其中对应的某个定义，但是我们还是认为有必要列出其在军事和外交等领域中可能出现的不同解释。

我们尽可能地从现有著作或汇编中选取术语的定义。优先考虑的是国际性文件，其次是政府官方文件，再次是一些有名望组织的出版物和一些重要文献，如美国科学院的出版物、中国出版的《军备控制与裁军手册》、《国防名词大典-核能卷》等。我们按照传统的汉英、英汉顺序将工作成果出版成册。此外，我们还以更“亲近”读者的格式制作了本汇编的网络版，网址是：<http://www.cpapd.org.cn/webglossary>和<http://www8.nationalacademies.org/webglossary>。

因为术语在不断变化，我们希望将来能出版本汇编的增补版；随着双方探讨范围的扩大，一些术语的定义将会变得更加清晰，我们将定期更新网络版。我们计划用一种透明的方式来做这些工作，使网络读者既能看到原先的版本，又能看到所做的修订。

编委会打算在本书出版大约一年后正式重审这些术语条目，并根据需要增补和修订。编委员欢迎您对本汇编提供宝贵意见。我们的邮箱是：[css@iapcm.ac.cn](mailto:css@iapcm.ac.cn)和[cisac@nas.edu](mailto:cisac@nas.edu)。

最后，我们特别感谢CSGAC的胡思得院士和CISAC的Richard Garwin博士在本汇编的整个编写过程中所提供的大量指导性意见。这两位著名科学家分别是中美编委会的负责人和词条编写的技术指导人，我们为他们的加入而深感自豪。

## 总目

凡例 .....	1
索引 .....	5
正文 .....	1~85
缩略语 .....	87
参考文献 .....	93

## 凡 例

### 一 编排

本术语汇编按汉语拼音字母顺序和英文单词字母顺序分两部分进行编排，分别称为中文部分和英文部分。每一部分的每一页都按相对应的中文和英文分为两栏，且中文部分的中文一栏在左，英文一栏在右；英文部分的英文一栏在左，中文一栏在右。

中文部分按汉语拼音字母排序。若词条中第一个汉字的拼音相同，则按阴平(即第一声，例：ā)、阳平(即第二声，例：á)、上声(即第三声，例：ǎ)和去声(即第四声，例：à)的声调顺序排序；同音、同调时，分别按汉字的笔画多少和笔顺排序。若第一个汉字的音、调、笔画和笔顺都相同，则按第二个汉字的音、调、笔画和笔顺排序，以下类推。

英文部分按英文单词字母顺序编排，字母不分大小写。

为便于读者按学科体系检索，本术语汇编正文之前列有全部条目的分类索引。第一级表示大类，第二级表示小类，第三级表示条目。条目之间不再分级。中文部分的类和条目仅以中文表示，跟在条目后面的数字表示该条目所在的页数；同样，英文部分的类和条目仅以英文表示，跟在条目后面的数字表示该条目所在的页数。例如：

#### 核军备

##### 核武器

战略核武器.....78

战术核武器.....78

### 二 条目内容

条目一般由条目名称、拼音、定义、出处、注、参见等内容组成。除条目名称和拼音是必有内容外，其他内容根据条目的需要而取舍；除拼音外，出现的各部分内容都有相对应的中、英文。

#### 1 条目名称

条目名称通常是词或词组，且中文条目后面加注汉语拼音。例如：

核武器【héwǔqì】

nuclear weapon

条目名称中出现圆括号( )时, 圆括号内的内容或表示替代, 或表示注解, 或表示缩写。例如:

表示替代: 地(水)下核爆炸

表示注解: 杜皮克工艺(压水堆乏燃料直接用于坎杜反应堆的工艺)

表示缩写: 指挥、控制、通信和情报系统(C3I 系统)

条目名称中出现符号“/”时, 表示“/”前后的内容可通用。例如:

转用策略/转用途径

## 2 拼音

本术语汇编中汉语词条中的每个汉字依照普通话的语音系统, 用汉语拼音字母注音, 词与词的拼音之间以空格分隔。如:

战略核武器【zhànlüè héwǔqì】

轻声字则仅注音而不注声调。例如:

保障监督的质量保证【bǎozhàng jiāndū de zhiliàng bǎozhèng】

条目名称中的非汉字部分, 在汉语拼音中直接写非汉字符号。例如:

无源  $\gamma$  射线探测【wúyuán  $\gamma$  shèxiàn tàncè】

条目名称中的标点符号在汉语拼音中省略。例如:

发方/收方差额【fāfāng shōufāng chā'éré】

## 3 定义及出处

条目定义的开始一般不重复条目名称。

本术语汇编对于词条定义的出处, 一般只引述出现该定义的片段。如果引用的定义与原文一致, 则在定义后面注明“源自:”; 如果使用的定义在原文的基础上稍事修改, 则在定义后面注明“改自:”。

个别词条如有两种或两种以上定义时, 则分别列出定义内容及出处。

引用的定义都注明了参考文献序号及页数。参考文献详情可根据序号参阅书后的“参考文献”部分。

## 4 注

一个条目的内容需要补充注释时, 采用“注”的方式。例如:

标签【biāoqiān】

.....

注: 有源标签工作时需要电源, 但无源标签不需要电源。

## 5 参见

一个条目的内容涉及其他条目时，采用“参见”的方式。例如：

原子弹弹芯【yuánzǐdàn dàn xīn】

参见“弹芯”

## 三 参考文献

本部分包含了术语汇编中引用文献的详细信息。参考文献分别用中文和英文列出，中英文格式统一，以便于理解，并提供尽量多的信息，以便于读者找到原文献。参考文献的信息一般按以下顺序排列：作者、篇名、出版地、出版社、出版日期、网上可查阅的最近日期和网址等信息。有些参考文献还包含了版本、卷号或文件号等信息。由于有些参考文献被多次引用，术语汇编正文的定义部分也列出了该定义在参考文献中的页码。

凡  
例

## 四 其他

本术语汇编所用汉字，以中国国家语言文字工作委员会 1986 年 10 月重新发表的《简化字总表》为准。本术语汇编所用的中文标点符号，以《中华人民共和国国家标准》GB/T 15834—1995 为准。本术语汇编所用的数字，以《中华人民共和国国家标准》GB/T 15835—1995 为准，但未进行数字分节。本术语汇编所用的中文计量单位和科学技术符号，以《中华人民共和国国家标准》GB 3100~3102—93 为准。数字除习惯用汉字表示的外，一般采用阿拉伯数字。

## 一 军备控制与裁军

### 1 军备控制、裁军与国际安全

霸权主义.....	1	不结盟运动.....	3
裁军.....	6	超越遏制战略.....	6
大规模报复战略.....	8	大国协调.....	8
低强度冲突理论.....	10	冻结.....	12
遏制战略.....	13	高技术战争.....	18
共同安全.....	18	关于国际关系中不得进行武力威胁 或使用武力的原则宣言.....	19
国际冲突.....	20	国际经济新秩序.....	20
国际战略格局.....	22	国际争端.....	22
国际政治新秩序.....	22	国际制裁.....	22
国家安全战略.....	22	国家军事战略.....	23
国家利益.....	23	国家战略.....	24
“合理足够”原则.....	24	合作安全.....	24
和平共处五项原则.....	25	和平解决理论.....	26
缓和.....	43	集体安全.....	44
禁止.....	46	局部战争.....	47
军备竞赛稳定性.....	47	军备控制.....	47
军事变革.....	47	军事稳定性.....	47
冷战.....	49	联合国关于侵略定义的决议.....	50
联合国宪章.....	50	灵活反应战略.....	51
前沿防御战略.....	57	全球战略.....	58
万隆会议十项原则.....	65	危机管理.....	65
危机控制.....	65	危机稳定性.....	66
现实威慑战略.....	69	限制.....	69
销毁.....	69	新思维.....	70
信息战.....	71	削减.....	72

有限战争.....	75	战略稳定性.....	78
逐步升级论.....	82	综合国力.....	84

## 2 军备控制和裁军的国际法

备忘录.....	2	公报.....	18
公告.....	18	公约.....	18
规约.....	20	国际法.....	20
国际惯例.....	20	国际条约.....	20
换文.....	43	盟约.....	55
声明.....	60	宪章.....	69
协定/协议.....	70	宣言.....	72
议定书.....	73		

## 3 日内瓦和联合国主要裁军机构

裁军谈判会议.....	6	裁军谈判会议特设委员会.....	6
裁军谈判委员会.....	6	裁军委员会会议.....	6
21 国集团.....	13	联大裁军特别会议.....	49
联大裁军特别会议最后文件.....	50	联合国裁军审议委员会.....	50
联合国裁军事务部.....	50	联合国裁军事务咨询委员会.....	50
联合国裁军研究所.....	50	联合国常规军备委员会.....	50
联合国大会.....	50	联合国大会第一委员会.....	50
十八国裁军委员会.....	60	十国裁军委员会.....	61
西方国家集团.....	68	原子能委员会.....	76

## 4 核军备控制与裁军的条约、协定

美俄关于进一步削减和限制进攻性 战略武器条约.....	53	美俄削减进攻性战略武器条约(莫斯科 科条约).....	53
美苏关于限制反弹道导弹系统条约 (反导条约).....	54	美苏关于消除两国中程及中短程导 弹条约(中导条约).....	54

美苏关于削减和限制进攻性战略武器条约.....	54	美苏关于削减和限制进攻性战略武器条约议定书.....	54
美苏限制进攻性战略武器的某些措施的临时协定.....	55	美苏限制进攻性战略武器条约.....	55

## 二 核军备

### 索引

### 1 核战略

不首先使用核武器.....	4	打击军事力量.....	8
打击社会财富.....	8	第二次核打击.....	11
第一次核打击.....	11	防御性战略.....	14
非对称战争.....	15	核打击.....	32
核冬天.....	33	核讹诈.....	33
核反击.....	33	核威慑.....	35
核威胁.....	36	核武器制胜论.....	40
核武装力量.....	41	核学说.....	41
核优势.....	41	核战略.....	42
核战能力.....	42	核战役.....	42
核战争.....	42	核作战计划.....	42
积极防御.....	43	进攻性战略.....	46
旧核三位一体.....	46	两面下注战略.....	50
劝阻.....	58	三位一体战略核力量.....	59
杀手锏.....	60	实战能力.....	62
外空军事化.....	65	外空武器化.....	65
威逼.....	66	威慑.....	66
先发制人打击.....	68	相互确保摧毁战略.....	69
响应力量.....	69	新三位一体.....	70
新战略三位一体.....	71	延伸(扩展)核威慑.....	72
有限威慑.....	75	预警即发射.....	76
遇袭即发射.....	76	战略防御.....	77
战略防御倡议.....	78	针对性威慑.....	79

自卫防御核战略.....	83	自卫核反击.....	84
最大核威慑.....	84	最低核威慑.....	85

## 2 核武器

备用弹头.....	2	备用性核武库.....	2
比等效百万吨数.....	2	比威力.....	2
部署弹头的检修.....	5	冲击波弹.....	6
次临界安全模拟实验系统.....	7	次临界度.....	7
次临界实验.....	7	弹道导弹预警系统.....	9
弹芯.....	9	等效百万吨数.....	10
第二代核武器.....	11	第三代核武器.....	11
第一代核武器.....	12	电磁脉冲弹.....	12
钝感高能炸药.....	13	多裂变体次临界安全实验.....	13
放射性物质散布装置.....	15	非现役弹头.....	15
非现役核武库.....	15	分导式多弹头.....	16
辐射波型电磁脉冲模拟器.....	17	干净氢弹.....	18
感生放射性弹.....	18	钴弹.....	19
惯性约束聚变.....	19	罐装组件.....	19
国家点火装置.....	22	核(爆炸)装置全过程数值模拟实验.....	26
核爆材料.....	26	核爆激励 X 射线激光器.....	26
核爆激励定向能武器.....	26	核爆激励高功率微波武器.....	26
核爆驱动电磁脉冲弹.....	26	核爆炸的计算机模拟.....	27
核爆炸方式(环境).....	27	核爆炸级瞬时辐射模拟源.....	28
核爆炸模拟.....	28	核爆炸物理模拟.....	28
核爆炸效应模拟.....	29	核爆炸装置.....	29
核弹头再入遥测.....	32	核导弹弹头.....	32
核导弹的突防装置.....	33	核黑匣子.....	34
核炮弹.....	34	核深水炸弹.....	35
核武库维护与管理计划.....	36	核武器.....	36

核武器安全性.....	37	核武器保安性.....	37
核武器保险装置.....	37	核武器触发引信.....	37
核武器的防护.....	37	核武器的延寿与退役.....	37
核武器地面测控设备.....	37	核武器工程设计.....	37
核武器惯性引信.....	37	核武器环境模拟试验.....	37
核武器解保.....	37	核武器可靠性.....	37
核武器可维修性.....	38	核武器库存.....	38
核武器雷达引信.....	38	核武器路程长度引信.....	38
核武器气压引信.....	39	核武器确信心.....	39
核武器生存能力.....	39	核武器事故.....	39
核武器寿命.....	39	核武器突防能力.....	39
核武器物理.....	39	核武器小型化.....	39
核武器遥测系统.....	39	核武器一点安全.....	39
核武器引爆.....	40	核武器引信.....	40
核武器用中子发生器.....	40	核武器运用的运筹分析.....	40
核武器战术技术性能.....	40	核武器贮存环境.....	40
核武器贮存期.....	40	核武器贮存与保管.....	40
核武器装订爆高.....	40	核武器装订爆深.....	40
核武器自毁装置.....	40	核武器自相摧毁效应.....	40
核武器总体设计.....	40	核炸弹.....	41
核战斗部.....	41	核钻地弹.....	42
毁伤软目标能力.....	43	毁伤硬目标能力.....	43
机动再入弹头.....	43	加速战略计算倡议.....	45
经典超级模型.....	46	聚变威力.....	47
抗核加固.....	47	库存核武器可靠性.....	48
快中子临界装置.....	48	快中子脉冲堆.....	48
裂变爆炸过早点火.....	51	裂变产额/裂变威力.....	51
裂变武器.....	51	临界安全评估.....	51
零威力实验.....	51	流体动力学实验.....	51
流体核实验.....	52	密码锁(亦称启动连接装置).....	55

内爆法原子弹.....	56	起爆序列.....	56
起爆元件.....	57	枪法原子弹.....	57
勤务保险.....	57	氢弹.....	57
氢弹构形.....	57	热核点火.....	58
热核武器.....	58	弱剩余放射性武器(3R 弹).....	59
三相弹.....	59	闪光 X 射线照相.....	60
实战部署的弹头.....	62	特殊效应核武器.....	63
梯恩梯当量.....	63	威力.....	66
武器化.....	67	物理包.....	68
现役弹头.....	69	现役核武库.....	69
虚拟核试验.....	72	引控系统联试.....	74
有界波型电磁脉冲模拟器.....	75	原子弹.....	76
原子弹弹芯.....	76	原子弹反射层(惰层).....	76
脏弹.....	77	增强 X 射线弹.....	77
战略核武器.....	78	战区核武器.....	78
战术核武器.....	78	指挥、控制、通信、计算和情报系统 (C4I 系统).....	80
指挥、控制、通信和情报系统(C3I 系统).....	80	中子弹/增强辐射武器.....	81
助爆型原子弹.....	82	自持热核燃烧.....	83

### 3 核武器运载与发射系统

变换打击目标能力.....	3	重新瞄准能力.....	7
弹道导弹潜艇.....	8	导弹精度.....	10
地下发射井.....	11	地下井冷发射.....	11
地下井热发射.....	11	点目标.....	12
反弹道导弹的导弹.....	14	核打击目标.....	32
核导弹的戒备率.....	33	核导弹反应时间.....	33
核导弹可靠性.....	33	核导弹射程.....	33
核导弹投掷重量.....	33	核武器投射.....	39

毁伤概率.....	43	机动导弹.....	43
加固目标.....	45	面目标.....	55
潜射弹道导弹.....	57	射程.....	60
巡航导弹.....	72	有效载荷.....	75
圆概率偏差.....	76	再入段.....	77
战略导弹.....	77	战术导弹.....	78
主动段.....	82		

### 三 禁止核试验

#### 1 禁止核试验的条约

禁止在大气层、外层空间和水下进行核武器试验条约.....	46	美苏和平利用地下核爆炸条约.....	54
美苏限制地下核武器试验条约(限量条约).....	54	全面禁止核试验条约.....	58

#### 2 核试验与监测

X 射线辐照引起的力学损伤.....	1	爆心投影点.....	2
比例爆高.....	2	比例爆深.....	2
冲击波毁伤效应.....	6	冲击载荷.....	6
大气层核爆炸取样技术.....	8	大气层核试验.....	8
大气层核试验的安全问题.....	8	地面或地下核爆炸毁伤效应.....	10
地(水)面核爆炸.....	10	地(水)下核爆炸.....	10
地下核爆炸取样技术.....	11	地下核试验.....	11
地下核试验的安全问题.....	11	电子系统的瞬态辐射效应.....	12
电子系统的永久性辐射损伤.....	12	放射性沉降.....	14
放射性烟云.....	15	放射性沾染.....	15
放射性沾染效应.....	15	辐射加固的电子器件.....	17
高空核爆炸.....	18	高空核爆炸电磁脉冲.....	18
国际监测系统.....	20	和平核爆炸.....	25
和平利用核爆炸.....	26	核爆炸.....	26

核爆炸产生的放射性核素.....	27	核爆炸产生的放射性气溶胶.....	27
核爆炸成坑效应.....	27	核爆炸冲击波.....	27
核爆炸的长期生物效应.....	27	核爆炸地球物理效应.....	27
核爆炸光(热)辐射.....	28	核爆炸光(热)辐射毁伤效应.....	28
核爆炸火球.....	28	核爆炸火球参数测量.....	28
核爆炸碎片的分凝.....	28	核爆炸探测.....	28
核爆炸探测技术.....	28	核爆炸探测系统.....	28
核爆炸通信效应.....	28	核爆炸效应.....	28
核爆炸效应参数测量.....	29	核爆炸早期核辐射.....	29
核爆炸早期核辐射毁伤效应.....	29	核电磁脉冲.....	33
核电磁脉冲的传播.....	33	核电磁脉冲的防护.....	33
核试验.....	35	核试验测试技术.....	35
核试验场.....	35	核试验的物理诊断测量.....	35
核试验的诊断和测量.....	35	核试验放射化学诊断.....	35
减威力核试验.....	45	解耦的地下核爆炸.....	45
近区物理诊断.....	46	科尔太克斯法.....	47
空中核爆炸.....	48	平洞地下核试验.....	56
弱冲击波聚焦.....	59	竖井地下核试验.....	62
水面及水下核爆炸毁伤效应.....	62	系统电磁脉冲.....	68
暂停核试验.....	77		

## 四 禁止生产核武器用的裂变材料

### 1 与国际原子能机构保障监督有关的法律文书及文件

INFCIRC/153 型保障监督协定 (IAEA) .....	1	INFCIRC/66 型保障监督协定 (IAEA) .....	1
保障监督协定.....	2	乏燃料管理安全和放射性废物管理 安全联合公约.....	13
附加议定书.....	17	关于核材料、规定设备和非核材料自 愿报告机制.....	19
国际原子能机构“93+2”计划.....	21	国际原子能机构保障监督体系.....	22

国际原子能机构规约.....	22	国际原子能机构特权和豁免协定.....	22
合作议定书.....	25	核安全公约.....	26
核供应国集团准则.....	34	全面保障监督协定.....	58
桑戈委员会出口准则.....	60	双边合作协定.....	62
项目和供应协定.....	69	小数量议定书.....	70
有关保障监督的修订补充协定.....	75	暂停实施议定书.....	77
自愿提交协定.....	84		

## 2 国际原子能机构保障监督

保护区实体屏障.....	1	保护系统完整性.....	1
保障监督标准.....	2	保障监督的质量保证.....	2
保障监督结论.....	2	不实施国际原子能机构的保障监督.....	4
不履约.....	4	采办策略/采办途径.....	6
进出口控制.....	7	地区核材料衡算和控制系统.....	10
遏制转用.....	13	反胁迫报警.....	14
国际原子能机构保障监督的范围.....	21	国际原子能机构保障监督的豁免.....	21
国际原子能机构保障监督的起点.....	21	国际原子能机构保障监督的中止.....	21
国际原子能机构保障监督的终止.....	21	国际原子能机构及时性探知指标.....	22
国际原子能机构视察指标.....	22	国家核材料衡算和控制系统.....	22
国家级保障监督方案.....	23	核材料实体保护.....	30
核材料实体保护等级.....	30	核材料实体保护授权.....	30
核材料意外事件.....	31	核材料转化时间.....	31
核材料转用.....	31	技术防护系统的多样性.....	45
技术防护系统的多重性.....	45	解除豁免.....	45
禁止生产易裂变材料核查.....	46	禁止为核武器生产易裂变材料.....	46
滥用.....	49	年通过量.....	56
设计资料核查.....	60	设施外场所.....	60
实体保护建议.....	61	实体保护控制中心.....	61
实体保护设计基准威胁.....	61	实体保护探测系统.....	61

实体保护通信系统.....	61	实体保护系统失效判断准则.....	61
实体保护应急响应.....	61	实体保护组织机构.....	61
实体(实物)保护报警系统.....	61	探知概率.....	63
探知时间.....	63	未申报设施或设施外场所.....	66
一体化保障监督.....	73	重要量.....	82
重要设备清单.....	82	转化时间.....	83
转用策略/转用途.....	83		

### 3 核材料和非核材料

钚.....	4	钚合金.....	5
材料类别.....	5	材料类型.....	5
材料形态.....	6	产氚方法.....	6
氚.....	7	氚.....	9
氚氟化锂.....	9	氚化锂.....	9
低浓铀.....	10	反应堆级钚.....	14
非直接使用材料.....	15	高浓铀.....	18
供料.....	18	氦-3.....	24
核材料.....	29	核燃料.....	34
混合氧化物.....	43	金属钚.....	46
金属燃料.....	46	金属铀.....	46
聚变燃料.....	47	可裂变材料.....	47
可用于武器的材料.....	48	可转换材料.....	48
锂.....	49	锂同位素分离.....	49
浓缩(富集)度.....	56	浓缩(富集)铀.....	56
贫化.....	56	贫化铀.....	56
切削(碎)料.....	57	氢化锂.....	58
燃料棒束.....	58	燃料部件.....	58
燃料元件.....	58	燃料组件.....	58
嬗变.....	60	特种可裂变材料.....	63

天然铀.....	63	武器级铀.....	67
武器级铀.....	67	芯块.....	70
易裂变材料.....	73	铀.....	74
铀-233.....	74	铀铀混合氧化物.....	74
铀合金.....	74	源材料.....	76
直接使用材料.....	80	滞留量.....	80
中间产品.....	81	重水.....	82

#### 4 核及核有关活动与装置

闭式核燃料循环.....	2	玻璃固化.....	3
不停堆换料动力堆.....	4	铀净化循环.....	5
铀再循环.....	5	产氚堆.....	6
超临界气体离心机.....	6	次临界装置.....	7
单位分离功能耗.....	8	单循环流程.....	8
低放废物.....	10	地质处置库.....	11
电子枪.....	12	动力堆.....	12
杜皮克工艺.....	13	多层分离膜/复合分离膜.....	13
二氧化铀.....	13	二氧化铀.....	13
乏燃料.....	13	乏燃料的冷却.....	13
乏燃料贮存.....	14	反应堆.....	14
反应堆分类.....	14	放射性废物.....	14
放射性废物处置.....	14	放射性废液处理.....	14
放射性固体废物处理.....	14	放射性活度.....	15
废物固化.....	16	废物贮存.....	16
沸水堆.....	16	分离单元.....	16
分离功.....	16	分离功单位.....	16
分离功率.....	16	分离级.....	16
分离膜.....	16	分离膜的渗透性.....	16
分离膜效率.....	16	分子流.....	17

氟化挥发法.....	17	干法后处理.....	17
干法贮存.....	17	高放废物.....	18
高温化学处理.....	18	高温气冷堆.....	18
高温冶金处理.....	18	供热反应堆.....	18
规定的设备.....	20	海军用反应堆.....	24
核电厂废物.....	33	核燃料后处理.....	34
核燃料循环.....	34	核燃料循环废物.....	34
核相关两用物项.....	41	后处理.....	42
后处理厂.....	43	黄饼.....	43
激光等离子体离子萃取.....	44	激光分离同位素.....	44
激光化学法分离同位素.....	44	级联.....	44
级联理论.....	44	级联效率.....	44
价值函数.....	45	舰船用动力反应堆.....	45
快堆.....	48	扩散分离机组.....	48
扩散分离器.....	48	雷道克斯流程.....	49
离心分离工厂.....	49	离心机失效率.....	49
离心机专用变频电源.....	49	离心机转子材料.....	49
离心机转子动力学.....	49	离心机阻尼装置.....	49
临界装置.....	51	六氟化铀.....	52
六氟化铀水解.....	52	六氟化铀转化.....	52
绿盐.....	52	逆流离心机.....	56
逆流气体离心机的分离效率.....	56	浓缩(富集)厂/同位素分离厂.....	56
浓缩(富集)因子.....	56	普雷克斯流程.....	56
气体扩散的理想分离因子.....	57	气体扩散法.....	57
气体扩散分离级的分离效率.....	57	气体扩散分离压缩机.....	57
气体扩散工厂.....	57	气体离心机.....	57
气体离心机的供取料.....	57	气体离心机的最大理论分离功率.....	57
气体离心机环流驱动法.....	57	气体离心机流场.....	57
气体离心机转筒.....	57	切削(碎)料回收厂.....	57
轻水堆.....	58	能耗.....	58

燃料制造厂.....	58	热室.....	58
熔盐电解精炼流程.....	59	生产堆.....	60
湿法贮存.....	60	石墨慢化堆.....	61
实际级联.....	61	手套箱.....	62
双循环流程.....	62	水法后处理.....	62
水氟化流程.....	62	四氟化铀氟化生产六氟化铀.....	63
梭雷克斯流程.....	63	停产的设施.....	64
停堆换料动力堆.....	64	同位素分离.....	64
同位素分离因子.....	64	同位素位移.....	64
钍-铀核燃料循环.....	65	退役设施/退役的设施外场所.....	65
微型中子源反应堆.....	66	下游设施.....	68
压水堆.....	72	亚临界气体离心机.....	72
研究堆.....	72	一次通过式核燃料循环.....	73
一体化流程.....	73	已关闭设施/已关闭的设施外场所.....	73
铀钚分离循环.....	74	铀钚循环.....	74
铀产品的转化.....	74	铀纯化厂.....	74
铀的氟化物.....	74	铀的中间氟化物.....	74
铀光谱.....	74	铀化学浓缩物.....	74
铀净化循环.....	74	铀矿开采和水冶.....	74
铀同位素分离.....	74	铀氧化物的氟化.....	74
铀再循环.....	74	原子蒸气激光同位素分离法.....	76
中放废物.....	80	重水堆.....	82
重水生产厂.....	82	重要核设施.....	82
重铀酸铵.....	82	贮存设施.....	82
转化厂.....	83		

## 5 核材料衡算

标识数据.....	3	不明材料量.....	4
材料平衡区的账面存量.....	5	材料平衡周期.....	6

材料说明	6	存量	7
存量变化	7	存留废物	7
发方/收方差额	13	关键测量点	19
国际衡算标准	20	合计轴	24
核材料擦拭样品	29	核材料初期存量	29
核材料初始存量	29	核材料封隔	29
核材料衡算活动	29	核材料监视	30
核材料末期存量	30	核材料平衡区	30
核材料实物盘存	31	核材料现有库存	31
核损耗	35	衡算记录	42
批数据	56	物件计数	67
原始数据	76	运行记录	77
战略要点	78	账面平衡	79

## 6 核材料核查与监测

不通知视察	4	擦拭取样	5
参考物质	6	初始视察	7
代表性样品	8	点样品	12
对照样品	13	方差 $\sigma^2$	14
干扰	18	环境取样	43
混合样品	43	校准	45
抗干扰	47	亏量	48
例行视察	49	连续视察	49
临时通知视察	51	破坏性分析	56
实物存量	61	属性法	62
属性检验	62	随机取样	63
随机视察	63	特别视察	63
同时视察	64	误差	68
系统取样	68	限制准入	69
样品	73	样品量	73

易损性评定.....	74	真实性验证.....	80
重量分析.....	82	专门视察.....	82

## 五 不扩散

索引

八国集团“防止大规模杀伤性武器和材料扩散的全球伙伴计划”.....	1	不扩散.....	3
不扩散核武器条约.....	3	《不扩散核武器条约》审议会.....	3
钚管理指导原则.....	4	触发清单.....	7
打击核恐怖主义全球行动倡议.....	7	导弹技术控制制度.....	9
东南亚无核武器区条约(曼谷条约) ...	12	国际原子能机构.....	20

保障监督标准 【bǎozhàng jiāndū biāozhǔn】	<b>safeguards criteria</b>
保障监督的质量保证 【bǎozhàng jiāndū de zhiliàng bǎozhèng】 在国际原子能机构保障监督体系下，确保对所有会影响保障监督实施质量的活动进行系统化监控的一种管理手段。(源自：参考文献[4], 3.36)	<b>safeguards quality assurance</b> In the context of IAEA safeguards, a management tool for ensuring a systematic approach to all of the activities affecting the quality of the safeguards implementation. (From: Reference [4], 3.36)
保障监督结论 【bǎozhàng jiāndū jiélùn】	<b>safeguards conclusion</b>
保障监督协定 【bǎozhàng jiāndū xiédìng】	<b>Safeguards Agreement</b>
爆心投影点【bàoxīn tóuyǐngdiǎn】	<b>ground zero</b>
备忘录【bèiwànglù】	<b>memorandum</b>
备用弹头【bèiyòng dàn tóu】	<b>spare warhead</b>
备用性核武库【bèiyòngxìng héwǔkù】 美国现役核武库的一部分，作为响应力量的一部分予以保留，用来加强作战部署的力量以应对潜在的意外事故、突发的事件或显现的威胁。 (改自：参考文献[66] p4, [67-68])	<b>hedge warheads stockpile</b> One part of the U.S. active stockpile of warheads, retained as part of the responsive force, to be used to augment the operationally deployed force in order to meet potential contingencies, unanticipated events or emerging threats. (Modified from: Reference [66], p4; [67-68])
比等效百万吨数 【bǐděngxiào bǎiwàndūnshù】	<b>equivalent megatonnage-to-weight ratio</b>
比例爆高【bǐlì bàogāo】	<b>scaled height of burst</b>
比例爆深【bǐlì bàoshēn】	<b>scaled depth of burst</b>
比威力【bǐwēilì】	<b>yield-to-weight ratio</b>
闭式核燃料循环 【bìshì héránliào xúnhuán】 核燃料循环通常有两种类型。一种	<b>closed nuclear fuel cycle</b> There are two common types of nuclear fuel cycle. One is the “open” fuel cycle,

<p>是“开式”燃料循环，即乏燃料不经过后处理，在最终处置前以废料形式储存。另一种是“闭式”燃料循环，即乏燃料经过后处理从裂变产物中分离出铀和钚。铀和钚都可作为新的燃料元件循环使用。(源自：参考文献[14]，p1-2)</p>	<p>in which the spent fuel is not reprocessed but kept in storage pending eventual disposal as waste. The other is the “closed” fuel cycle, where the spent fuel is reprocessed and the uranium and plutonium separated from the fission products. Both the uranium and the plutonium can be recycled into new fuel elements. (From: Reference [14], p1-2)</p>
<p><b>变换打击目标能力</b> 【biànhuàn dǎjī mùbiāo nénglì】</p>	<p><b>target-changing capability</b></p>
<p><b>标签</b>【biāoqiān】</p> <p>在军备控制条约的限制对象上，为便于核查而设置的某种独特标志。标签必须具有固有的特征，不能复制、转移、篡改或探测，同时要稳定、可靠、便宜。(源自：参考文献[1]，p496)</p> <p>注：有源标签工作时需要电源，但无源标签不需要电源。</p>	<p><b>tag</b></p> <p>A unique identifier set up for facilitating verification of items restricted by arms control treaties. A tag must have intrinsic characteristic which make it difficult to be duplicated, transferred, tampered or detected. A tag should also be stable, credible and inexpensive. (From: Reference [1], p496)</p> <p>Note: An active tag requires electrical power, while a passive tag works without a power supply.</p>
<p><b>标识数据</b>【biāoshí shùjù】</p>	<p><b>identity (identification) data</b></p>
<p><b>标准事件筛选判据</b> 【biāozhǔn shìjiàn shāixuǎn pànjù】</p>	<p><b>standard event screening criteria</b></p>

<p><b>不扩散</b>【bùkuòsàn】</p>	<p><b>non-proliferation</b></p>
<p><b>不扩散核武器条约</b> 【bùkuòsàn héwǔqì tiáoyuē】</p>	<p><b>Treaty on the Non-Proliferation of Nuclear Weapons (NPT)</b></p>
<p><b>《不扩散核武器条约》审议会</b> 【bùkuòsàn héwǔqì tiáoyuē shěnyìhuì】</p>	<p><b>NPT Review Conferences</b></p>

不明材料量【bùmíng cáiliàoliàng】	<b>material unaccounted for (MUF)</b>
不实施国际原子能机构的保障监督【bùshíshī guójì yuánzǐnéng jīgòu de bǎozhàng jiāndū】	<b>non-application of IAEA safeguards</b>
不首先使用核武器【bù shǒuxiān shǐyòng héwǔqì】	<b>no-first-use of nuclear weapons</b>
不停堆换料动力堆【bùtíngduī huànlìào dònglìdū】	<b>on-load refuelled power reactor</b>
不通知视察【bùtōngzhī shìchá】	<b>unannounced inspection</b>
不履约【bùzūnyuē】	<b>non-compliance</b>
钚【bù】	<b>plutonium</b>
钚管理指导原则【bù guǎnlǐ zhǐdǎo yuánzé】 该指导原则由五个核武器国家和德国、日本、比利时、瑞士等九国于1997年通过，它着眼于按照国际约定(包括它们在NPT下的义务，欧共体成员国还有欧洲原子能联营条约下的义务)和IAEA的保障监督协定确保对持有的钚进行安全有效的管理。该指导原则描述了在接受该指导原则下适用于钚的核材料衡算体制、实体保护措施和国际运输手续。它还进一步指定了参与国要发布的有关钚管理的信息，包括他们所持有的民用未辐照钚和民用反应堆乏燃料中含有的钚估量的年度申报。(源自：参考文献[1], p409; [4], 1.30)	<b>Guidelines for the Management of Plutonium</b> The Guidelines adopted by nine states (the five nuclear weapon states and Germany, Japan, Belgium and Switzerland) in 1997, with a view to ensuring that holdings of plutonium are managed safely and effectively in accordance with international commitments, including their obligations under the NPT (and, for states that are members of the European Community, also under the Euratom Treaty), and with their safeguards agreements with the IAEA. The Guidelines describe, inter alia, the nuclear material accountancy system, physical protection measures and international transfer procedures applicable to the plutonium subject to the Guidelines. They further specify the information to be published by the participating States in respect of plutonium management, including

	annual statements of their holdings of civil unirradiated plutonium and of their estimates of plutonium contained in spent civil reactor fuel. (From: Reference [1], p409; [4], 1.30)
钚合金【bùhéjīn】	<b>plutonium alloy</b>
钚净化循环【bù jìnghuà xúnhuán】	<b>plutonium decontamination cycle</b>
钚再循环【bù zàixúnhuán】 将从乏燃料中回收得到的钚在反应堆内再使用的过程。(源自：参考文献[2]，p22)  注：在 DUPIC 过程中，轻水堆的乏燃料棒只需机械处理而不需化学后处理即可直接作为 CANDU 型重水动力堆的燃料。(源自：参考文献[32]，p25-40)	<b>plutonium recycling</b> A process of reusing in nuclear reactors the plutonium extracted from spent fuel. (From: Reference [2], p22)  Note: In the DUPIC process, spent LWR fuel rods are directly used as fuel for CANDU-type heavy-water power reactors, with only mechanical modifications and not chemical reprocessing. (From: Reference [32], p25-40)
部署弹头的检修 【bùshǔ dàn tóu de jiǎnxiū】	<b>examine and repair deployed warhead</b>
擦拭取样【cāshì qǔyàng】 一种环境样品的收集方法，它通过用一块超洁净介质(例如布)擦拭物体表面以获取物体表面残留的材料痕迹。(源自：参考文献[4]，9.4)	<b>swipe sampling</b> The collection of environmental samples by swiping a surface with a piece of ultraclean medium (such as cloth) to remove from the surface traces of the materials present. (From: Reference [4], 9.4)
材料类别【cáiliào lèibié】	<b>material category</b>
材料类型【cáiliào lèixíng】	<b>material type</b>
材料平衡区的账面存量 【cáiliào pínghéngqū de zhàngmiàn cúnliàng】	<b>book inventory of a material balance area</b>

材料平衡周期 【cáiliào pínghéng zhōuqī】	<b>material balance period (MBP)</b>
材料说明【cáiliào shuōmíng】	<b>material description</b>
材料形态【cáiliào xíngtài】	<b>material form</b>
裁军【cáijūn】	<b>disarmament</b>
裁军谈判会议 【cáijūn tánpàn huìyì】	<b>Conference on Disarmament (CD)</b>
裁军谈判会议特设委员会【cáijūn tánpàn huìyì tèshè wěiyuánhui】	<b>Ad Hoc Committee of Conference on Disarmament</b>
裁军谈判委员会 【cáijūn tánpàn wěiyuánhui】	<b>Committee on Disarmament</b>
裁军委员会会议 【cáijūn wěiyuánhui huìyì】	<b>Conference of the Committee on Disarmament (CCD)</b>
采办策略/采办途径 【cǎibàn cèlüè cǎibàn tújīng】 某国谋取用于制造核爆炸装置的核材料的一种(设想)策略。(源自: 参考文献[4], 3.8)	<b>acquisition strategy/acquisition path</b> A (hypothetical) scheme which a State could consider to acquire nuclear material usable for manufacturing a nuclear explosive device. (From: Reference [4], 3.8)
参考物质【cānkǎo wùzhì】	<b>reference material</b>
产氚堆【chǎn chuān duī】	<b>tritium production reactor</b>
产氚方法【chǎnchuān fāngfǎ】	<b>methods of tritium production</b>
超临界气体离心机 【chāolínjiè qìtǐ líxīnjī】	<b>supercritical gas centrifuge</b>
超越遏制战略 【chāoyuè èzhì zhànlüè】	<b>strategy of going beyond containment</b>
成像侦察卫星 【chéngxiàng zhēnchá wèixīng】	<b>imaging reconnaissance satellite</b>
冲击波弹【chōngjībō dàn】	<b>shock wave weapon</b>
冲击波毁伤效应 【chōngjībō huǐshāng xiàoyìng】	<b>damaging and injuring effects of shock wave</b>
冲击载荷【chōngjī zài hè】	<b>shock wave load</b>

重访周期 【chóngfǎng zhōuqī】	<b>revisit period</b>
重新瞄准能力 【chóngxīn miáozhǔn nénglì】	<b>retargeting capability</b>
出入口控制 【chūrùkǒu kòngzhì】	<b>entrance and exit control</b>
初始视察【chūshǐ shìchá】	<b>initial inspection</b>
触发清单【chùfā qīngdān】 核供应国集团规定，向无核武器国家出口“清单”上的项目，要“触发”国际原子能机构的保障监督。 (源自：参考文献[1]，p407)	<b>trigger list</b> The NSG prescribes that items on the list exported to non-nuclear-weapon states should trigger the IAEA safeguards. (From: Reference [1], p407)
氚【chuān】	<b>tritium</b>
次临界安全模拟实验系统 【cìlínjiè ānquán mómǐ shíyàn xìtǒng】	<b>subcritical safety simulation experiment system</b>
次临界度【cìlínjiè dù】	<b>subcriticality</b>
次临界实验【cìlínjiè shíyàn】 实验中裂变系统处于次临界状态的爆轰流体动力学实验，裂变材料的用量以不会发生自持链式裂变核反应为限。(改自:参考文献[1]，p214)	<b>subcritical experiment</b> Hydrodynamic detonation experiment in which the fission system remains subcritical, the material used would not exceed the amount that may produce a self-sustaining chain reaction. (Modified from: Reference [1], p214)
次临界装置【cìlínjiè zhuāngzhì】	<b>subcritical assembly</b>
次声监测【cìshēng jiāncè】	<b>infrasound monitoring</b>
存量【cúnliàng】	<b>inventory</b>
存量变化【cúnliàng biànhuà】	<b>inventory change</b>
存留废物【cúnliú fèiwù】	<b>retained waste</b>
打击核恐怖主义全球行动倡议 【dǎjī hékǒngbùzhǔyì quánqiú xíngdòng chàngyì】 2006年由美国和俄国发起，旨在防止恐怖主义分子获取核材料的倡	<b>Global Initiative to Combat Nuclear Terrorism</b> Launched in 2006 by the United States and Russia, the initiative aims to prevent terrorist access to nuclear

议, 具体措施包括: 改善核及放射性材料的衡算与安全, 加强对民用核设施的保护, 提高对核及放射性物质探测能力以防止非法走私。(源自: 参考文献[44])	materials by improving accounting and security of radioactive and nuclear materials, enhancing security at civilian nuclear facilities, and improving detection of nuclear and radioactive materials to prevent illicit trafficking. (From: Reference [44])
<b>打击军事力量【dǎjī jūnshì lìliàng】</b> 在任何可引发冲突的情况下, 使用战略空军和导弹力量摧毁或使选定的敌方军事力量失效。(源自: 参考文献[9], p128)	<b>counterforce strike</b> The employment of strategic air and missile forces in an effort to destroy, or render impotent, selected military capabilities of an enemy force under any of the circumstances by which hostilities may be initiated. (From: Reference [9], p128)
<b>打击社会财富【dǎjī shèhuì cáifù】</b> 打击敌方有价值的非军事目标, 如人口和工业设施。(改自: 参考文献[27])	<b>countervalue strike</b> Striking non-military assets of value to the enemy, such as population and industry centers. (Modified from: Reference [27])
<b>大规模报复战略【dàguīmó bàofù zhànlüè】</b>	<b>strategy of massive retaliation</b>
<b>大国协调【dàguó xiétiáo】</b>	<b>concert of powers</b>
<b>大陆架【dàlùjià】</b>	<b>continental shelf</b>
<b>大气层核爆炸取样技术【dàqìcéng hébào zhà qǔyàng jìshù】</b>	<b>sampling technology of atmospheric nuclear explosion</b>
<b>大气层核试验【dàqìcéng héshìyàn】</b>	<b>atmospheric nuclear test</b>
<b>大气层核试验的安全问题【dàqìcéng héshìyàn de ānquán wèntí】</b>	<b>safety problems of atmospheric nuclear test</b>
<b>代表性样品【dàibiǎoxìng yàngpǐn】</b>	<b>representative sample</b>
<b>单位分离功能耗【dānwèi fēnlígōng néng hào】</b>	<b>energy consumption of unit separative work</b>
<b>单循环流程【dānxúnhuán liúchéng】</b>	<b>single-cycle process</b>
<b>弹道导弹潜艇【dàndào dǎodàn qián tíng】</b>	<b>ballistic-missile submarine</b>

<b>弹道导弹预警系统</b> 【dàndàodǎodàn yǔjǐng xìtǒng】	<b>ballistic-missile early warning system</b>
<b>弹芯</b> 【dànxīn】 安置在内爆装置中心、通常有铍或其他金属包层的核炸药材料球体或壳体。(改自：参考文献[11], p90)	<b>pit</b> The sphere or shell of nuclear explosive material at the center of an implosion device, usually clad with beryllium or another metal. (Modified from: Reference [11], p90)
<b>当量剂量</b> 【dāngliàng jìliàng】	<b>equivalent dose</b>
<b>氘</b> 【dāo】	<b>deuterium</b>
<b>氘氟化锂</b> 【dāochuānhuǎlǐ】	<b>lithium deuterio-tritide</b>
<b>氘化锂</b> 【dāohuǎlǐ】	<b>lithium deuteride</b>
<b>导弹技术控制制度</b> 【dǎodàn jìshù kòngzhì zhìdù】 美国等西方国家 1987 年制定的,旨在防止用于运载大规模杀伤性武器的投掷系统(有人驾驶飞机除外)及有关设备和技术扩散的控制制度。该制度由“准则”和“设备与技术附件”两个文件组成,把限制项目(导弹、分系统、部件,生产设施和有关技术)分成两大类。第一类项目为“最敏感项目”,一般不得转让。第二类项目为军民两用项目,出口时要以许可证方式逐件审批,保证不用于包含第一类项目的系统。1993 年成员国对“准则”进行了修改,把原版中控制“核武器运载系统”的转让改成控制“大规模杀伤性武器(即核、生、化武器)运载系统”的转让。截至 2007 年底,该制	<b>Missile Technology Control Regime (MTCR)</b> The MTCR was originally established in 1987 by western countries. It is a regime that aims to restrict the proliferation of systems (except manned air vehicles), equipments and technologies intended for the delivery of weapons of mass destruction (WMD). The MTCR includes the Guidelines and the Equipment and Technology Annex, and it divides controlled items (missiles along with their subsystems and components, production equipments and related technologies) into two category. Category I items are the most sensitive items, commonly the transfer of them will not be authorized. Category II items are dual-use items, which should be examined and approved case-by-case subject to export license, and be guaranteed not to be used in projects including Category I items. In 1993, member states modified the Guidelines. “Control the transfer of

度有 34 个成员国。(改自: 参考文献[1], p410)	nuclear weapons delivery systems”, in the original version was modified to “control the transfer of weapons of mass destruction (nuclear, biological, chemical weapon) delivery systems”. Up to the end of 2007, the Regime has 34 member states. (Modified from: Reference [1], p410)
导弹精度【dǎodàn jīngdù】	<b>missile accuracy</b>
导弹遥测信号【dǎodàn yáocè xìnào】	<b>telemetry signal for missiles</b>
等效百万吨数 【děngxiào bǎiwàndūnshù】 以百万吨 TNT 当量为单位计量核弹威力的数值的三分之二次方。用公式可表示为 $EMT=(Y/Y_0)^{2/3}$ 。式中 $Y$ 为核弹威力, $Y_0$ 为一百万吨 TNT 当量。(改自: 参考文献[3], p115-116)	<b>equivalent megatonnage</b> The 2/3 power of the yield of a nuclear warhead measured by megaton TNT equivalent. The formula is $EMT=(Y/Y_0)^{2/3}$ , where $Y$ is the yield of a nuclear warhead and $Y_0$ is one megaton TNT equivalent. (Modified from: Reference [3], p115-116)
低放废物【dīfàng fèiwù】	<b>low level radioactive waste</b>
低浓铀【dīnóngyóu】	<b>low-enriched uranium (LEU)</b>
低强度冲突理论 【dīqiángdù chōngtū lǐlùn】	<b>theory of low intensity conflict</b>
地面分辨率/空间分辨率 【dìmiàn fēnbiànlǜ kōngjiān fēnbiànlǜ】	<b>ground resolution/spatial resolution</b>
地面或地下核爆炸毁伤效应 【dìmiàn huò dìxià hébào zhà huǐshāng xiàoyìng】	<b>damaging and injuring effects of surface or underground nuclear explosion</b>
地区核材料衡算和控制系统 【dìqū hé cáiliào héngsuàn hé kòngzhì xìtǒng】	<b>regional system of accounting for and control of nuclear material (RSAC)</b>

地震监测【dìzhèn jiāncè】	<b>seismic monitoring</b>
地震监测系统【dìzhèn jiāncè xìtǒng】	<b>seismic monitoring system</b>
地质处置库【dìzhì chǔzhìkù】	<b>geological repository</b>
第二次核打击【dì'èrcì hédǎjī】 对敌方第一次核袭击的报复性核打击。(改自：参考文献[2], p62)	<b>nuclear second strike</b> Retaliatory nuclear attack following an enemy's first nuclear attack. (Modified from: Reference [2], p62)
第二代核武器【dì'èrdài héwǔqì】	<b>second-generation nuclear weapon</b>
第三代核武器【disāndài héwǔqì】	<b>third-generation nuclear weapon</b>
第一次核打击【dìyīcì hédǎjī】 1 在对手能够使用任何战略武器之前率先发动核攻击。首次打击是对手造成极大的破坏致使其失去发起有效反击能力的核进攻。(源自：参考文献[6], p72)  2 对敌方战略核力量的首次打击。这种打击可用于试图摧毁敌方的报复(第二次打击)能力。(源自：参考文献[8])	<b>nuclear first strike</b> 1 The launching of an initial nuclear attack before one's opponent is able to use any strategic weapon. First strike is a nuclear attack carried out at such a devastatingly high level of destruction as to nullify an enemy's capability to launch a major counterstrike. (From: Reference [6], p72)  2 An initial attack on an opponent's strategic nuclear forces. Such an attack may be undertaken in an attempt to destroy an enemy's retaliatory (second-strike) capability. (From: Reference [8])

第一代核武器【diyīdài héwǔqì】	<b>first-generation nuclear weapon</b>
点目标【diǎn mùbiāo】	<b>point target</b>
点样品【diǎn yàngpǐn】 在一个特定地区环境为确定能够在接近泄漏点临近地区发现泄漏物质的源的特征而采集的样品。(源自：参考文献[4]，9.5)	<b>point sample</b> An environmental sample taken in one particular area to characterize one source of released material which can be found in a contiguous area adjacent to a release point. (From: Reference [4], 9.5)
电磁脉冲弹【diàncí màichōng dàn】 一种设计成能加强核武器电磁脉冲效应的核爆炸装置。(源自：参考文献[20])	<b>electromagnetic pulse weapon</b> A nuclear explosive designed to enhance the electromagnetic pulse radiated by a nuclear weapon. (From: Reference [20])
电子【diànzǐ】	<b>electron</b>
电子枪【diànzǐqiāng】	<b>electron gun</b>
电子系统的瞬态辐射效应【diànzǐ xìtǒng de shùntài fúshè xiàoyìng】	<b>transient radiation effects on electronics</b>
电子系统的永久性辐射损伤【diànzǐ xìtǒng de yǒngjiǔxìng fúshè sǔnshāng】	<b>permanent radiation damage in electronics</b>
电子侦察卫星【diànzǐ zhēnchá wèixīng】	<b>electronic reconnaissance satellite/electronic intelligence (ELINT) satellite</b>
东盟地区论坛【dōngméng dìqū lùntán】	<b>ASEAN (Association of Southeast Asian Nations) Regional Forum</b>
东南亚无核武器区条约(曼谷条约)【dōngnányà wúhéwǔqìqū tiáoyuē màngǔ tiáoyuē】	<b>Treaty on the Southeast Asia Nuclear Weapon-Free Zone (Treaty of Bangkok)</b>
动力堆【dònglìduī】	<b>power reactor</b>
冻结【dòngjié】	<b>freeze</b>

杜皮克工艺【dùpíkè gōngyì】 (压水堆乏燃料直接用于坎杜反应堆的工艺)	<b>DUPIC (Direct Use of Spent PWR fuel in CANDU reactors) process</b>
对样品【duìzhào yàngpǐn】	<b>control sample</b>
钝感高能炸药 【dùngǎn gāonéng zhànyào】	<b>insensitive high explosive</b>
多层分离膜/复合分离膜 【duōcéng fēnlímó fùhé fēnlímó】 由多层不同结构的多孔膜紧密叠合组成的分离膜。(源自：参考文献[2], p81)	<b>complex (diffusion) barrier</b> A kind of (isotope) separation barrier composed of multiple layers of compactly overlapped porous barriers with different structure. (From: Reference [2], p81)
多裂变体次临界安全实验 【duōlièbiàntǐ cílinjiè ānquán shíyàn】	<b>multi-fissile body subcritical safety experiment</b>
遏制战略【èzhì zhànlüè】 美国在冷战初期试图阻止苏联的扩张和防止一些国家在政治上走向苏联领导的共产主义的外交政策战略。(改自：参考文献[40])	<b>containment strategy</b> Refers to the foreign policy strategy of the United States during the Cold War in which it attempted to stop the expansion of the Soviet Union and to prevent nations moving politically towards communism led by the Soviet Union. (Modified from: Reference [40])
遏制转用【èzhì zhuǎnyòng】	<b>deterrence of diversion</b>
21 国集团【èrshíyīguó jítuán】	<b>Group of 21</b>
二氧化钚【èryǎnghuàbù】	<b>plutonium dioxide</b>
二氧化铀【èryǎnghuàyóu】	<b>uranium dioxide</b>
发方/收方差额 【fāfāng shōufāng chā'é】	<b>shipper/receiver difference (SRD)</b>
乏燃料【fá ránliào】	<b>spent fuel</b>
乏燃料的冷却 【fá ránliào de lěngquè】	<b>cooling of spent fuel</b>
乏燃料管理安全和放射性废物管理安全联合公约 【fá ránliào guǎnlǐ ānquán hé fāngshè	<b>Spent Fuel Management Safety and Radioactive Waste Management Safety Joint</b>

xìng fèiwù guǎnlǐ ānquán liánhé gōngyuē】	<b>Convention</b>
乏燃料贮存【fáránliào zhùcún】	<b>spent fuel storage</b>
反弹道导弹的导弹 【fǎndàodàodǎodàn de dǎodàn】	<b>anti-ballistic-missile missile</b>
反胁迫报警【fǎnxiépò bàojǐng】 又称反劫持报警。给值班、巡逻人员配备的隐蔽报警装置。(改自：参考文献[2], p91)	<b>anti-coercion alarm</b> Also called anti-hijack alarm. The concealed warning device provided for guards on duty or on patrol. (Modified from: Reference [2], p91)
反应堆【fǎnyīngduī】	<b>reactor</b>
反应堆分类【fǎnyīngduī fēnlèi】	<b>classification of reactor</b>
反应堆级钚【fǎnyīngduījí bù】 通常指钚-240 含量大于 18% 的钚。 (改自：参考文献[2], p93)	<b>reactor-grade plutonium</b> Plutonium containing more than 18% Pu-240. (Modified from: Reference [2], p93)
方差 $\sigma^2$ 【fāngchā $\sigma^2$ 】	<b>variance <math>\sigma^2</math></b>
防御性战略【fángyùxìng zhànlüè】 在全球上采取承受、逐步削弱和阻止的态势，防备和抗击敌人的进攻。 (改自：参考文献[18], p36-37)	<b>defensive strategy</b> To guard against and resist the enemy's attack by means of a strategy based on operations that absorb, progressively weaken and block such an attack. (Modified from: Reference [18], p36-37)
放射性沉降【fàngshèxìng chénjiàng】	<b>radioactive fallout</b>
放射性废物【fàngshèxìng fèiwù】	<b>radioactive waste</b>
放射性废物处置 【fàngshèxìng fèiwù chǔzhì】	<b>radioactive waste disposal</b>
放射性废液处理 【fàngshèxìng fèiyè chǔlǐ】	<b>processing of radioactive liquid waste</b>
放射性固体废物处理 【fàngshèxìng gùtǐ fèiwù chǔlǐ】	<b>treatment of radioactive solid waste</b>

放射性核素监测 【fàngshèxìng héxù jiāncè】 通过收集、分析、测量各种放射性核素，以达到监测相关核活动目的的方法。(改自：参考文献[1]，p486)	<b>radionuclide monitoring</b> A method for monitoring nuclear related activity through collecting, analyzing, and measuring different kinds of radionuclides. (Modified from: Reference [1], p486)
放射性活度【fàngshèxìng huódù】	<b>radioactivity</b>
放射性气体取样与探测 【fàngshèxìng qìtǐ qǔyàng yǔ tàncè】	<b>radioactive gas sampling and detecting</b>
放射性同位素 【fàngshèxìng tóngwèisù】	<b>radioisotope</b>
放射性物质散布装置【fàngshèxìng wùzhì sànbù zhuāngzhì】 参见“脏弹”	<b>radiological dispersal device (RDD)</b> Refer to “dirty bomb”
放射性烟云【fàngshèxìng yānyún】	<b>radioactive cloud</b>
放射性沾染【fàngshèxìng zhānrǎn】	<b>radioactive contamination</b>
放射性沾染效应 【fàngshèxìng zhānrǎn xiàoyìng】	<b>effects of radioactive contamination</b>
非对称战争【fēiduìchèn zhànzhēng】 任何一方使用了不同的武器、战术或战略的战争。“所有战略都基于非对称性原则进行谋划和实施，因此理性运筹的战争都具有非对称性特征。”(源自：参考文献[55]，p102-108)	<b>asymmetric warfare</b> A war in which either side employs a different weapon, tactic or strategy. “All strategy works on asymmetries, so asymmetric warfare is representative of all rationally executed warfare.” (From: Reference [55], p102-108)
非核重型轰炸机基线展示 【fēihé zhòngxíng hōngzhàjī jīxiàn zhǎnshì】	<b>baseline exhibition for non-nuclear heavy bombers</b>
非现役弹头【fēi xiànyì dàn tóu】	<b>inactive warhead</b>
非现役核武库【fēi xiànyì héwǔkù】	<b>inactive nuclear stockpile</b>
非直接使用材料 【fēi zhíjiē shíyòng cáiliào】 除直接使用材料以外的所有核材料。它包括：贫化铀、天然铀和低	<b>indirect use material</b> All nuclear material except direct use material. It includes: depleted, natural and low enriched uranium, and thorium,

浓缩铀以及钍，所有这些材料都必须经过进一步加工以生产直接使用材料。(源自：参考文献[4]，4.26)	all of which must be further processed in order to produce direct use material. (From: Reference [4], 4.26)
废物固化【fèiwù gùhuà】	<b>waste solidification</b>
废物贮存【fèiwù zhùcún】	<b>waste storage</b>
沸水堆【fèishuǐduī】	<b>boiling water reactor (BWR)</b>
分导式多弹头【fēndǎoshì duōdàntóu】	<b>multiple independently targetable reentry vehicle (MIRV)</b>
分离单元【fēnlí dānyuán】	<b>separative element</b>
分离功【fēnlígōng】 把一定量的铀浓缩到一定的铀-235丰度所需要投入的工作量，表达为千克分离功单位(kgSWU)或吨分离功单位(tSWU)。(源自：参考文献[26]，p213)	<b>separative work</b> The required work to enrich uranium to a certain level of U-235 concentration. It is described in terms of kg Separative Work Unit (kgSWU) or ton Separative Work Unit (tSWU). (From: Reference [26], p213)
分离功单位【fēnlígōng dānwèi】	<b>separative work unit</b>
分离功率【fēnlí gōnglǜ】 一个分离单元或一个分离级联在单位时间所能提供的分离功。(改自：参考文献[2]，p125)	<b>separative power</b> A unit for measuring separative work per unit time provided by a separating unit or a separating cascade. (Modified from: Reference [2], p125)
分离级【fēnlíjí】	<b>separation stage</b>
分离膜【fēnlímó】	<b>diffusion barrier</b>
分离膜的渗透性【fēnlímó de shèntòuxìng】	<b>permeability of barrier</b>
分离膜效率【fēnlímó xiàolǜ】 分离膜的实际浓缩因子与理想浓缩因子的比值。由于非纯分子流和膜后反扩散的影响，分离膜的实际浓缩因子通常小于理想浓缩因子。(改	<b>efficiency of barrier</b> The ratio of a porous barrier's real enrichment factor to its theoretical maximum enrichment factor. Because of non-ideal molecular flow and back diffusion, the real enrichment factor is less than the theoretical maximum

自: 参考文献[2], p126)	enrichment factor. (Modified from: Reference [2], p126)
分子流【fēnzǐliú】	<b>molecular flow</b>
<p>封记【fēngjì】</p> <p>用以紧紧地或完全地封闭或保护某物, 俗称封条或封签。利用做特殊标记的方法在被核查设备或部件加封条, 以防止武器及武器部件被转移和改动的措施。封记必须具有防止篡改和防伪造的特性, 具有唯一性, 不能复制, 有很强的置信度, 同时又要保证被核查设备或部件不受影响或不被改变, 不揭示被核查设施的敏感信息。应用中的封记有光纤封记、焊缝封记、电子封记和超声封记等。(源自: 参考文献[1], p496)</p> <p>注: 有源封记工作时需要电源, 但无源封记不需要电源。</p>	<p><b>seal</b></p> <p>Anything that tightly or completely closes or secures a thing. A seal with special markers is usually applied to those inspected equipments or components in order to prevent weapons and related components from being transferred and modified. A seal must be tamper-proof and counterfeit-proof and it must be unique and hard to duplicate with high confidence. It also should guarantee that inspected equipments or components remain unaffected or unchanged and that sensitive information related to the inspected facilities would not be revealed. Seals currently in application include fiber seal, welding seal, electric seal and ultrasonic seal etc. (From: Reference [1], p496)</p> <p>Note: An active seal requires electrical power, while a passive seal works without a power supply.</p>
氟化挥发法【fúhuà huīfāfǎ】	<b>fluoride volatility process</b>
辐射【fúshè】	<b>radiation</b>
辐射波型电磁脉冲模拟器 【fúshèbōxíng diàncí mǎichōng móníqì】	<b>electromagnetic-pulse radiation-wave type simulator</b>
辐射加固的电子器件 【fúshè jiāgù de diànzǐ qìjiàn】	<b>radiation-hardened electronic components</b>
附加议定书【fújiā yìdìngshū】	<b>Additional Protocol</b>
干法后处理【gānfǎ hòuchǔlǐ】	<b>dry reprocessing</b>
干法贮存【gānfǎ zhùcún】	<b>dry storage</b>

干净氢弹【gānjìng qīngdàn】	<b>clean hydrogen bomb</b>
干扰【gānrǎo】	<b>tampering</b>
感生放射性弹 【gǎnshēng fāngshèxìngdàn】 利用核爆中子感生的放射性同位素 增大放射性污染的一种氢弹。1950 年 2 月匈牙利物理学家 L·西拉德 最早提出这种弹的设想——“钴弹”。 但并没有人制造和试验。(源自：参 考文献[2], p63)	<b>induced-radioactivity bomb</b> A type of hydrogen bomb that utilizes radioisotopes induced by neutrons during a nuclear explosion to increase radioactive contamination. In February 1950 Hungarian physicist Leo Szilard published the concept of this bomb — the “cobalt bomb”. However no state manufactures and tests this kind of bomb. (From: Reference [2], p63)
高放废物【gāofàngfèiwù】	<b>high level radioactive waste</b>
高分辨率灵敏照相机 【gāofēnbiànlǜ língmǐn zhàoxiàngjī】	<b>high resolution sensing camera</b>
高技术战争【gāojìshù zhànzhēng】	<b>high-technology warfare</b>
高空核爆炸【gāokōng hébào zhà】	<b>nuclear high altitude burst</b>
高空核爆炸电磁脉冲 【gāokōng hébào zhà diàncí màichōng】	<b>electromagnetic pulse of high-altitude nuclear explosion</b>
高浓铀【gāonóngyóu】	<b>high-enriched uranium (HEU)</b>
高温化学处理【gāowēn huàxué chǔlǐ】	<b>pyrochemical processing</b>
高温气冷堆【gāowēn qìlěngduī】	<b>high temperature gas-cooled reactor (HTGR)</b>
高温冶金处理【gāowēn yějīn chǔlǐ】	<b>pyrometallurgical processing</b>
公报【gōngbào】	<b>communiqué</b>
公告【gōnggào】	<b>announcement</b>
公约【gōngyuē】	<b>convention</b>
供料【gōngliào】	<b>feed material</b>
供热反应堆【gōngrè fǎnyīngduī】	<b>nuclear heating reactor</b>
共同安全【gòngtóng ānquán】 冷战时期欧洲形成的一种安全概	<b>common security</b> A security concept that originated in Europe during the Cold War era. In

<p>念。1982年，瑞典首相帕尔梅主持的“裁军和安全问题独立委员会”的报告《共同安全：生存蓝图》中首次提出。该报告认为，共同安全是基于这样一种认识，即安全的最佳保证是通过双边或多边的增强安全合作而非通过相互竞争的强权政治来获得。(源自：参考文献[1]，p23)</p>	<p>1982, the Independent Commission on Disarmament and Security Issues chaired by Swedish prime minister Olof Palme published a report entitled "Common Security: A Blueprint for Existence", which for the first time put forward this concept. The report pointed out that common security is based on the following concept: the best guarantee for security is obtained through cooperation in improving security for both or all parties rather than through competitive power politics.(From: Reference [1], p23)</p>
<p>钴弹【gǔdàn】 参见“感生放射性弹”</p>	<p><b>cobalt bomb</b> Refer to "induced-radioactivity bomb"</p>
<p>关键测量点【guānjiàn cèliángdiǎn】</p>	<p><b>key measurement point (KMP)</b></p>
<p>关于朝鲜半岛无核化共同宣言 【guānyú cháoxiǎn bàndǎo wúhéhuà gòngtóng xuānyán】</p>	<p><b>(North-South) Joint Declaration on the Denuclearization of the Korean Peninsula</b></p>
<p>关于国际关系中不得进行武力威胁或使用武力的原则宣言 【guānyú guójìguānxì zhōng bùdé jìnxíng wǔlì wēixié huò shǐyòng wǔlì de yuánzé xuānyán】</p>	<p><b>Principled Declaration on Refraining from the Threat or Use of Force in Their International Relations</b></p>
<p>关于核材料、规定设备和非核材料自愿报告机制 【guānyú hécáiliào guīdìngshèbèi hé fēihécáiliào zìyuàn bàogào jīzhì】</p>	<p><b>voluntary reporting scheme on nuclear material and specified equipment and non-nuclear material</b></p>
<p>惯性约束聚变 【guànxìng yuēshù jùbiàn】</p>	<p><b>inertial confinement fusion (ICF)</b></p>
<p>罐装组件【guànzhuāng zǔjiàn】 核武器的次级装置，其内包含聚变燃料和(大多数情况下)铀装料(可能部分或全部是高浓铀)。(源自：参考文献[11]，p90)</p>	<p><b>canned subassembly (CSA)</b> The secondary assembly in a nuclear weapon containing both fusion fuel and in most cases uranium (some or all of which may be HEU). (From: Reference [11], p90)</p>

<p>注：在美国，要装入最终武器的部件被称为“罐装组件”。</p>	<p>Note: In America, the subassembly that is to be incorporated into the final weapon is called a “canned subassembly”.</p>
<p>规定的设备【guīding de shèbèi】</p>	<p><b>specified equipment</b></p>
<p>规约【guīyuē】</p>	<p><b>statute</b></p>

<p><b>核燃料后处理【héránliào hòuchǔlǐ】</b></p>	<p><b>nuclear fuel reprocessing</b></p>
<p><b>核燃料循环【héránliào xúnhuán】</b> 由与核材料物流相关的核设施及核活动组成的系统。从由国外提供带燃料的单个反应堆，到一整套完善系统，不同国家之间燃料循环的特点可能存在很大差异。(源自：参考文献[4], 4.30)</p>	<p><b>nuclear fuel cycle</b> A system of nuclear installations and activities interconnected by streams of nuclear material. The characteristics of the fuel cycle may vary widely from State to State, from a single reactor supplied from abroad with fuel, to a fully developed system. (From: Reference[4], 4.30)</p>
<p><b>核燃料循环废物</b> 【héránliào xúnhuán fèiwù】</p>	<p><b>waste from nuclear fuel cycle</b></p>

核深水炸弹【hé shēnshuǐ zhàdàn】	<b>nuclear depth bomb</b>
核试验【héshìyàn】	<b>nuclear test</b>
核试验测试技术 【héshìyàn cèshì jìshù】	<b>measurement technology of nuclear test</b>
核试验场【héshìyànchǎng】	<b>nuclear test site</b>
核试验的物理诊断测量 【héshìyàn de wùlǐzhěnduàn cèliáng】	<b>physical diagnostic measurement in nuclear test</b>
核试验的诊断和测量 【héshìyàn de zhěnduàn hé cèliáng】	<b>diagnostic and measurement of nuclear test</b>
核试验放射化学诊断 【héshìyàn fàngshèhuàxué zhěnduàn】	<b>radiochemical diagnostic of nuclear test</b>
核衰变【héshuāibiàn】	<b>nuclear decay</b>
核素【hésù】	<b>nuclide</b>
核损耗【hésǔnhào】 指由于核反应使核材料转变成其他元素或同位素而造成的核材料损耗。核损耗还包括核材料在反应堆中燃烧所造成的损耗以及存储期间衰变所造成的损耗(例如钚-241的衰变)。(源自：参考文献[4]，6.22)	<b>nuclear loss</b> Loss of nuclear material due to its transformation into other element(s) or isotope(s) as a result of nuclear reactions. Nuclear loss also includes burn up of nuclear material in a reactor and decay (e.g. of Pu-241) during storage. (From: Reference [4], 6.22)
核威慑【héwēishè】 以给觉察到的或潜在的敌人造成无法承受的毁伤的核报复相威胁，从而防止敌人实施核打击的战略。(源自：参考文献[6]，p177) 注：原则上，核威慑不仅仅可以用来阻止核攻击，而且也可以用来阻止常规力量、化学或生物武器的攻击，甚至用来阻止由非军事手段使至关重要的国家利益遭受损害的攻击。(源自：参考文献[7]，p14-15)	<b>nuclear deterrence</b> A strategy of preventing a nuclear attack by threatening the perceived or potential enemy with unacceptable damage by nuclear retaliation. (From: Reference [6], p177) Note: In principle, nuclear deterrence could be used to deter not only nuclear attacks but also attacks with conventional forces, attacks with chemical or biological weapons, or even assaults on vital national interests by nonmilitary means. (From: Reference [7], p14-15)

<b>核威胁【héwēixié】</b>	<b>nuclear threat</b>
<b>核武器库维护与管理计划【héwǔkù wéihù yǔ guǎnlǐ jìhuà】</b>	<b>Stockpile Stewardship and Management Program</b>
<b>核武器【héwǔqì】</b> <p>1 利用能自持进行的原子核裂变和(或)聚变反应瞬时释放的巨大能量,产生爆炸作用,并具有大规模毁伤破坏效应的武器。从广义上说它是指包括投掷或发射系统在内的具有作战能力的核武器系统。(改自:参考文献[3], p394)</p> <p>2 北约定义——根据预期设计构造,在完成指定的引爆控制序列后,能够产生预期的核反应并释放出核能的完整装置(如内爆型、枪型或热核型)。也被称为“原子武器”。(源自:参考文献[49], p11)</p> <p>3 俄罗斯定义——俄罗斯联邦军队的核武器是指包括核装料、核战斗部、运载工具和控制系统在内的武器系统。(源自:参考文献[29], p21)</p> <p>4 使原子核产生裂变或聚变链式反应(或兼而有之),以爆炸方式释放核能的装置。(源自:参考文献[8])</p>	<b>nuclear weapon</b> <p>1 Weapon assembly that is capable of producing an explosion and massive injury and destruction by the sudden release of energy instantaneously released from self-sustaining nuclear fission and/or fusion. From the generalized point of view, it refers to nuclear weapon system with a warfighting capability including the delivery or launch system. (Modified from: Reference [3], p394)</p> <p>2 NATO definition — A complete assembly (i.e. implosion type, gun type or thermonuclear type) in its intended ultimate configuration which, upon completion of the prescribed arming, fusing and firing sequence, is capable of producing the intended nuclear reaction and release of energy. Also called “atomic weapon”. (From: Reference [49], p11)</p> <p>3 Russian definition — Nuclear Weapons in the Armed Forces of the Russian Federation include an aggregate of armaments including nuclear charges, nuclear ammunition, means of their delivery to the target and control means. (From: Reference [29], p21)</p> <p>4 A device that releases nuclear energy in an explosive manner as the result of nuclear chain reactions involving the fission or fusion, or both, of atomic nuclei. (From: Reference [8])</p>

<p><b>核武器安全性【héwǔqì ānquánxìng】</b> 在正常的维护或使用核武器中，防止因设备或武器的误操作、逐步退化或意外故障等原因发生人员、设备和设施的事故的能力。(改自：参考文献[2]，p217)</p>	<p><b>nuclear weapon safety</b> In maintenance and use of nuclear weapons, the capability to avoid an accident involving personnel, facilities and installations due to misuse or from gradual deterioration or a sudden fault in equipment or weapons. (Modified from: Reference [2], p217)</p>
<p><b>核武器保安性【héwǔqì bǎo'ānxìng】</b> 核武器及其相关的设备和人员能抵制任何非授权的使用的能力。(改自：参考文献[2]，p217)</p>	<p><b>nuclear weapon security</b> The capability of a nuclear weapon and its surrounding equipment and personnel to prevent any unauthorized use. (Modified from: Reference [2], p217)</p>
<p><b>核武器保险装置【héwǔqì bǎoxiǎn zhuāngzhì】</b> 参见“密码锁(亦称启动连接装置)”</p>	<p><b>safing device of nuclear weapon</b> Refer to “permissive action link (PAL)”</p>

<b>核武装力量【héwǔzhuāng lìliàng】</b>	<b>nuclear forces</b>
<b>核物质【héwùzhì】</b>	<b>nuclear matter</b>
<b>核相关两用物项【hé xiāngguān liǎngyòng wùxiàng】</b> 指一种在核和非核领域都有技术用途的物项，提供这种物项时要遵守一定条件，因为这种物项可能为核爆炸活动提供很大的帮助。(改自：参考文献[4]，5.34)	<b>nuclear-related dual-use item</b> An item which has a technical use in both nuclear and non-nuclear applications, and may be subject to certain conditions of supply because such items could make a major contribution to a nuclear explosive activity. (Modified from: Reference [4], 5.34)
<b>核学说【héxuéshuō】</b> 为支持国家战略目标而规定在何种情形下以何种方式使用核武器的基本原则。(改自：参考文献[9])	<b>nuclear doctrine</b> The fundamental principles governing the conditions under which and the modalities of how nuclear weapons are to be used in support of national objectives. (Modified from: Reference [9])
<b>核优势【héyōushì】</b> 一个核国家的核武器拥有明显的质量和数量上的优势足以阻止或摧毁对手的报复性(第二次)打击能力的状态。(改自：参考文献[22])  注：另一种观点是，“摧毁对手所有核力量、消除报复性打击可能性的能力，被认为是一种第一次打击能力或核优势”。(源自：参考文献[22])	<b>nuclear primacy</b> The condition whereby one state holds a clear qualitative and quantitative ability to prevent or render ineffective a rival's retaliatory (second) strike capability. (Modified from: Reference [22])  Note: In another view, "The ability to destroy all of an adversary's nuclear forces, eliminating the possibility of a retaliatory strike, is known as a first-strike capability, or nuclear primacy." (From: Reference [22])
<b>核炸弹【hézhàdàn】</b>	<b>nuclear bomb</b>
<b>核战斗部【hézhàndòubù】</b> 核武器中用来毁伤目标的部分。主要由核爆炸装置、引爆控制系统、其他功能部件和相应的结构部件等组成。在中国军备控制领域常把核	<b>nuclear warhead</b> The part of a nuclear weapon whose function is to destroy or damage targets. It mainly consists of a nuclear explosive device, arming, fuzing and firing system, and other functional parts or relevant structures. In Chinese

<p>战斗部称为核弹头。(改自: 参考文献 [3], p404)</p> <p>注: 战斗部——导弹、炮弹、鱼雷、火箭或其他武器的毁伤目标的部分, 它含有核或热核系统、高能炸药系统、生物或化学制剂、或惰性材料。(源自: 参考文献[5], p15)</p>	<p>writings in the arms control field, the nuclear warhead is often called 【hédàntóu】(核弹头). (Modified from: Reference [3], p404)</p> <p>Note: The warhead is the part of a missile, projectile, torpedo, rocket, or other munition which contains either the nuclear or thermonuclear system, high explosive system, chemical or biological agents or inert materials intended to inflict damage. (From: Reference [5], p15)</p>
<p><b>核战略【héhàn lüè】</b></p> <p>筹划和指导核力量发展与运用的方略。(源自: 参考文献[1], p112)</p>	<p><b>nuclear strategy</b></p> <p>Strategy of planning and guiding the development and employment of nuclear force. (From: Reference [1], p112)</p>
<p><b>核战能力【héhàn nénglì】</b></p> <p>在核战略中, 具有使用核武器进行战争的能力, 而不仅限于慑止核战争爆发的能力。(改自: 参考文献[48])</p>	<p><b>nuclear warfighting capability</b></p> <p>In nuclear strategy, having the capability to use nuclear weapons to fight a war, and not just to deter the outbreak of nuclear war. (Modified from: Reference [48])</p>
<p><b>核战役【héhàn yì】</b></p> <p>在一定时间和区域内为实现战役或战略目标所采取的一系列使用核武器的相关军事行动。(改自: 参考文献 [9], p76)</p>	<p><b>nuclear campaign</b></p> <p>A series of related military operations using nuclear weapons aimed at accomplishing a strategic or operational objective within a given time and space. (Modified from: Reference [9], p76)</p>

环境取样【huánjìng qǔyàng】 在 IAEA 保障监督框架内，从环境中取样，并通过对样品的分析获取相关痕迹以揭示所处理的核材料或进行的信息。(源自：参考文献 [4], 9.1)	<b>environmental sampling</b> In the context of IAEA safeguards, the collection of samples from the environment with a view to analyzing them for traces of materials that can reveal information about nuclear material handled or activities conducted. (From: Reference [4], 9.1)
缓和【huǎnhé】	<b>detente</b>
换文【huànwén】	<b>exchange of notes</b>
黄饼【huángbǐng】 铀水冶过程中的中间产物，含有大约 80% 带着少量铀酰盐的八氧化三铀(U <sub>3</sub> O <sub>8</sub> )。用于铀浓缩的黄饼被转化成六氟化铀气体(UF <sub>6</sub> )，用于天然铀反应堆燃料的黄饼被加工成纯净的二氧化铀。(源自：参考文献[12])	<b>yellow cake</b> A concentrate produced during the uranium milling process that contains about 80% U <sub>3</sub> O <sub>8</sub> with small amounts of uranyl salts. In preparation for uranium enrichment, the yellowcake is converted to uranium hexafluoride gas (UF <sub>6</sub> ). In the preparation of natural uranium reactor fuel, yellowcake is processed into purified uranium dioxide. (From: Reference [12])
毁伤概率【huǐshāng gàilǜ】	<b>kill probability</b>
毁伤软目标能力 【huǐshāng ruǎnmùbiāo nénglì】	<b>capability of destroying soft target</b>
毁伤硬目标能力 【huǐshāng yìngmùbiāo nénglì】	<b>capability of destroying hardened target</b>
混合氧化物【hùnhé yǎnghuàwù】	<b>mixed oxide (MOX)</b>
混合样品【hùnhé yàngpǐn】	<b>composite sample</b>
机动导弹【jīdòng dǎodàn】	<b>mobile missile</b>
机动再入弹头【jīdòng zàirù dántóu】	<b>maneuverable reentry vehicle (MaRV)</b>
积极防御【jījī fángyù】	<b>active defense</b> Note 1: Term used to describe China's

<p>注 1: 用以描述中国军事战略的术语。它主要包括以下三方面的内容: 一是坚持自卫立场和实行后发制人; 二是以积极主动的军事准备和政治斗争防止战争; 三是一旦战争爆发, 以积极的反击和进攻作战达成战略防御目的。(改自: 参考文献[31], p124-125)</p> <p>注 2: 在美国, “积极防御”指采取有限的攻击及反击以防止敌方占领竞争中的区域或地点。(源自: 参考文献[9], p4)</p> <p>注 3: 在导弹防御领域, “积极防御”指拦截并摧毁导弹或其弹头; “消极防御”指主要通过使用爆炸掩体和食物存储等来抵御弹头的效用。(改自: 参考文献[62])</p>	<p>military strategy. It includes the following main elements: firstly, taking a firm stand of self-defense and gaining mastery by striking only after the enemy has struck; secondly, using active military preparations and political struggle to prevent war; thirdly, should war break out, using active counter-attack and offensive operations to achieve strategic defensive objectives. (Modified from: Reference [31], p124-125)</p> <p>Note 2: In the U.S., “active defense” is the employment of limited offensive action and counterattacks to deny a contested area or position to the enemy. (From: Reference [9], p4)</p> <p>Note 3: In the context of missile defense, “active defense” means the interception and destruction of missiles or their warheads; “passive defense” is protection against the effects of the warheads primarily by the use of blast shelters, stockpiling of food, etc. (Modified from: Reference [62])</p>

实时监测【shíshí jiāncè】 除了电子通信所必需的时间外，没有显著延迟地对数据或信息进行的及时的监测。(源自：参考文献[9], p451)	<b>real-time monitoring</b> Monitoring information which has been delayed only by the time required for electronic communication, implying that there are no noticeable delays. (Modified from: Reference [9], p451)
实体保护建议【shítǐ bǎohù jiànyì】	<b>physical-protection recommendations</b>
实体保护控制中心 【shítǐ bǎohù kòngzhì zhōngxīn】	<b>control center for physical protection</b>
实体保护设计基准威胁 【shítǐ bǎohù shèjì jīzhǔn wēixié】	<b>physical-protection design basis threats</b>
实体保护探测系统 【shítǐ bǎohù tàncè xìtǒng】	<b>detection system for physical protection</b>
实体保护通信系统 【shítǐ bǎohù tōngxīn xìtǒng】	<b>communication system for physical protection</b>
实体保护系统失效判断准则 【shítǐ bǎohù xìtǒng shīxiào pànduàn zhǔnzé】	<b>physical-protection system-failure criterion</b>
实体保护应急响应 【shítǐ bǎohù yīngjí xiǎngyìng】	<b>physical-protection emergency response</b>
实体保护组织机构 【shítǐ bǎohù zǔzhī jīgòu】	<b>physical-protection organization</b>
实体(实物)保护报警系统 【shítǐ shíwù bǎohù bàojǐng xìtǒng】	<b>alarm system for physical protection</b>
实物存量【shíwù cúnliàng】 某一给定时刻，在特定核材料平衡区内，按照规定程序测量或估算所得到的所有批量的核材料总和。(改	<b>physical inventory</b> The sum of all the measured or derived estimates of batch quantities of nuclear material on hand at a given time within a material balance area, obtained in

自：参考文献[15]， para113; [4]， 6.41)	accordance with specified procedures. (Modified from: Reference [15], para113; [4], 6.41)
实战部署的弹头 【shízhàn bùshǔ de dàn tóu】	<b>operationally deployed warhead</b>
实战能力【shízhàn nénglì】	<b>operational capability</b>
手套箱【shǒutàoxiāng】	<b>glove box</b>
属性法【shǔxìngfǎ】 通过测量物项的某些特征来识别条约限定物项的方法。这些特征为某特定类型的所有物项所具备。(改自：参考文献[11]， p104)	<b>attribute approach</b> Identifies treaty-limited objects by measuring certain characteristics of an object that should be displayed by all items of a given general type. (Modified from: Reference [11], p104)
属性检验【shǔxìng jiǎnyàn】 判断一个物项的某项特征(或属性)为“是”或“否”的统计试验。(源自：参考文献[4]， 10.30)	<b>attributes test</b> A statistical test of a characteristic (or attribute) of an item to which the response is either “yes” or “no”. (From: Reference [4], 10.30)
竖井地下核试验 【shùjǐng dìxià héshìyàn】	<b>shaft nuclear test</b>
数据更新视察【shùjù gēngxīn shìchá】	<b>data update inspection</b>
衰变【shuāibiàn】	<b>decay</b>
衰变能【shuāibiànnéng】	<b>decay energy</b>
双边合作协定 【shuāngbiān hézuò xiéding】	<b>bilateral cooperation agreement</b>
双循环流程 【shuāngxúnhuán liúchéng】	<b>two cycle process</b>
水法后处理【shuǐfǎ hòuchǔlǐ】	<b>aqueous reprocessing</b>
水氟化流程【shuǐfúhuà liúchéng】	<b>aquafluor process</b>
水面及水下核爆炸毁伤效应 【shuǐmiàn jí shuǐxià hébào zhà huǐshāng xiàoyìng】	<b>damaging and injuring effects of shallow or underwater nuclear explosion</b>
水声监测【shuǐshēng jiāncè】	<b>hydroacoustic monitoring</b>

四氟化铀氟化生产六氟化铀 【sìfúhuà yóu fúhuà shēngchǎn liùfúhuà yóu】	<b>production of uranium hexafluoride by fluorination of uranium tetrafluoride</b>
随机取样【suíjī qǔyàng】 所涉群体内的所有物项有相同被选概率的取样方式。(源自：参考文献[4], 7.8)	<b>random sampling</b> The process of selecting samples in such a manner that all items in a population have the same probability of being selected. (From: Reference [4], 7.8)
随机视察【suíjī shìchá】 在一个随机选定的日期对一处设施或设施外的一处场地进行的视察。 (源自：参考文献[4], 11.8)	<b>random inspection</b> An inspection performed at a facility or a location outside facilities on a date chosen randomly. (From: Reference [4], 11.8)
梭雷克斯流程【suōléikèsī liúchéng】 (钍萃取流程)	<b>THOREX (thorium extraction) process</b>
探知概率【tànzhī gǎilǜ】	<b>detection probability</b>
探知时间【tànzhī shíjiān】	<b>detection time</b>
特别视察【tèbié shìchá】	<b>ad hoc inspection</b>
特殊效应核武器 【tèshū xiàoyīng héwǔqì】	<b>tailored effects nuclear weapon</b>
特种可裂变材料 【tèzhǒng kělièbiàn cáiliào】 钚-239；铀-233；浓缩了同位素铀-235或铀-233的铀；任何含上述一种或多种物质的材料；以及IAEA理事会随时确定的其他可裂变材料；但“特种可裂变材料”不包括源材料。(源自：参考文献[4], 4.5)	<b>special fissionable material</b> Plutonium-239; uranium-233; uranium enriched in the isotopes 235 or 233; any material containing one or more of the foregoing; and such other fissionable material as the IAEA of Governors shall from time to time determine; but the term “special fissionable material” does not include source material. (From: Reference [4], 4.5)
梯恩梯当量【tī'ēntī dāngliàng】	<b>TNT equivalent</b>
天然放射性核素 【tiānrán fàngshèxìng hésù】	<b>natural radionuclides</b>
天然铀【tiānrányóu】	<b>natural uranium</b>

停产的设施【tíngchǎn de shèshī】	<b>standby facility</b>
停堆换料动力堆 【tíngduī huànlìào dònglìdūī】	<b>off-load refuelled power reactor</b>
同时视察【tóngshí shìchá】 IAEA 视察员同时或在短时间内对一个国家的两处或多处设施进行视察，以发现设施之间可能进行的串通行为，例如设施之间相互临时转移(借用)核材料，从而使同一份核材料被 IAEA 核查两次，即在两个被视察的设施中各被核查一次。(源自：参考文献[4]，11.11)	<b>simultaneous inspections</b> Inspections performed by IAEA inspectors simultaneously or within a short period of time at two or more facilities in a State in order to detect possible diversions arranged in collusion between facilities by, for example, the temporary transfer (“borrowing”) of nuclear material between facilities so that the same material would be verified twice by the IAEA, once in each of the two facilities inspected. (From: Reference [4], 11.11)
同位素【tóngwèisù】	<b>isotope</b>
同位素分离【tóngwèisù fēnlí】	<b>isotope separation</b>
同位素分离因子 【tóngwèisù fēnlí yīnzǐ】 表征分离单元分离效果的特征量，表示某一分离效应所产生同位素相对丰度的变化情况。(源自：参考文献[2]，p404)	<b>isotope separation factor</b> A characteristic value for measuring separative efficiency of a separative unit. It is the ratio of the relative concentration after and before processing. (From: Reference [2], p404)
同位素位移【tóngwèisù wèiyí】	<b>isotope shift</b>
透明度【tòumíngdù】 信息公开。在核查领域可指国家军事活动和可能带有军事意味的和平活动(如军民两用技术)的公开。(源自：参考文献[54])	<b>transparency</b> Openness of information. In the verification field it may refer to openness about a state’s military activities and about any peaceful activities that may have military implications (such as dual-use technology). (From: Reference [54])

<p>钍-铀核燃料循环  <b>【tǔ yóu héránliào xúnhuán】</b></p>	<p><b>thorium-uranium nuclear fuel cycle</b></p>
<p>退役设施/退役的设施外场所  <b>【tuìyì shèshī tuìyì de shèshīwài chǎngsuǒ】</b></p>	<p><b>decommissioned facility/decommissioned location outside facilities</b></p>
<p>外空军事化<b>【wàikōng jūnshìhuà】</b>                  在外空部署设施(通常是卫星)为军事活动提供信息支持。(改自: 参考文献[56], p30)                  参见“外空武器化”</p>	<p><b>militarization of space</b>                  The deployment of assets (typically satellites) in space for providing information support to military activities.                  (Modified from: Reference [56], p30)                  Refer to “<b>weaponization of space</b>”</p>
<p>外空武器化<b>【wàikōng wǔqìhuà】</b>                  部署专门设计用于在/从外空作战的系统或部件, 或部署专门设计用于在地球上攻击外空中目标的军事能力。(改自: 参考文献[56], p29)                  参见“外空军事化”</p>	<p><b>weaponization of space</b>                  To deploy systems or components specifically designed to fight a war in or from space, or military capabilities on the earth specifically designed to destroy or disable targets in space.                  (Modified From: Reference [56], p29)                  Refer to “<b>militarization of space</b>”</p>
<p>万隆会议十项原则  <b>【wànlóng huìyì shíxiàng yuánzé】</b></p>	<p><b>Ten Principles of the Bandung Conference</b></p>
<p>危机管理<b>【wēijī guǎnlǐ】</b>                  控制和管理危机, 使其不至于失控而导致战争的过程。危机管理应确保解决危机以保障国家攸关利益。(改自: 参考文献[28], p240)</p>	<p><b>crisis management</b>                  Procedures for controlling and managing a crisis so that it does not get out of hand and lead to war. Crisis management also ensures that the crisis is resolved so that the vital interests of the states involved are secured and protected. (Modified from: Reference [28], p240)</p>
<p>危机控制<b>【wēijī kòngzhì】</b>                  泛指遵循维护国家利益和避免武力冲突的原则而抑制危机扩展的一系列互动过程: 在危机尚处潜在阶段时努力消除可能促其爆发的因素;</p>	<p><b>crisis control</b>                  A series of interactive processes carried out following the principle of safeguarding national interests and avoiding armed conflicts, to eliminate the factors that may impel the eruption of latent crisis;</p>

<p>无核武器国家【wú héwǔqì guójiā】</p>	<p><b>non-nuclear weapon state (NNWS)</b></p>
<p>无源<math>\gamma</math>射线探测 【wúyuán <math>\gamma</math> shèxiàn tàncè】 通过测量裂变材料衰变时产生的特征<math>\gamma</math>射线,对裂变材料及含裂变材料的装置进行快速、无损探测的方法。 (源自:参考文献[1], p495)</p>	<p><b>passive gamma-ray detection</b> A rapid and non-destructive detection of fissionable materials and equipments containing fissionable material through detecting characteristic gamma-rays emitted from decay of such fissionable material. (From: Reference [1], p495)</p>
<p>无源标签【wúyuán biāoqiān】 参见“标签”</p>	<p><b>passive tag</b> Refer to “tag”</p>
<p>无源封记【wúyuán fēngjì】 参见“封记”</p>	<p><b>passive seal</b> Refer to “seal”</p>
<p>无源中子探测 【wúyuán zhōngzǐ tàncè】 通过探测裂变材料的自发中子而对裂变材料或含裂变材料的装置进行快速无损探测的方法。(源自:参考文献[1], p495)</p>	<p><b>passive neutron detection</b> A method of rapid non-destructive detection of fissionable material or devices containing fissionable materials by detecting neutrons spontaneously emitted from such fissionable material. (From: Reference [1], p496)</p>
<p>武器化【wǔqìhuà】</p>	<p><b>weaponization</b></p>
<p>武器级钚【wǔqìjí bù】 含小于或等于 7% 以下钚-240 的钚。 (源自:参考文献[1], p233) 注:含远大于 7% 以上钚-240 的钚事实上亦可用于核武器。(源自:参考文献[13], p32-33)</p>	<p><b>weapon-grade plutonium</b> Plutonium containing no more than 7% Pu-240. (From: Reference [1], p233) Note: Pu containing much more than 7% Pu-240 can actually be used in a nuclear weapon. (From: Reference [13], p32-33)</p>
<p>武器级铀【wǔqìjí yóu】 含大于或等于 90% 以上铀-235 的铀。(源自:参考文献[1], p233)</p>	<p><b>weapon-grade uranium</b> Enriched uranium containing no less than 90% U-235. (From: Reference [1], p233)</p>
<p>物件计数【wùjiàn jìshù】</p>	<p><b>item counting</b></p>

<b>物理包【wùlǐbāo】</b> 核武器中封装在辐射壳内的初级和次级部件的完整的组装件。(源自：参考文献[11], p91)	<b>physics package</b> The primary and secondary of a nuclear weapon are housed inside a radiation case; the completed assembly is called the “physics package.” (From: Reference [11], p91)
<b>误差【wùchā】</b>	<b>error</b>
<b>西方国家集团【xīfāng guójiā jítuán】</b>	<b>Western Group</b>
<b>吸收【xīshōu】</b>	<b>absorption</b>
<b>吸收剂量【xīshōu jiliàng】</b>	<b>absorbed dose</b>
<b>系统电磁脉冲【xìtǒng diàncí màichōng】</b>	<b>system-generated electromagnetic pulse</b>
<b>系统取样【xìtǒng qǔyàng】</b> 在一个连续的过程中以重复的方式进行取样, 如每隔 10 个物项取样或每隔一定的时间间隔取样。(源自：参考文献[4], 7.9)	<b>systematic sampling</b> The process of selecting samples in a repeated pattern, such as every 11th item or at fixed time intervals, from a continuing process. (From: Reference [4], 7.9)
<b>下游设施【xiàyóu shèshī】</b>	<b>downstream facility</b>
<b>先发制人打击【xiānfāzhìrén dǎjī】</b>	<b>preemptive strike</b>
<b>先前申报设施视察【xiānqián shēnbào shèshī shìchá】</b>	<b>formerly declared facility inspection</b>
<b>现场视察【xiànchǎng shìchá】</b> 在被探测现场利用人员或仪器收集信息的视察方式。《美苏关于削减和限制进攻性战略武器条约》规定了 13 种现场视察方式。视察由指派的视察员执行, 旨在核实没有进行军备限制协议所禁止的活动, 确认执行了军备限制协议所规定的活动, 或调查可疑事件的真相。(改自:	<b>on-site inspection (OSI)</b> The verification method carried out by personnel or apparatus on the selected site. The 13 types of inspection are defined in the START I treaty. Inspections are carried out by designated inspectors to verify that particular activities prohibited by an arms limitation agreement are not performed, to check that particular activities prescribed by an arms limitation agreement are implemented,

参考文献[16], p231)	or to examine the nature of a suspicious event. (Modified from:Reference [16], p231)
现场视察中的地球物理勘测 【xiànchǎng shìchá zhōng de dìqiú wùlǐ kāncè】	<b>geophysical survey in on-site inspections</b>
现实威慑战略 【xiànshí wēishè zhànlüè】	<b>strategy of realistic deterrence</b>
现役弹头【xiànyì dàn tóu】	<b>active warhead</b>
现役核武库【xiànyì hé wǔ kù】	<b>active nuclear stockpile</b>
限制【xiànzhì】	<b>limit</b>
限制准入【xiànzhì zhǔnrù】 指在被视察国的要求下，IAEA 和该国达成的限制进入权限的安排。这种安排应按照“防止与扩散相关的敏感信息的散布、满足安全或实体保护要求或者保护所有权或商业敏感信息”的原则制定。(源自：参考文献[4]，11.26)	<b>managed access</b> Upon the request of a State, the IAEA and the State shall make arrangements for managed access, arranged in such a way as “to prevent the dissemination of proliferation sensitive information, to meet safety or physical protection requirements, or to protect proprietary or commercially sensitive information.” (From: Reference [4], 11.26)
宪章【xiànzhāng】	<b>charter</b>
相互确保摧毁战略 【xiānghù quèbǎo cuīhuǐ zhànlüè】	<b>strategy of mutual assured destruction (MAD)</b>
响应力量【xiǎngyīng lìliàng】 意指在遭遇潜在的意外事故时能增加作战部署力量的能力。它使领导层能握有根据危机发展的程度而增加作战部署力量数量的选择权。 (改自：参考文献[66])	<b>responsive force</b> The responsive force is intended to provide a capability to augment the operationally deployed force to meet potential contingencies. It retains the option for leadership to increase the number of operationally deployed forces in proportion to the severity of an evolving crisis. (Modified from: Reference [66])
项目和供应协定 【xiàngmù hé gōngyīng xiédìng】	<b>project and supply agreement</b>
销毁【xiāohuǐ】	<b>destruction</b>

销毁视察【xiāohuǐ shìchá】	<b>elimination inspection</b>
小数量议定书 【xiǎoshùliàng yìdìngshū】	<b>small quantities protocol (SQP)</b>
协定/协议【xiéding xiéyi】	<b>agreement</b>
芯块【xīnkuài】	<b>pellet</b>
新三位一体【xīn sānwèiyītǐ】 参见“新战略三位一体”	<b>new triad</b> Refer to “new strategic triad”
新设施视察【xīn shèshī shìchá】	<b>new facility inspection</b>
<p><b>新思维【xīnsīwéi】</b></p> <p>1 20 世纪 80 年代中期苏联领导人戈尔巴乔夫对当时世界的看法以及关于苏联外交政策的观点，主要内容为：(1)世界是一个多样性的统一体；(2)充分尊重各国人民按照自己的选择而生活并独立自主地解决自身的问题；(3)全人类的利益高于阶级利益；(4)核战争威胁着人类的生存与发展；(5)全人类普遍安全的唯一原则基础是尊重主权。(改自:参考文献[1], p34; [64])</p> <p>2 该术语用以描述 20 世纪 80 年代中后期在戈尔巴乔夫总统领导下而发展的苏联外交政策思维的特性。新思维的主要观点包括：(1)资本主义和社会主义之间不是“零和”关系；(2)共同的人类利益高于阶级利益；(3)与美国的军事均衡对苏联的安全不是必需的，非攻击性的防御</p>	<p><b>new thinking</b></p> <p>1 The former Soviet Union President Mikhail Gorbachev's enunciated opinion on the world situation and Soviet Union foreign policy in the 1980s. The main points are: (1) The world is a unity of diversity. (2) Respect the choices of style of life according to people in each country and of the ways of solving their own problems independently. (3) The interest of humanity has priority over that of a class. (4) Nuclear war is a threat to human life and development. And (5) The basis of human common security is respect for independence and sovereignty of other members of the world community. (Modified From: Reference [1], p34; [64])</p> <p>2 The term used to characterize distinctive elements in Soviet foreign policy thinking developed under the leadership of President Mikhail Gorbachev in the latter half of the 1980s. The main propositions in new thinking included: (1) the relationship between capitalist and socialist states was not zero-sum; (2) common human interests should take priority over</p>

<p>战略应优于进攻战略；(4)军事力量主要用于防止冲突，而不是在战争中打败对手。新思维的某些表现形式包括单边裁军措施、削减军事力量、承诺单边和多边的信任建立及裁军措施。(源自：参考文献[57]，p117-129；[58])</p>	<p>class-based interests; (3) military parity with the U.S. was not necessary for Soviet security, and non-offensive defensive strategies were preferable to offensive strategies; (4) the main purpose of military power was to prevent conflict, rather than to defeat an adversary in a war. Some of the manifestations of new thinking included certain unilateral disarmament measures, reductions in the size of certain military forces, and a strong commitment to bilateral and multilateral confidence building and arms control measures.(From: Reference [57],p117-129; [58])</p>
<p><b>新战略三位一体</b> 【xīn zhànlüè sānwèiyītǐ】 美国2002年《核态势评估》报告中提出的一种新的军事战略，由三部分组成：核与非核打击力量；主动的和被动的防御；全新的防御基础设施。(源自：参考文献[67]) 参见“旧核三位一体”</p>	<p><b>new strategic triad</b> A new U.S. military strategy revealed in the 2002 Nuclear Posture Review, consisting of nuclear and non-nuclear strike forces; passive and active defenses; and a revitalized defense infrastructure. (From: Reference [67]) Refer to “old nuclear triad”</p>
<p><b>信息屏障</b>【xìnxī píngzhàng】 用来保护鉴别过程中可能搜集到的敏感武器设计信息。这可以通过自动进行采集、储存和分析数据，并只向视察员提供分析的结果来实现。(改自：参考文献[11]，p107-108)</p>	<p><b>information barrier</b> Used to protect any sensitive weapon design information that may be gathered during the identification process, for example, by automating the collection, storage, and analysis of data, and by making only the conclusions of the analysis available to the inspector. (Modified from: Reference [11], p107-108)</p>
<p><b>信息战</b>【xìnxīzhàn】</p>	<p><b>information warfare (IW)</b></p>
<p><b>虚警率</b>【xūjǐnglǜ】 被非真实事件驱动的报警次数与监</p>	<p><b>false-alarm rate</b> The ratio of alarms triggered by real</p>

<p>测系统设计上所能侦测到的总报警次数的比例。虚警的产生是由于监测系统无法区分真实的或虚假的警报。(改自: 参考文献[1], p489)</p>	<p>events to the total number of alarms the monitoring system detects. The false alarms are generated because the monitoring system could not distinguish real from false alarms. (Modified from: Reference [1], p489)</p>
<p><b>虚拟核试验【xū'nǐ héshìyàn】</b>                  用先进的计算机程序和高性能计算机对核爆试验进行数值模拟。(改自: 参考文献[2], p430)</p>	<p><b>virtual nuclear test</b>                  The numerical simulation of a nuclear explosion test done by advanced computer programs and high performance computers. ## 缩略语

<b>ABM Treaty</b>	<b>Treaty Between the United States of America and the Union of Soviet Republics on the Limitation of Anti-ballistic Missile Systems</b>	美苏关于限制反弹道导弹系统条约(反导条约)
<b>AF&amp;F</b>	<b>Arming, Fuzing &amp; Firing system</b>	引控系统
<b>ASC Program</b>	<b>Advanced Simulation and Computing Program</b>	先进模拟与计算计划
<b>ASCI</b>	<b>Accelerated Strategic Computing Initiative</b>	加速战略计算倡议
<b>ASEAN</b>	<b>Association of Southeast Asian Nations</b>	东盟
<b>BWR</b>	<b>Boiling Water Reactor</b>	沸水堆
<b>C3I</b>	<b>Command, Control, Communication &amp; Intelligence</b>	指挥、控制、通信和情报系统(C3I 系统)
<b>C4I</b>	<b>Command, Control, Communications, Computing &amp; Intelligence</b>	指挥、控制、通信、计算和情报系统(C4I 系统)
<b>CCD</b>	<b>Conference of the Committee on Disarmament</b>	裁军委员会会议
<b>CD</b>	<b>Conference on Disarmament</b>	裁军谈判会议
<b>CEP</b>	<b>Circular Error Probable</b>	圆概率偏差
<b>CORRTEX</b>	<b>Continuous Reflectometry for Radius vs Time Experiment</b>	科尔太克斯法
<b>CSA</b>	<b>Canned Subassembly</b>	罐装组件
<b>CSA</b>	<b>Comprehensive Safeguards Agreement</b>	全面保障监督协定

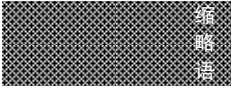

<b>CSBMs</b>	<b>Confidence and Security Building Measures</b>	建立信任与安全措施
<b>CTBT</b>	<b>Comprehensive Test Ban Treaty</b>	全面禁止核试验条约
<b>DA</b>	<b>Destructive Analysis</b>	破坏性分析
 <b>DIV</b>	<b>Design Information Verification</b>	设计资料核查
<b>DUPIC</b>	<b>Direct Use of Spent PWR Fuel in CANDU Reactors Process</b>	杜皮克工艺
<b>EEL</b>	<b>Essential Equipment List</b>	重要设备清单
<b>ELINT</b>	<b>electronic intelligence</b>	电子情报
<b>ENCD</b>	<b>Eighteen-Nation Committee on Disarmament</b>	十八国裁军委员会
<b>HEU</b>	<b>High-Enriched Uranium</b>	高浓缩铀
<b>HTGR</b>	<b>High Temperature Gas-Cooled Reactor</b>	高温气冷堆
<b>HWR</b>	<b>Heavy Water Reactor</b>	重水堆
<b>IAEA</b>	<b>International Atomic Energy Agency</b>	国际原子能机构
<b>ICF</b>	<b>Inertial Confinement Fusion</b>	惯性约束聚变
<b>IDC</b>	<b>International Data Center</b>	国际数据中心
<b>IMO</b>	<b>International Maritime Organization</b>	国际海事组织
<b>IMS</b>	<b>International Monitoring System</b>	国际监测系统
<b>INF Treaty</b>	<b>Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Elimination of Their Intermediate-Range and Shorter-Range Missiles</b>	美苏关于消除两国中程及中短程导弹条约(中导条约)
<b>INFCIRC</b>	<b>Information Circular</b>	信息通报

<b>IW</b>	<b>Information Warfare</b>	信息战
<b>KMP</b>	<b>Key Measurement Point</b>	关键测量点
<b>LEU</b>	<b>Low-Enriched Uranium</b>	低浓铀
<b>LOF</b>	<b>Location Outside Facilities</b>	设施外场所
<b>LOW</b>	<b>Launch-on-Warning</b>	预警即发射
<b>LUA</b>	<b>Launch-under-Attack</b>	遇袭即发射
<b>LWR</b>	<b>Light Water Reactor</b>	轻水堆
<b>MAD</b>	<b>Mutual Assured Destruction</b>	相互确保摧毁
<b>MaRV</b>	<b>Maneuverable Reentry Vehicle</b>	机动再入弹头
<b>MBA</b>	<b>Material Balance Area</b>	核材料平衡区
<b>MBP</b>	<b>Material Balance Period</b>	材料平衡周期
<b>MIRV</b>	<b>Multiple Independently Targetable Reentry Vehicle</b>	分导式多弹头
<b>MNSR</b>	<b>Miniature Neutron Source Reactor</b>	微型中子源反应堆
<b>MOX</b>	<b>Mixed Oxide</b>	混合氧化物
<b>MTCR</b>	<b>Missile Technology Control Regime</b>	导弹技术控制制度
<b>MUF</b>	<b>Material Unaccounted For</b>	不明材料量
<b>NEM</b>	<b>Nuclear-Explosive Material</b>	核爆材料
<b>NEMP</b>	<b>Nuclear Electromagnetic Pulse</b>	核电磁脉冲
<b>NIF</b>	<b>National Ignition Facility</b>	国家点火装置
<b>NNWS</b>	<b>Non-Nuclear Weapon State</b>	无核武器国家
<b>NPT</b>	<b>Treaty on the Non-Proliferation of Nuclear Weapons</b>	不扩散核武器条约

<b>NSG</b>	<b>Nuclear Suppliers Group</b>	核供应国集团
<b>NTMs</b>	<b>National Technical Means</b>	国家技术手段
<b>NTS</b>	<b>Nuclear Threshold State</b>	核门槛国家
<b>NWS</b>	<b>Nuclear Weapon State</b>	核武器国家
 <b>OSCE</b>	<b>Organization for Security and Cooperation in Europe</b>	欧洲安全与合作组织
<b>OSI</b>	<b>on-site inspection</b>	现场视察
<b>PAL</b>	<b>Permissive Action Link</b>	密码锁(亦称启动连接装置)
<b>PNE</b>	<b>Treaty Between the United States of America and the Union of Soviet Socialist Republics on Underground Nuclear Explosion for Peaceful Purposes</b>	美苏和平利用地下核爆炸条约
<b>PTBT</b>	<b>Treaty Banning Nuclear Weapon Tests in the Atmosphere, in Outer Space and Under Water</b>	禁止在大气层、外层空间和水下进行核武器试验条约
<b>PUREX Process</b>	<b>Plutonium Uranium Recovery by Extraction Process</b>	普雷克斯流程
<b>PWR</b>	<b>Pressurized Water Reactor</b>	压水堆
<b>RDD</b>	<b>Radioactive Dispersal Device</b>	放射性物质散布装置
<b>RMA</b>	<b>Revolution in Military Affairs</b>	军事变革
<b>RRRW</b>	<b>Reduced Residual Radioactivity Weapon</b>	弱剩余放射性武器(3R 弹)
<b>RSAC</b>	<b>Regional System of Accounting for and Control of Nuclear Material</b>	地区核材料衡算和控制系统

<b>SALT II Treaty</b>	<b>Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitation of Strategic Offensive Arms</b>	美苏限制进攻性战略武器条约
<b>SALT I</b>	<b>Interim Agreement Between the United States of America and the Union of Soviet Socialist Republics on Certain Measures with Respect to the Limitation of Strategic Offensive Arms</b>	美苏限制进攻性战略武器的某些措施的临时协定
<b>SAR</b>	<b>Synthetic Aperture Radar</b>	合成孔径雷达
<b>SDI</b>	<b>Strategic Defense Initiative</b>	战略防御倡议
<b>SORT</b>	<b>Treaty Between the United States of American and the Russian Federation On Strategic Offensive Reductions</b>	美俄削减进攻性战略武器条约 (莫斯科条约)
<b>SQ</b>	<b>Significant Quantity</b>	重要量
<b>SQP</b>	<b>Small Quantities Protocol</b>	小数量议定书
<b>SRD</b>	<b>Shipper/Receiver Difference</b>	发方/收方差额
<b>SSAC</b>	<b>State System of Accounting for and Control of Nuclear Material</b>	国家核材料衡算和控制系统
<b>START I</b>	<b>Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Reduction and Limitation of Offensive Strategic Arms</b>	美苏关于削减和限制进攻性战略武器条约
<b>START II</b>	<b>Treaty Between the United States of America and the Russian Federation on Further Reduction and Limitation of Strategic Offensive Arms</b>	美俄关于进一步削减和限制进攻性战略武器条约
<b>THOREX Process</b>	<b>Thorium Extraction Process</b>	梭雷克斯流程

---

<b>TNCD</b>	<b>Ten-Nation Committee on Disarmament</b>	十国裁军委员会
<b>TTBT</b>	<b>Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitation of Underground Nuclear Weapon Tests</b>	美苏限制地下核武器试验条约 (限当量条约)
 <b>UNDC</b>	<b>United Nations Disarmament Commission</b>	联合国裁军审议委员会
<b>UNIDIR</b>	<b>United Nations Institute for Disarmament Research</b>	联合国裁军研究所
<b>V&amp;V</b>	<b>verification and validation</b>	验证与确认
