NATIONAL COOPERATIVE FREIGHT RESEARCH PROGRAM

Sponsored by the Research and Innovative Technology Administration

Subject Areas: IV Operations and Safety, VII Rail, VIII Freight Transportation, IX Marine Transportation

Research Results Digest 1

NATIONAL COOPERATIVE FREIGHT RESEARCH PROGRAM: A STATUS REPORT

This is a staff digest of the progress and status of the National Cooperative Freight Research Program, which is administered by the Transportation Research Board of the National Academies. The program is managed by Crawford Jencks, Deputy Director, Cooperative Research Programs. Individual contract research projects are managed by William C. Rogers, Senior Program Officer.

BACKGROUND

The National Cooperative Freight Research Program (NCFRP) is a cooperative research program sponsored by the Research and Innovative Technology Administration (RITA) and administered by the Transportation Research Board. The program was authorized in 2005 with the passage of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). On September 6, 2006, a contract to begin work was executed between RITA and The National Academies. The NCFRP will carry out applied research on problems facing the freight industry that are not being adequately addressed by existing research programs. SAFETEA-LU, in authorizing the NCFRP, called for the development of a national research agenda addressing freight transportation and for the implementation of a multi-year strategic plan to achieve it. The act also states that “the national research agenda shall . . . include research in the following areas:

- (1) Techniques for estimating and quantifying public benefits derived from freight transportation projects,
- (2) Alternative approaches to calculating the contribution of truck and

rail traffic to congestion on specific highway segments,

- (3) The feasibility of consolidating origins and destinations for freight movement,
- (4) Methods for incorporating estimates of international trade into landside transportation planning,
- (5) The use of technology applications to increase capacity of highway lanes dedicated to truck-only traffic,
- (6) Development of physical and policy alternatives for separating car and truck traffic,
- (7) Ways to synchronize infrastructure improvements with freight transportation demand,
- (8) The effects of changing patterns of freight movement on transportation planning decisions related to rest areas,
- (9) Other research areas to identify and address emerging and future research needs related to freight transportation by all modes.”

Program guidance is provided by an Oversight Committee comprised of a representative cross section of freight stakeholders appointed by the National Research

TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES

Council of The National Academies. The NCFRP Oversight Committee meets annually to formulate the research program by identifying the highest priority projects and defining funding levels and expected products. Research problem statements recommending research needs for consideration by the Oversight Committee are solicited annually, but may be submitted to TRB at any time. See NCFRP website www.TRB.org/NCFRP.

INTRODUCTION

America's freight transportation system makes critical contributions to the nation's economy, security, and quality of life. More than \$660 billion (about 6.4 percent of the U.S. Gross Domestic Product) is spent annually to move freight, and the cost and volume of goods movement are crucial to the productivity of the entire U.S. economy.

The freight transportation system in the United States is a complex, decentralized, and dynamic network of private and public entities, involving all modes of transportation—trucking, rail, waterways, air, and pipelines. In recent years, the demand for freight transportation service has been increasing fueled by growth in international trade; however, bottlenecks or congestion points in the system are exposing the inadequacies of current infrastructure and operations to meet the growing demand for freight. U.S. domestic freight, measured by ton mileage, is expected to grow by some 50 percent in the next 20 years. Strategic operational and investment decisions by governments at all levels will be necessary to maintain freight system performance, and will in turn require sound technical guidance based on research.

The NCFRP will produce a series of research reports and other products such as guidebooks for practitioners. Primary emphasis will be placed on disseminating NCFRP results to the intended end-users of the research: freight shippers and carriers, service providers, suppliers, and public officials. Relevant industry associations will play a key role in making research information available through their committee structures. The NCFRP may arrange for workshops, training aids, field visits, technology scans, and other activities to ensure that results are implemented by practitioners.

THE NCFRP

The NCFRP is managed using procedures modeled after those used by TRB in managing the National Cooperative Highway Research Program and other cooperative research programs. TRB solicits potential research problem statements from all parties. The NCFRP Oversight Committee selects and prioritizes these research needs based on the funding available. Each selected project is assigned to a panel, appointed by TRB, which provides technical guidance and counsel throughout the life of the project. Heavy emphasis is placed on including members representing the intended users of the research products. The panels prepare requests for proposals (RFPs) and select contractors, guide the projects, and review reports. Day-to-day program management is provided by NCFRP staff and includes the following tasks:

- Assisting the Oversight Committee in identifying and prioritizing research needs;
- Appointing and coordinating expert technical panels to guide research projects;
- Developing and distributing RFPs;
- Processing and evaluating proposals to select the best qualified research agencies;
- Executing contracts with the selected researchers;
- Guiding the research;
- Reviewing research reports;
- Publishing and disseminating research reports; and
- Promoting the application of research results.

SELECTION OF RESEARCH PROJECTS

The NCFRP Oversight Committee meets annually to select research projects that will inform investment and operations decisions affecting the performance of the freight transportation system. The membership of this committee is given in Table 1.

The Oversight Committee met in 2006, 2007, and 2008 and selected 28 projects for funding. Table 2 is a list of the projects—see NCFRP website for details.

Chair	Michael Huerta	ACS Transportation Solutions
Vice Chair	C. Randal Mullet	Con-Way, Inc
Secretary	Christopher W. Jenks	TRB
Member	Lillian Borrone	Consultant
Member	Larry L. Brown	Mississippi DOT
Member	Thomas M. Corsi	University of Maryland
Member	Coty Dupre	Dupre Transport LLC
Member	Robert L. Flanagan	First Southwest Company
Member	Emil Frankel	Consultant
Member	John T. Gray	Association of American Railroads
Member	Rodney Gregory	Department of Defense
Member	Jeffrey D. Holt	Consultant
Member	John Isbell	Nike, Inc.
Member	Gloria J. Jeff	Consultant
Member	Thomas Jensen	United Parcel Service
Member	Michael D. Meyer	Georgia Institute of Technology
Member	Gregory G. Nadeau	Maine DOT
Member	Paul Nowicki	BNSF Railway
Member	Craig Philip	Ingram Barge Line
Member	Cecil Selness	Minnesota DOT
Ex officio	Paul Brubaker	Research and Innovative Technology Administration
Ex officio	Thomas J. Madison, Jr.	Federal Highway Administration
Ex officio	Tyler D. Duvall	U.S. Department of Transportation
Nonvoting Observer	Thomas Bolle	Research and Innovative Technology Administration
Nonvoting Observer	Anthony T. Furst	Federal Highway Administration
Nonvoting Observer	John Horsley	AASHTO
Nonvoting Observer	Joseph Nicklous	Pipeline and Hazardous Materials Safety Administration
Nonvoting Observer	Leo Penne	AASHTO
Nonvoting Observer	Caesar Singh	Research and Innovative Technology Administration
Nonvoting Observer	John Steinhoff	Federal Motor Carrier Safety Administration
Nonvoting Observer	Martin Walker	Federal Motor Carrier Safety Administration
