

## ACKNOWLEDGMENTS

Our thanks to the many scholars who generously agreed to review the following papers and whose vibrant commentary and discussion made the review process a delight. Special thanks to Dr. Rachel Ives, who originally encouraged us to publish this work, and to Dr. Carlina de la Cova, who has been a champion of this project from its nascent stage. Thank you also to Dr. Ann Herring, Dr. Megan Brickley, and Dr. Andrew Nelson for the support and advice during this process.
